INTRODUCTION	4
1. AUTOMOTIVE FRICTION BRAKE MATERIALS	6
<i>1.1. Composite materials for brake pads</i>	6
<i>1.2. Materials for brake discs</i>	8
2. ORIGINATION OF FRICTION LAYER AND RELEASE OF BRAKE WEAR PARTICLES	9
<i>2.1. Formation of friction layer</i>	9
<i>2.2. Wear and wear products</i>	13
3. METHODS FOR GENERATION A MONITORING OF BRAKE WEAR PARTICLES	17
<i>3.1. Pin-on-disc simulations</i>	17
<i>3.2. Dynamometer simulations</i>	20
<i>3.3. Field tests</i>	35
4. SAMPLING AND COMPREHENSIVE CHARACTERIZATION OF BRAKE WEAR EMISSIONS	38
<i>4.1. Sampling and characterization of airborne wear particles</i>	38
<i>4.2. Sampling and characterization of non-airborne wear debris</i>	46
<i>4.3. Road dust characterization</i>	55
5. ENVIRONMENTAL IMPACT OF BRAKE WEAR PARTICULATE EMISSIONS	57
<i>5.1. Mobility of brake wear particles in water environment</i>	57
<i>5.2. Toxicity and mutagenicity of brake pad materials and wear particles</i>	59
6. FUTURE TRENDS IN DEVELOPMENT OF MATERIALS FOR AUTOMOTIVE FRICTION BRAKES	64
CONCLUSIONS	65
