Introduction	1
1 Basic notions	7
1.1 MV-algebras	7
1.2 Homomorphisms and ideals	12
1.3 Subdirect representation theorem	19
1.4 MV-equations	20
1.5 Boolean algebras	24
1.6 MV-chains	27
1.7 Bibliographical remarks	29
2 Chang completeness theorem	31
2.1 The functor Γ	31
2.2 Good sequences	34
2.3 The partially ordered monoid M_A	37
2.4 Chang's ℓ -group G_A	40
2.5 Chang completeness theorem	43
2.6 Bibliographical remarks	49
3 Free MV-algebras	51
3.1 McNaughton functions	51
3.2 The one-dimensional case	56
3.3 Decomposing McNaughton functions	62
3.4 Ideals in free MV-algebras	64
3.5 Simple MV-algebras	70
3.6 Semisimple MV-algebras	72
3.7 Bibliographical remarks	75

4 Lukasiewicz ∞-valued calculus	77
4.1 Many-valued propositional calculi	78
4.2 Wajsberg algebras	82
4.3 Provability	87
4.4 Lindenbaum algebra	92
4.5 All tautologies are provable	94
4.6 Syntactic and semantic consequence	97
4.7 Bibliographical remarks	101
5 Ulam's game	103
5.1 Questions and answers	103
5.2 Dynamics of states of knowledge	104
5.3 Operations on states of knowledge	107
5.4 Bibliographical remarks	109
6 Lattice-theoretical properties	111
6.1 Minimal prime ideals	112
6.2 Stonean ideals and archimedean elements	115
6.3 Hyperarchimedean algebras	116
6.4 Direct products	121
6.5 Boolean products of MV-algebras	124
6.6 Completeness	129
6.7 Atoms and Pseudocomplements	132
6.8 Complete distributivity	134
6.9 Bibliographical remarks	137
7 MV-algebras and ℓ-groups	139
7.1 Inverting the functor Γ	139
7.2 Applications	146
7.3 The radical	150
7.4 Perfect MV-algebras	151
7.5 Bibliographical remarks	156
8 Varieties of MV-algebras	157
8.1 Basic definitions	157
8.2 Varieties from simple algebras	160
8.3 MV-chains of finite rank	161

8.4	Komori's classification	167
8.5	Varieties generated by a finite chain	171
8.6	The cardinality of Free_r^n	173
8.7	Bibliographical remarks	177
9	Advanced topics	179
9.1	McNaughton's theorem	180
9.2	Nonsingular fans and normal forms	185
9.3	Complexity of the tautology problem	187
9.4	MV-algebras and AF C*-algebras	191
9.5	Di Nola's representation theorem	193
9.6	Bibliographical remarks	194
10	Further Readings	197
10.1	More than two truth values	197
10.2	Current Research Topics	199
10.2.1	Product	199
10.2.2	States, Observables, Probability, Partitions	200
10.2.3	Deduction	201
10.2.4	Further constructions	201
Bibliography		203
Index		225
