

Contents

Volume 1	1
Part I Brain	25
1 Brain: Introduction	3
2 Cerebellar Tonsillar Ectopia	5
3 Cerebellar Flocculus Pseudomass	13
4 Mega Cisterna Magna and Retrocerebellar Arachnoid Cysts	19
5 Cranial Nerve VII: Normal Contrast Enhancement on Magnetic Resonance Imaging	43
6 Meckel Cave Prominence, Asymmetry, and Petrous Apex Cephaloceles	59
7 Cavernous Sinus Fat and Pseudomasses	71
8 Pituitary Variations, Artifacts, Primary Empty Sella, and Incidentalomas	89
9 Liliequist Membrane	147
10 Pineal Gland: Normal Size, Appearance, and Enhancement	153
11 Choroid Plexus: Normal Locations and Appearances	177
12 Hippocampi, Caudate Tail, and Ependymal Variants	239
13 Midline Variants of the Septum Pellucidum, Corpus Callosum, and Massa Intermedia	279
14 Dilated Perivascular Spaces	315
15 Enlargement or Asymmetry of the Lateral Ventricle Simulating Hydrocephalus	349
16 Cerebral or Cerebellar Volume Loss Simulating Subdural Hematomas, Hygromas, and Arachnoid Cysts	371
17 Dural Calcifications: Normal Locations and Appearances	391
18 Pseudo-leptomeningeal Contrast Enhancement	413
19 Basal Ganglia: Physiologic Calcifications	427
20 Susceptibility-Weighted Imaging: Concepts, Basal Ganglia Variation in Age-Related Iron Deposition, and Artifacts	441
21 Slow-Flow, Asymptomatic Vascular Malformations: Brain Capillary Telangiectasias and Developmental Venous Anomalies	487

22	Brain MRI Pseudolesions: 3.0 T Imaging, FLAIR, and Diffusion-Weighted Imaging	523
23	Pediatric Brain: Normal Variations in Development, Maturation, and Myelination	597

Volume 2**Part II Skull**

24	Skull: Introduction	747
25	Pediatric Skull: Normal Pediatric Sutures on Computed Tomography	749
26	Skull Base Foramina: Normal Variations and Developmental Defects	769
27	Normal Variations and Developmental Anatomy of the Calvarial Sutures and Fontanelles Above the Skull Base	815
28	Emissary Veins, Vascular-Containing Foramina, and Vascular Depressions of the Skull	859
29	Normal Variations in Calvarial Contour, Irregular Ossification/Aeration, and Inward/Outward Projections/Protuberances	887
30	Other “Don’t Touch” Skull Lesions: Arachnoid Granulations, Calvarial Depressions, Hemangiomas, and Intraosseous Lipomas	923

Part III Craniocervical Vasculature

31	Craniocervical Vasculature: Introduction	949
32	Aortic Arch and Great Vessel Origin Arterial Variants	951
33	Cervical Carotid and Vertebral Arterial Variants	971
34	Tortuous Cervical and Intracranial Arteries and Basilar-Carotid Dolichoectasia	995
35	Miscellaneous Cervical Venous Variants	1023
36	Intracranial Posterior Circulation Variants	1035
37	Intracranial Anterior Circulation Variants	1065
38	Infundibular Outpouchings of Intracranial Arteries	1105
39	Persistent Carotid-Basilar and Carotid-Vertebral Anastomoses	1123
40	Variations in the Intracranial Venous System	1133
41	Arachnoid Granulations Within the Dural Sinuses	1229
42	Artifacts of the Craniocervical Venous System on MRI	1241
43	Artifacts of the Craniocervical Arterial System on MRI	1261
44	Artifacts on Craniocervical CT Angiography	1293
45	Dense Vessels Simulating Thrombosis on Nonenhanced CT	1307
	Index	1321
