

Contents

1	Orientation	1
1.1	Preview	2
1.2	Background	9
2	Structure of an Urban Area	12
2.1	General Structure of Systems	12
	Closed-System Boundary	12
	Feedback-Loop Structure	13
2.2	Structure of the Urban Model	14
	Boundary of the Urban System	14
	The Environment as a Point of Reference	17
	Relative Attractiveness	18
	The Internal System	19
2.3	Example of a Flow Rate	20
2.4	Example of a Level	30
2.5	Summary of Flow Rates	31
	Underemployed Birth Rate UB	31
	Labor to Underemployed LTU	31
	Underemployed to Labor UTL	32
	Underemployed Departures UD	32
	Labor Birth Rate LB	32
	Labor Arrivals LA	32
	Labor Departures LD	32
	Labor to Manager LTM	33
	Managerial-Professional Birth Rate MPB	33
	Manager Arrivals MA	33
	Manager Departures MD	33
	Premium-Housing Construction PHC	33
	Premium-Housing Obsolescence PHO	34
	Worker-Housing Construction WHC	34
	Worker-Housing Obsolescence WHO	35
	Low-Cost-Housing Program LCHP	35
	Slum-Housing Demolition SHD	35
	New-Enterprise Construction NEC	35
	New-Enterprise Decline NED	35

Mature-Business Decline MBD	36	
Declining-Industry Demolition DID	36	
2.6 Parameters in the Simulation Model	36	
3 Growth and Stagnation		38
4 Failures in Urban Programs		51
4.1 Job Program	51	
4.2 Training Program	57	
4.3 Financial Aid	61	
4.4 Low-Cost-Housing Construction	65	
5 Urban Revival		71
5.1 Worker-Housing Construction	71	
5.2 Premium-Housing Construction	77	
5.3 New-Enterprise Construction	79	
5.4 Declining-Industry Demolition	81	
5.5 Slum-Housing Demolition	83	
5.6 Discouraging Housing Construction	91	
5.7 Encouraging Industry	101	
5.8 Preventing Urban Decline	105	
6 Notes on Complex Systems		107
6.1 Nature of Complex Systems	107	
6.2 Counterintuitive Behavior	109	
6.3 Insensitivity to Parameter Changes	110	
6.4 Resistance to Policy Changes	110	
6.5 Control Through Influence Points	111	
6.6 Corrective Programs Counteracted by the System	111	
6.7 Long-Term Versus Short-Term Response	112	
6.8 Drift to Low Performance	112	
6.9 On Modeling	112	
A Model	112	
Model Validity	113	
Modeling to Create Symptoms	113	
Adequacy of Information	113	
7 Interpretations		115
An Implicit Goal	115	
7.1 Outside the City	115	
7.2 The City in Its Environment	116	
Urban Evolution	116	
The Limitless Environment	117	
The Attractiveness Concept	117	
The Stagnant Urban Condition	118	
Soaring Municipal Costs	119	
7.3 Alternatives Open to the City	119	
7.4 Maintaining Economic Balance	122	
Kinds of Industry	123	
Taxes	123	
Land Zoning	125	

7.5	Choice of Urban Pressures	126
	Urban Transportation	127
7.6	The City—Master of Its Own Destiny	128
APPENDIXES		131
A	The Model—A Theory of Urban Interactions	133
A.1	Underemployed Sector	133
A.2	Labor Sector	147
A.3	Managerial-Professional Sector	164
A.4	Premium-Housing Sector	170
A.5	Worker-Housing Sector	179
A.6	Underemployed-Housing Sector	186
A.7	New-Enterprise Sector	189
A.8	Mature-Business Sector	195
A.9	Declining-Industry Sector	198
A.10	Tax Sector	201
A.11	Job Sector	206
A.12	Urban-Development Programs	211
A.13	Simulation-Control Instructions	215
A.14	The Equilibrium Model	216
B	Miscellaneous	218
B.1	Political Power	218
B.2	Negative Income Tax	223
B.3	Parameter Sensitivity	227
	Insensitive Parameters	231
	Policy Not Affected	231
	Reducing Sensitivity of Parameters	235
	Policy Affected by Parameters	236
B.4	Normal Population Densities	241
B.5	Improvement in External Environment	249
B.6	Mechanization of Agriculture	253
C	Definitions of Terms	261
D	Analyzer Tabulation	267
E	Model Equations	274
	References	281
	Index	283
