

CHASSIS.TECH PLUS SECTION

KEYNOTE LECTURES I

- Chassis design at Porsche – latest developments and challenges for the future** 5
Dr. Manfred Harrer, M. Höll, U. Reuter, Dr. C. Hoffmann,
Dr. Ing. h.c. F. Porsche AG
- 20 years Hyundai Motor Europe Technical Center – the improvement of Hyundai's and Kia's performance to meet customers' expectations** 7
Dr. Moo Sang Kim, Hyundai Motor Europe Technical Center GmbH
- Changing with the times – developing chassis for the future of transportation and customer mobility** 19
Charles J. Klein, Dr. V. Held, Adam Opel AG

KEYNOTE LECTURES II

- All-new NSX chassis technologies deliver a New Sports eXperience** 23
Ted Klaus, Honda R&D Americas, Inc.
- From sports cars to full size SUV's – how does JLR engineer chassis systems to meet this wide range of customer requirements** 25
George Sherrey, Guy Sutton, Jaguar Land Rover Limited, UK
- Test procedure at auto motor und sport – from A to Z** 39
Jochen Albig, Motor Presse Stuttgart GmbH & Co. KG

KEYNOTE LECTURES III

- Bentley Bentayga – chassis development for a luxury SUV** 43
Keith Sharp, S. Clarke, M. Peel, A. Unsworth, B. Moritz,
Bentley Motors Limited, UK
- Steering system solutions today and in the future** 63
Alexander Gaedke, Dr. R. Greul,
Robert Bosch Automotive Steering GmbH
- Future sheer driving pleasure –
making highly automated driving a reality** 65
Reiner Friedrich, BMW Group

PARALLEL STRAND I

NEW CHASSIS SYSTEMS

The all-new PRIUS – creating ever-better chassis

of Toyota New Global Architecture (TNGA)

Katsutoshi Sakata, M. Yamamoto, T. Gennai,

Toyota Motor Corporation, Japan

71

The chassis of the AUDI R8 e-tron

Dr. Karl-Heinz Meitinger, Dr. H. Glaser, AUDI AG

89

Born electric – challenges and potentials

of new chassis concepts using the example of the BMW i8

Reidar Fleck, BMW Group

103

NEW CHASSIS SYSTEMS AND METHODS

Electromechanical active roll control – developing the future

107

Markus Stiegler, D. Reif, R. Beck,

Schaeffler Technologies AG & Co. KG;

Bernhard Schmidt, BMW Group

Resolving conflicts of goals in complex design processes –

125

application to the design of engine mount systems

Dr. Simon Königs, Dr. M. Zimmermann, BMW Group

Optimizing vehicle dynamics by in-house

143

function development

Dr. Florian Fuhr, Dr. M. Harrer, M. Gantikow, J. Weichert,

Dr. Ing. h.c. F. Porsche AG

Benteler-Toe-Correcting-Twistbeam (BTCT) –

159

extended usage of twistbeam axles

Dr. Erik Schultz, W. Linnig, BENTELER Automobiltechnik GmbH

SIMULATION

Efficient MBS modeling of commercial vehicle for vertical dynamics and handling simulations

Tobias Winkler, K. Vemireddy, Prof. Dr. L. Eckstein, Institute for
Automotive Engineering (ika), RWTH Aachen University

Advanced ride simulation framework for ride comfort optimization

Dr. Friedrich Wolf-Monheim, J. Palandri, Dr. P. Zandbergen, B. Reff,
Ford Forschungszentrum Aachen GmbH

Application of stochastic modeling and simulation to vehicle system dynamics

Simon Schmeiler, M. Rowold, Prof. Dr. M. Lienkamp,
Institute of Automotive Technology (FTM), TU Munich;
Dr. F. Chucholowski, TESIS DYNAware Technische Simulation
Dynamischer Systeme GmbH

VEHICLE HANDLING OPTIMIZATION AND CONTROL

Continuous development of steering feel using objective and model-based methods

Dr. Hans-Michael Koegeler, J. Ecker, B. Schick, AVL List GmbH, Austria

New approach for improvement of the vehicle performance by using a simulation-based optimization and evaluation method

Martin Heiderich, Honda R&D Europe (Deutschland) GmbH;
T. Friedrich, Honda Research Institute Europe GmbH; M.-T. Nguyen,
Institute for Internal Combustion Engines and Automotive Engineering
(IVK), University of Stuttgart

Fail-operational chassis for highly and fully automated trucks

Dr. Bastian Witte, Volkswagen AG; Dr. M. Rothhämel, Scania CA AB;
B. Oldemeyer, MAN Truck & Bus AG; Dr. O. Wulf, Dr. R. Otremba,
WABCO Development GmbH; M. Lichtenstein, L. Wülbeck,
tedrive Steering Systems GmbH

Electrification of the torque-vectoring system to improve vehicle driving dynamics

Solmaz Rahimi Fetrati, S. Teufel, Dr. Ing. h. c. F. Porsche AG;
Prof. Dr. D. Schramm, Mechatronics, University of Duisburg-Essen

183

263

279

295

307

CHASSIS.TECH SECTION

CHASSIS ARCHITECTURES

A concept for optimal design of automotive chassis architectures

Paul Tobe Ubben, Dr. J. Haug, Daimler AG; Prof. Dr. D. Bestle, Engineering Mechanics and Vehicle Dynamics, BTU Cottbus-Senftenberg

Electronic chassis platform – highly integrated ECU for chassis control functions

Dr. Jürgen Schuller, M. Buhlmann, A. Juling, Dr. R. Schwarz, S. Schmid, AUDI AG

Partitioning of cross-domain functions

Markus Schweiker, Dr. T. Huck, Robert Bosch GmbH

SIMULATORS

Integration of the real measurement data into the DVRS

Alexander Hafner, A. Sonka, Dr. R. Henze, Prof. Dr. F. Küçükay, Institute of Automotive Engineering (IAE), TU Braunschweig

Designing steering feel dynamics using a real-time steering simulator

Kazuhiko Inaba, M. Kousou, T. Niihara, Showa Corporation, Japan

'auto.mobile-driving simulator' – suspensions design of a wheel-based driving simulator

Thomas Tüschen, F. Kocksch, Dr. D. Beitelschmidt, Prof. Dr. G. Prokop, Institute for Automotive Engineering Dresden (IAD), TU Dresden

367

383

399

411

COMPONENTS OF THE CHASSIS

**The new multi-chamber air spring by Porsche –
future innovation in chassis mechatronics and integration**

Markus Gantikow, E. Boyraz, N. Kallert, R. Legierski,
Dr. Ing. h.c. F. Porsche AG

**Automated computational synthesis
of suspension mechanisms – new design paradigm** 457

Suh In Kim, S. W. Kang, S. M. Han, Prof. Y. Y. Kim Ph.D,
Seoul National University, South Korea; Y.-S. Yi Ph.D, J. Park Ph.D,
Hyundai Motor Company, South Korea

How to improve a 120-year-old machinery element? 475
Dr. Manfred Kraus, Schaeffler Technologies AG & Co. KG

STEERING.TECH SECTION

HIGHLY AUTOMATED DRIVING

- Potential of wheel-individual brake interventions as a backup for steering system failures during automated driving

Andreas Gauger, A. Kern, J. Feinauer, S. Kanngießer, Dr. R. Greul,
Robert Bosch GmbH

- Detection of the driver's hand on and off the steering wheel for ADAS and autonomous driving

Maxime Moreillon, T. Tamura, JTEKT Corporation, Japan;
Dr. R. Fuchs, EU Representative Office of JTEKT R&D Centre,
France

- Steering wheel, the central interface between driver and vehicle in case of autonomous driving

Roland Grimm, A. Meyer-Damcke, TAKATA AG

FUNCTIONAL SAFETY

- Method for providing assist in an electric power steering system without a torque sensor

Anthony Champagne, Tejas Varunjikar, T. Kaufmann,
Nexteer Automotive, USA

- Safety-relevant in-house software development at Ford Steering

Dr. Thorsten Hestermeyer, W. Bongarth, Ford-Werke GmbH

- Simulation support for EPS functional safety validation

Dr. Ádám Varga, I. Szepessy, G. Bohner, Dr. I. Benyó,
ThyssenKrupp Presta Hungary Kft.

547

561

571

STEERING FEEL AND STEER-BY-WIRE

Steering feel in heavy trucks – a driver-oriented approach 575
to evaluate different configurations of steering support
Alisa Boller, K. Striegel, F. Preuß, E. Wohlfarth, Daimler AG

Steering feel design based on the driver's perceived value 595
of steering reaction force

Kimiaki Ono, I. Kushiro, Toyota Motor Corporation, Japan;
D. Yamada, Toyota Central Research
and Development Laboratory, Inc., Japan;
T. Tomita, JTEKT Corporation, Japan

Design of an energy-efficient front axle for a wheel-individual 617
steer-by-wire system illustrated by the SpeedE research vehicle

Benjamin Schwarz, Prof. Dr. L. Eckstein,
Institute for Automotive Engineering (ika), RWTH Aachen University

BRAKE.TECH SECTION

BRAKE DEVELOPMENT METHODS

- Topology optimization of a brake caliper and upright of a race car** 655

Prof. Dr. Giampiero Mastinu, F. Ballo Ph.D, Prof. M. Gobbi Ph.D,
Department of Mechanical Engineering, Politecnico di Milano, Italy;
R. Arienti, C. Cantoni, R. Passoni, Brembo S.p.A., Italy

- Braking circuit simulation on a hardware-in-the-loop test bench – a first step to complete virtual testing** 669

Karl Michael Hahn, S. Lago Places, Adam Opel AG; Dr. M. Alirand,
Siemens Industry Software S.A.S., France

- Braking comfort checks on the inertia dynamometer** 693

Helmut Schlitz, Daimler AG

FUTURE BRAKE SYSTEMS AND TECHNOLOGIES

- MK C1® – Continental's brake system for future vehicle concepts** 717

Roman Büchler, J. Zimmermann, Continental Teves AG & Co. oHG

- Porsche stopping distance performance, an interdisciplinary goal** 725

Lukas Kroh, Dr. Ing. h.c. F. Porsche AG

- Redundancy concepts for brake and CV steering in highly automated commercial vehicles** 757

Dr. Falk Hecker, Knorr-Bremse Systeme für Nutzfahrzeuge GmbH

NEW REQUIREMENTS AND SOLUTIONS IN BRAKE DEVELOPMENT

**New challenges for brake systems in prototype vehicles
targeting highly automated driving**

Kevin Meuer, P. Jöllenbeck, Dr. V. van Lier,
Continental Engineering Services GmbH

761

**Maximization of electric brake torque through hybrid
adaptive model control**

Franz Dahlke, P. Bortolussi, Dr. Ing. h. c. F. Porsche AG;
Prof. Dr. D. Schramm, Mechatronics, University of Duisburg-Essen

777

**New brake system products – with VDA interface ready
for the future**

Dr. Stefan Strengert, T. Spöri, W. Lu, Dr. M. Schwab, N. Hägele,
Robert Bosch GmbH

797

TIRE.WHEEL.TECH SECTION

TIRE TECHNOLOGY AND TRENDS

- Trends and challenges from OEMs to tire development and current implementation strategies**

Alessandra Ferraris, B. Heilmann,
Continental Reifen Deutschland GmbH

819

- The next game-changing innovation in tire technology**

Pierfrancesco Triboulet, Marco del Duca,
Bridgestone Technical Center Europe S.p.A., Italy

833

- Increasing the accuracy of tire performance in vehicle dynamics simulations using tire models parameterized with real road test data**

Christian H. Carrillo Vásquez, Prof. Dr. L. Eckstein,
Institute for Automotive Engineering (ika), RWTH Aachen University

843

SIMULATION

- Methodology for the analysis of tire performance when passing through ruts**

Jan Kubenz, P. Sarkisov, Prof. Dr. G. Prokop,
Institute for Automotive Engineering Dresden (IAD), TU Dresden;
Dr. R. Mundl, Institute for Mechanics and Mechatronics,
TU Vienna, Austria

867

- Simulation of a tire blow-out in a full vehicle scenario**

Francesco Calabrese, Dr. M. Bäcker, A. Gallrein,
Fraunhofer Institute for Industrial Mathematics (ITWM);
Dr. G. Leister, Daimler AG

869

- Improved prediction of tire cornering force and moment by using nonlinear viscoelasticity and transient thermal analysis through explicit FEM**

Jung Chan Cho, J. Y. Huh, Hankook Tire R&D Center, South Korea

899

FUTURE TECHNOLOGY

- Development of ologic™ technology for enhanced adoptability** 903
Isao Kuwayama Ph.D, H. Matsumoto, T. Saguchi,
Bridgestone Corporation, Japan

- New paint layer concepts protecting bright machined light alloy rim surfaces against corrosion** 925
Anne Gailberger, Daimler AG

- Road condition classification using information fusion** 939
Waldemar Jarisa, B. Schönemann, T. Meister, Dr. R. Henze,
Prof. Dr. F. Küçükay, Institute of Automotive Engineering (IAE),
TU Braunschweig; B. Hartmann, Continental AG

SIMULATION

- Modeling for the safety of the pedestrian**
Jens Kupferschmidt, S. Schäfer, R. Hartl, Dr. G. Pöhlod,
Institute for Automotive Engineering Düsseldorf (IAID), TU Düsseldorf
Dr. R. Mundt, Institute for Mechanics and Mechatronics,
TU Vienna, Austria
- Simulation of a roll-over in a full vehicle scenario**
P. Lameiro, C. Silveira, O. M. Basileu, A. G. Gallo,
Fernuniversität Hagen Institut für Mechanik (IMW)
Dr. G. Löffel, Daimler AG

- Improved prediction of the collision force and moment by using nonlinear viscoelasticity and passive restraint displays**
Jung-Chun Cho, T. Y. Huh, Hyunsook Tae R&D Center, Souti Korea
