

# Contents

<b>1</b>	<b>Introduction</b>	<b>8</b>
<b>2</b>	<b>Information systems fundamentals</b>	<b>10</b>
2.1	Data, information, knowledge . . . . .	10
2.2	System . . . . .	11
2.3	Subsystem . . . . .	12
2.4	Element . . . . .	12
2.5	Relationship . . . . .	12
2.6	Input, processing, output, feedback . . . . .	13
2.7	Analysis . . . . .	13
2.8	Synthesis . . . . .	13
2.9	Model . . . . .	13
2.10	System performance . . . . .	13
2.11	Information system . . . . .	13
2.12	Integrated information system . . . . .	14
2.13	Information systems importance . . . . .	14
2.14	Information systems and technologies trends . . . . .	15
2.14.1	Trends in development of communications . . . . .	15
2.14.2	Business organisation and management trends . . . . .	15
2.14.3	Hardware and software lifetime trends . . . . .	16
2.14.4	Basic software trends . . . . .	16
2.14.5	Application software trends . . . . .	16
2.14.6	Information technologies trends . . . . .	17
2.14.7	Development methods and tools trends . . . . .	17
2.14.8	IS management trends . . . . .	18
<b>3</b>	<b>Information System Architecture</b>	<b>19</b>
3.1	Global IS architecture . . . . .	19
3.1.1	Transaction Processing System (Operational Information System) . . . . .	20
3.1.2	Management (Tactical) Information Systems . . . . .	21
3.1.3	Executive Information Systems . . . . .	22
3.1.4	Office Information System . . . . .	22
3.1.5	Electronic data interchange (EDI) . . . . .	22

3.2	Partial architectures . . . . .	22
3.2.1	Function architecture . . . . .	22
3.3	Process architecture . . . . .	23
3.4	Data architecture . . . . .	23
3.5	Software architecture . . . . .	23
3.6	Hardware architecture . . . . .	24
3.7	Technological architecture . . . . .	24
<b>4</b>	<b>Information system development process</b>	<b>28</b>
4.1	Organisational preparation . . . . .	28
4.1.1	Appointing information manager . . . . .	28
4.1.2	Information system management strategy . . . . .	29
4.2	Information strategy . . . . .	31
4.3	Information system development life cycle . . . . .	32
4.3.1	Preliminary investigation . . . . .	33
4.3.2	Analysis . . . . .	33
4.3.3	Design . . . . .	34
4.3.4	Implementation . . . . .	34
4.3.5	Installation . . . . .	34
4.3.6	Post-implementation review . . . . .	34
4.3.7	Information system operation . . . . .	34
4.4	Prototyping . . . . .	35
4.5	CASE tools . . . . .	35
<b>5</b>	<b>System integration</b>	<b>37</b>
5.1	System integration principles . . . . .	37
5.2	System integration parts . . . . .	38
5.3	System integration levels . . . . .	39
5.4	Possible scenarios of IS implementation . . . . .	40
5.5	Outsourcing . . . . .	41
5.6	Economic evaluation of information systems . . . . .	41
5.6.1	Costs . . . . .	42
5.6.2	Benefits . . . . .	43
5.6.3	Financial measures . . . . .	44
<b>6</b>	<b>Applications of information systems</b>	<b>46</b>
6.1	Enterprise Resource Planning . . . . .	46
6.2	Customer Relationship Management . . . . .	46
6.2.1	Operational part . . . . .	48
6.2.2	Analytical part . . . . .	49
6.2.3	Collaborative part . . . . .	50
6.3	Decision Support Systems . . . . .	50

6.3.1	Data base . . . . .	50
6.3.2	Models . . . . .	51
6.3.3	User Interface . . . . .	52
6.3.4	Directions for the future . . . . .	52
6.4	Business Intelligence . . . . .	53
6.4.1	Data Warehousing . . . . .	53
6.4.2	On-Line Analytical Processing . . . . .	54
6.4.3	Data Mining . . . . .	55
<b>7</b>	<b>Database Management</b>	<b>57</b>
7.1	Commercial databases . . . . .	58
7.1.1	Oracle . . . . .	58
7.1.2	MS SQL Server . . . . .	59
7.1.3	DBD2 Universal Database . . . . .	59
7.1.4	Sybase . . . . .	60
7.2	Open-source databases . . . . .	60
7.2.1	PostgreSQL . . . . .	60
7.2.2	MySQL . . . . .	61
7.2.3	Firebird . . . . .	61
7.3	Data hierarchy . . . . .	62
7.4	Data modelling . . . . .	62
<b>8</b>	<b>Modelling techniques</b>	<b>63</b>
8.1	Data Flow Diagram . . . . .	63
8.2	Entity Relationship Modelling . . . . .	65
8.2.1	Entity relationship diagram creation . . . . .	66
8.3	Object-oriented approach . . . . .	68
8.3.1	Unified Modelling Language . . . . .	70
