Introduction to Book Contributions No.3	5
Group IA.: Analysis and modeling of interactions of electromagnetic field with matter focused on modern technologies	9
<i>J. Chvojka, M. Pokorná, D. Lukáš: Woven Fabric Created by Nanofibrous Yarns</i>	11
<i>J. Färberová, D. Lukáš, J. Chaloupek: Special „sieve-like“ Nanofibrous Structure Produced by Electrospinning</i>	17
<i>J. Primas, M. Malík, D. Jašíková, V. Kopecký: Force on a High Voltage Capacitor with Asymmetrical Electrodes</i>	23
<i>M. Košek, M. Truhlář, A. Richter: Magnetic Field of Massive Conductor at Low Frequency</i>	29
<i>L. Vysloužilová, K. Vodsedálková, P. Pokorný, D. Lukáš, M. Buzgo: Needleless Co-axial Electrospinning</i>	37
Group IB.: Analysis and modeling of interactions of electromagnetic field with matter focused on medical and industrial application	43
<i>M. Cifra, J. Pokorný, D. Havelka, O. Kučera: Electric Field Generated by Axial Longitudinal Vibration Modes of Microtubule</i>	45
<i>L. Víšek, J. Vrba: The Whole-body Exposure Chamber for Unrestrained Mice</i>	55
<i>J. Vortlíček: Matrix Composition of Spiral Applicators for Local Thermotherapy</i>	61
<i>B. Vrbová, L. Víšek: Simulation of Hyperthermic Treatment by Using the Matrix of Stripline Applicators</i>	65
<i>T. Vydra, J. Vrba: Visualization of Exposure in Microwave Industrial and Medical Applications</i>	71
Group IIA.: Analysis and measurement of fluxional, thermal and other fields describing reactive transport phenomena	77
<i>D. Jašíková, P. Švarc, V. Dvořák, V. Kopecký: Fluid Velocity and LIF Temperature Measurement in a Real Model of Heat Exchanger</i>	79
<i>M. Kotek: Experimental Study of Impinging Flow Generated by Synthetic Jets Actuators</i>	87
Group IIB.: Computational modeling of fluxional, thermal and other fields describing reactive transport phenomena	93
<i>H. Baarová: Evaluation of well tests using radial composite model and Dietz shape factor for irregular drainage area</i>	95
<i>Š. Klímková, M. Černík, L. Lacinová, J. Filip, D. Jančík, R. Zbořik: Zero-valent Iron Nanoparticles in Treatment of Acid Mine Water from In-situ Uranium Leaching</i>	101
<i>J. Kopal, M. Trůma, M. Rozložník: Analysis of Algebraic Preconditioning Based on Different Variants of the Gram-Schmidt Algorithm</i>	103
<i>D. Rosická, J. Šembera: Assessment of Influence of Magnetic Forces on Aggregation of Zero-valent Iron Nanoparticles</i>	109

<i>I. Škarydová, M. Hokr: Modelling of Tunnel Inflow With Coupled 3D Groundwater and 2D Surface Flow Concept</i>	115
<i>L. Zedek, J. Šembera: Inclusion of Chemical Reactions into the Ground- water Transport Simulation</i>	121
