

## CONTENTS

ACKNOWLEDGEMENTS .....	1
EXTENDED SUMMARY .....	2
1 INTRODUCTION .....	4
1.1 Background .....	4
1.2 Objectives and Scope of the Study.....	5
1.2.1 General Objectives .....	5
1.2.2 Specific Objectives .....	5
1.2.3 Scope of the Work.....	5
1.3 Location and Areal Extent .....	6
1.4 Accessibility .....	8
1.5 Population and Settlement .....	8
1.6 Water Demand .....	10
1.7 Previous Works .....	11
1.8 Methodologies and Procedures .....	12
2 PHYSIOGRAPHY, VEGETATION, LAND USE AND COVER AND SOIL .....	14
2.1 Physiography .....	14
2.2 Vegetation.....	15
2.3 Land Use and Land Cover .....	16
2.4 Soil.....	18
3 HYDROMETEOROLOGY.....	21
3.1 Climatic Characteristics .....	21
3.2 Precipitation .....	22
3.3 Temperature .....	26
3.4 Sunshine Hours .....	29
3.5 Wind Speed .....	30
3.6 Relative Humidity (RH) .....	31
3.7 Potential Evapotranspiration (PET/ET <sub>0</sub> ).....	32
4 HYDROLOGY .....	33
4.1 Drainage of the Abby (Blue Nile) Basin .....	33
4.2 Lakes.....	33
4.3 River Flow Regime .....	34
4.5 Baseflow .....	35
5 GEOLOGY.....	38
5.1 Regional Geology.....	38
5.2 Stratigraphy.....	38
5.3 Lithology.....	40
5.3.1 Precambrian Basement Rocks.....	41
5.3.1.1 High Grade Metamorphic Rocks (Dura Domain).....	41
5.3.1.2 Low Grade Metamorphic Rocks (Shar Domain) .....	42

5.3.1.3 Precambrian Intrusive Rocks .....	44
5.3.2 Palaeozoic - Mesozoic Sedimentary Rocks .....	45
5.3.2.1 Palaeozoic (Glacial) Sediments (Plst).....	45
5.3.2.2 Mesozoic Sediments (Lower Sandstone) (Msst) .....	45
5.3.3 Cenozoic Volcanic Rocks .....	46
5.3.3.1 Lower Basalt (Tlb).....	47
5.3.3.2 Upper Basalt (Tub) .....	47
5.3.3.3 Agglomerate (Tag).....	47
5.3.3.4 Trachytic Flows and Plugs (Tty) .....	48
5.3.3.5 Pyroclastic Rocks (Scoria Cones and Crater Rims) (Qv1).....	48
5.3.3.6 Thin Scoriaceous Basalt Flows (Qv2) .....	48
5.3.4 Recent (Quaternary) Sediments.....	49
5.3.4.1 Eluvial Soil (Qel).....	49
5.3.4.2 Alluvial Soil (Qal) .....	49
5.4 Structures .....	49
6 HYDROGEOLOGY .....	51
6.1 General.....	51
6.2 Hydrogeological Characterization .....	52
6.3 Elements of Hydrogeological System (Aquifers and Aquitards).....	53
6.3.1 Limited Aquifers in Unconsolidated Material with Dominantly Eluvial Origin.....	54
6.3.2 Minor and Highly Productive Fissured and Karstic Aquifers .....	55
6.3.3 Extensive and Moderately Productive Fissured Aquifers.....	57
6.3.4 Extensive and Low Productive Fissured Aquifers Developed in Basement Rocks.....	60
6.3.5 Aquitards and/or Minor Fissured Aquifers with Local and Limited Groundwater Resources.....	61
6.4 Groundwater Points .....	62
6.4.1 Springs.....	62
6.4.2 Boreholes .....	63
6.4.3 Dug Wells .....	63
6.4.4 Lakes.....	63
6.5 Groundwater Flow, Recharge, Discharge – Hydrogeological Conceptual Model .....	64
6.5.1 Groundwater Flow .....	64
6.5.2 Groundwater Recharge .....	65
6.5.3 Groundwater Discharge .....	65
6.6 Hydrogeological Conceptual Model .....	65
7 HYDROCHEMISTRY .....	66
7.1 General Characteristics .....	66
7.2 Major Constituents .....	66
7.3 Classification and Graphical Presentation.....	67
7.4 Water Quality .....	73
7.4.1 Temperature .....	73

7.4.2 The pH .....	74
7.4.3 Hardness.....	75
7.4.4 Electrical Conductivity (EC) and Total Dissolved Solids (TDS) .....	76
7.5 Water Quality Standards .....	79
7.5.1 Drinking Water Quality.....	79
7.5.2 Irrigation Water Quality .....	81
7.5.3 Industrial Water Quality.....	83
7.5.4 Water Treatment .....	85
8 GROUNDWATER RESOURCES ASSESSMENT AND DEVELOPMENT PERESPECTIVE.....	86
8.1 Water Resources .....	86
8.2 Groundwater Resources Development Perspective .....	87
8.3 Recommended Sites for Well Siting .....	88
9 TOURIST ATTRACTION SITES .....	90
10 CONCLUSTIONS AND RECOMMENDATATIONS .....	92
10.1 Conclusions .....	92
10.2 Recommendations .....	92
REFERENCE.....	94
