

The Global Prehistory of Human Migration is drawn from content previously published in the five-volume *Encyclopedia of Global Human Migration*. The chapters in this volume are devoted exclusively to migration in prehistory and are edited by archaeologist Peter Bellwood. They cover all periods and places in human prehistory, from the first hominin migrations out of Africa about two million years ago to the end of prehistory, in some cases only a few centuries ago. The volume is truly multidisciplinary and is the first of its kind to cover the whole world, and all periods, from three major disciplines: archaeology, linguistics, and genetics. The international team of contributors, which represents 17 countries, comprises leading scholars in their fields. Chapters are illustrated by informative maps and diagrams. Now in an affordable single-volume format, this volume is an important tool for scholars of migration studies in the disciplines of history, anthropology, archaeology, genetics, biology, linguistics, and more.

Peter Bellwood is Emeritus Professor (Archaeology) at The Australian National University in Canberra, Australia. He is the author of *First Farmers* (Blackwell, 2005), *Prehistory of the Indo-Malaysian Archipelago* (2007), and *First Migrants* (Wiley-Blackwell, 2013). His book *First Farmers* won a 2006 Book Award from the Society for American Archaeology. He has also written and edited many other books on Southeast Asian and Pacific prehistory. His current research and writing are on prehistoric migrations around the world, especially of early food-producing populations, with a focus on Southeast Asia. He is currently involved in archaeological fieldwork in Vietnam, Indonesia, and the Philippines.

ISBN 978-1-118-97059-1

9 781118 970591

- 1 Prehistoric migration and the rise of humanity 1
Peter Bellwood

Part I: The Peopling of the World during the Pleistocene 7

- 2 The earliest stages of hominin dispersal in Africa and Eurasia 9
Christine Hertler, Angela Bruch, and Michael Märker
- 3 Hominin migrations before *Homo sapiens*: Out of Africa – 18
 how many times?
Colin Groves
- 4 Early Old World migrations of *Homo sapiens*: human biology 26
Mark Stoneking and Katerina Harvati
- 5 Early Old World migrations of *Homo sapiens*: archaeology 38
Peter Hiscock
- 6 Pleistocene migrations in the Southeast Asian archipelagos 49
François Sémah and Anne-Marie Sémah
- 7 The human colonization of Australia 55
Peter Hiscock
- 8 The human colonization of the Americas: archaeology 61
David J. Meltzer
- 9 The human colonization of the Americas: population genetics 70
Simon G. Southerton

Part II: Holocene migrations 77

- 10 Neolithic migrations: food production and population expansion 79
Peter Bellwood
- 11 Human migrations and the histories of major language families 87
Peter Bellwood
- 12 Sub-Saharan Africa: linguistics 96
Christopher Ehret
