<b>Historical introduction</b> (I. Varga, Š. Polák)	15
<b>1. Methods of study</b> (E. Mechírová)	19
1.1. Light microscopy	19
1.1.1. Instructions for the use of a light microscope	19
1.2. Types of microscopes	20
1.2.1. Phase contrast microscopy	20
1.2.2. Confocal microscopy	21
1.2.3. Polarizing microscopy	21
1.2.4. Fluorescence microscopy	21
1.2.5. Electron microscopy	22
1.3. Preparation of tissues for microscopic examination	23
1.3.1. Sampling	23
1.3.2. Fixation	24
1.3.3. Embedding	25
1.3.4. Sectioning	25
1.3.5. Staining	26
1.3.5.1. H&E staining method	26
1.3.6. Mounting in resin	27
1.4. Histochemical methods	27
1.4.1. Demonstration of polysaccharides and glycogen by PAS reaction	27
1.4.2. Demonstration of lipids	27
1.4.3. Demonstration of enzymes	28
1.5. Immunohistochemical methods	28
1.5.1. Target antigen detection methods	29
1.5.1.1. Direct method	29
1.5.1.2. Indirect method	29
1.6. References	30
<b>2. Functional cytology</b> (O. El Hassoun, J. Rajčáni, M. Adamkov)	31
2.1. Introduction	31
2.2. Cell structure	31
2.2.1. Surface membrane	31
2.2.2. Cytosol	32

2.2.3. Nucleus	32
2.2.4. Ribosomes	33
2.2.5. Mitochondria	33
2.2.6. Endoplasmic reticulum (ER)	34
2.2.7. Golgi apparatus	35
2.2.8. Lysosomes	36
2.2.9. Peroxisomes	37
2.2.10. Cytoskeleton	37
2.2.11. Inclusion bodies	38
2.3. Cell division	39
2.3.1. Mitosis	39
2.4. Cell differentiation	40
2.5. Apoptosis	41
2.6. Organelles and disease	42
2.7. Biological membranes	42
2.8. Cellular transport	45
2.8.1. Vesicular traffic	46
2.8.2. Exocytosis	46
2.8.3. Endocytosis	47
2.8.4. Transcytosis	47
2.9. Cell communication	47
2.9.1. Reception	49
2.9.2. Transduction	50
2.9.3. Response	50
2.10. Methods and history of cell research	51
2.11. Summary	59
2.12. References	60
<b>3. Epithelial tissue (L. Bošelová, M. Adamkov)</b>	61
3.1. Introduction	61
3.2. General characteristic and function of epithelial tissue	61
3.2.1. Characteristic of epithelial tissue	61
3.2.2. Functions of epithelial tissue	62
3.3. Structure and organization of epithelial tissue	63
3.3.1. Epithelial cell polarity	63
3.3.1.1. Apical domain and its modifications	63
3.3.1.2. Lateral domain and its specializations	64

3.3.1.3. Basal domain and its specializations	66
3.3.2. Basement membrane – structure and function	66
3.3.3. Classification of epithelium	67
3.3.3.1. Covering epithelia	67
3.3.3.2. Glandular epithelium	72
3.4. Renewal of epithelial cells	75
3.5. References	76
<b>4. Connective tissue (E. Ochodnická)</b>	77
4.1. Components of connective tissue	77
4.1.1. Connective tissue cells	77
4.1.2. Connective tissue fibers	82
4.1.3. Ground substance of connective tissue	85
4.2. Classification of connective tissue	86
4.2.1. Embryonic connective tissue	87
4.2.2. Connective tissue proper	87
4.2.3. Specialized connective tissue	89
4.2.4. Skeletal tissue	91
4.2.4.1. Cartilage	92
4.2.4.2. Bone	97
4.3. References	105
<b>5. Muscle tissue (I. Domoráková)</b>	107
5.1. Embryonic origin	107
5.2. Regeneration of muscle tissue	107
5.3. Special terminology in muscle tissue	108
5.4. Skeletal muscle	108
5.4.1. Organization of skeletal muscles	108
5.4.2. Histology and ultrastructure of skeletal muscle fiber	109
5.4.2.1. Light microscopic structure	109
5.4.2.2. Electron microscopic structure	110
5.4.2.3. Myofibrils	111
5.4.2.4. Myofilaments	112
5.4.3. Contraction of skeletal muscle	114
5.4.4. Skeletal muscle innervation	115
5.5. Cardiac muscles	116
5.5.1. Light microscopic structure of cardiac cells	116
5.5.2. Electron microscopic structure	117

5.5.3. Structure and function of intercalated discs	118
5.6. Smooth muscle	119
5.6.1. Structure in the light microscope	119
5.6.2. Structure in the electron microscope	119
5.6.3. Function of smooth muscle cells	121
5.6.4. Mechanism of contraction	121
5.7. References	122
<b>6. Nerve tissue (E. Mechírová)</b>	123
6.1. Neurons	123
6.1.1. Shape of neurons	123
6.1.2. Classification of neurons according their function	124
6.2. Morphological characteristic of nerve cell	125
6.2.1. Dendrites	125
6.2.2. Cell body	125
6.2.3. Axon	126
6.2.4. Designation of groups of neurons and axons	127
6.3. Synapses	127
6.3.1. Neurotransmitters	129
6.3.2. Functional characteristic of synapse	130
6.4. Neuroglial cells	131
6.4.1. Neuroglial cells in CNS	131
6.4.1.1. Oligodendrocytes	131
6.4.1.2. Astrocytes	132
6.4.1.3. Ependymal cells	132
6.4.1.4. Microglial cells	133
6.4.2. Neuroglial cells in PNS	133
6.4.2.1. Schwann cells	134
6.4.2.2. Satellite cells	134
6.5. Myelin sheath	134
6.6. References	136
<b>7. Circulatory system (E. Fuseková, M. Adamkov)</b>	137
Anatomy introduction (S. Rybárová)	137
7.1. Heart	138
7.1.1. General structure of the heart wall	138
7.1.1.1. Endocardium	138
7.1.1.2. Myocardium	139

7.1.1.3. Pericardium	139
7.1.2. Cardiac fibrous skeleton	140
7.1.3. Valves of the heart	140
7.1.4. Impulse-conducting system of the heart	141
7.2. Components and functions of the circulatory system	142
7.2.1. Cardiovascular system	142
7.2.2. Lymphatic vascular system	143
7.2.3. Blood vessels	143
7.2.3.1. Arteries	144
7.2.3.2. Capillaries	149
7.2.3.3. Veins	150
7.2.4. Lymphatic vessels	153
7.3. References	154
<b>8. Bone marrow (M. Adamkov)</b>	156
8.1. BM structural components	156
8.1.1. Blood vessels and nerves	156
8.1.2. Reticulum cells and fibres	157
8.1.3. Fat cells	157
8.1.4. Hematopoietic cells	158
8.1.5. Lymphoid cells	159
8.2. BM cellularity	159
8.3. References	161
<b>9. Blood (M. Miko, I. Varga)</b>	163
9.1. Development of blood elements	165
9.2. Erythrocytes	166
9.3. Leukocytes	169
9.3.1. Granulocytes	170
9.3.1.1. Neutrophils	170
9.3.1.2. Eosinophils	171
9.3.1.3. Basophils	172
9.3.2. Agranulocytes	173
9.3.2.1. Monocytes	173
9.3.2.2. Lymphocytes	174
9.4. Myelopoiesis	175
9.5. Lymphopoiesis	176
9.6. Thrombocytes (platelets)	177

9.7. Blood smear (blood film examination)	178
9.8. References	179
<b>10. Skin</b> (M. Adamkov)	181
Anatomy introduction (S. Rybárová)	181
10.1. Skin consists of three main layers firmly attached to one another	182
10.1.1. Epidermis	182
10.1.1.1. Stratum basale (basal layer)	182
10.1.1.2. Stratum spinosum (prickle cell layer)	183
10.1.1.3. Stratum granulosum (granular layer)	183
10.1.1.4. Stratum lucidum	184
10.1.1.5. Stratum corneum (cornified layer)	184
10.2. Nonkeratinocytes in the epidermis	185
10.2.1. Langerhans cells	185
10.2.2. Melanocytes	185
10.2.3. Merkel cells	186
10.3. Dermis	186
10.3.1. Papillary layer	187
10.3.2. Reticular layer	187
10.4. Hypodermis	187
10.5. Skin appendages	187
10.5.1. Sweat glands	187
10.5.2. Apocrine sweat glands	187
10.5.3. Eccrine sweat glands	188
10.5.4. Sebaceous glands	188
10.5.5. Hair	188
10.5.6. Nail	189
10.6. Wound healing (skin)	189
10.6.1. Wound contraction	189
10.6.2. Repair	190
10.6.3. Regeneration	191
10.7. References	193
<b>11. Breast</b> (M. Adamkov)	195
Anatomy introduction (S. Rybárová)	195
11.1. Nipple and areola	196
11.2. Resting (nonsecreting, non-pregnant woman of reproductive age) mammary gland	196

11.3. Mammary gland during pregnancy	196
11.4. Lactating mammary gland	197
11.5. References	198
<b>12. Endocrine system</b> (E. Fuseková, S. Báilentová, M. Adamkov)	200
Anatomy introduction (S. Rybárová)	200
12.1. Pituitary gland (Hypophysis cerebri)	201
12.1.1. Blood supply of pituitary gland	202
12.1.2. Microscopic structure of the hypophysis	203
12.1.2.1. Adenohypophysis	203
12.1.2.2. Neurohypophysis	206
12.1.3. Hypothalamohypophyseal tract	206
12.2. Pineal gland	208
12.3. Thyroid gland	209
12.3.1. Synthesis of thyroid hormones	210
12.4. Parathyroid glands	212
12.5. Islets of Langerhans	212
12.6. Adrenal glands	214
12.6.1. Blood supply	216
12.7. Endocrine cells in gastrointestinal tract	218
12.8. Testes	218
12.9. Ovaries	218
12.10. Kidneys	219
12.11. Placenta	219
12.12. References	219
<b>13. Respiratory system</b> (E. Ochodnická)	221
Anatomy introduction (S. Rybárová)	221
13.1. Air conducting portion	222
13.1.1. Nasal cavities	222
13.1.2. Pharynx	224
13.1.3. Larynx	225
13.1.4. Trachea	226
13.1.5. Bronchi	228
13.1.6. Bronchioles	228
13.2. Respiratory portion of the lung	229
13.3. Pleura	232
13.4. References	234

<b>14. Digestive system (alimentary canal) (Ľ. Bošelová, M. Adamkov)</b>	235
Anatomy introduction (S. Rybárová)	235
14.1. General structure of the digestive tube	236
14.2. Functions of the digestive tube	238
14.3. Histological structure	239
14.3.1. Oral cavity	239
14.3.1.1. Lips	240
14.3.1.2. Palate	240
14.3.1.3. Tongue	240
14.3.1.4. Teeth	243
14.3.1.5. Pharynx	246
14.3.2. Esophagus	246
14.3.3. Stomach	249
14.3.3.1. Cardia	253
14.3.3.2. Fundus and body	253
14.3.3.3. Pylorus	253
14.3.4. Small intestine	254
14.3.5. Large intestine	260
14.3.5.1. Rectum and anal canal	261
14.3.5.2. Appendix	263
14.4. Cell renewal in the alimentary canal	263
14.5. References	264
<b>15. Glands associated with digestive system (I. Domoráková)</b>	265
15.1. Salivary glands	265
15.1.1. Minor salivary glands	265
15.1.2. Major salivary glands	265
15.1.3. Function of the salivary glands	265
15.1.4. Structure of the salivary glands	266
15.1.5. Development of the salivary glands	269
15.2. Liver	270
15.2.1. Structure of the liver	270
15.2.2. Blood supply	272
15.2.3. Morphologic and functional units of the liver	273
15.2.4. Biliary tract and gallbladder	275
15.2.5. Development of the liver	276
15.3. Pancreas	276

15.3.1. Structure and function of exocrine portion	277
15.3.2. Structure and function of endocrine portion	278
15.3.3. Development of the pancreas	279
15.4. References	279
<b>16. Lymphatic tissue and organs</b> (Š. Polák, I. Varga)	280
Anatomy introduction (S. Rybárová)	280
16.1. Overview of the cells of lymphatic system	280
16.2. Mononuclear phagocytic system	283
16.3. Overview of the organs of lymphatic system	284
16.4. Diffuse lymphatic tissue and lymphatic nodules	285
16.4.1. Mucosa-associated lymphatic tissue	285
16.4.2. Primary and secondary lymphatic nodules	286
16.4.3. Tonsils	287
16.5. Spleen (lien, splen)	289
16.5.1. Introduction into histology of the spleen	289
16.5.2. Functional overview of the spleen	290
16.5.3. Microscopic structure of the spleen	291
16.5.4. Blood microcirculation in the spleen	293
16.6. Lymph node (nodus lymphaticus, lymphonodus)	296
16.6.1. Introduction into histology of the lymph nodes	296
16.6.2. Functional overview of lymph nodes	297
16.6.3. Microscopic structure of lymph nodes	297
16.6.4. Blood and lymph circulation in lymph nodes	298
16.7. Thymus gland (thymus)	299
16.7.1. Introduction into histology of the thymus	299
16.7.2. Functional overview of the thymus	300
16.7.3. Microscopic structure of the thymus	301
16.7.4. Thymic microenvironment	302
16.7.5. Blood-thymus barrier	305
16.7.6. Unique features of thymus	305
16.8. References	307
<b>17. Urinary system</b> (E. Ochodnická)	310
Anatomy introduction (S. Rybárová)	310
17.1. Kidney	311
17.1.1. Nephron	312
17.1.2. Collecting tubules and collecting ducts	319

17.1.3. Blood supply	321
17.2. Urinary passages	322
17.2.1. Ureters	322
17.2.2. Urinary bladder	323
17.2.3. Urethra	323
17.2.3.1. Male urethra	323
17.2.3.2. Female urethra	324
17.3. References	324
<b>18. Male reproductive system (S. Báľentová, M. Adamkov)</b>	326
Anatomy introduction (S. Rybárová)	326
18.1. Testes and scrotum	327
18.1.1. Seminiferous tubules	329
18.1.2. Spermatocytogenesis and meiosis	330
18.1.3. Spermogenesis	331
18.1.4. Spermatozoon	332
18.1.5. Sertoli cells	333
18.1.6. Interstitial tissue and Leydig cells	334
18.1.7. Semen	335
18.1.8. Intratesticular ducts	335
18.2. Extratesticular ducts	337
18.2.1. Epididymis	337
18.2.2. Vas deferens	338
18.2.3. Ejaculatory ducts	339
18.3. Accessory glands	339
18.3.1. Seminal vesicle	339
18.3.2. Prostate	340
18.3.3. Bulbourethral glands	341
18.4. Penis	342
18.4.1. Erection, ejaculation and detumescence	342
18.5. References	343
<b>19. Female reproductive system (M. Adamkov, I. Varga)</b>	345
Anatomy introduction (S. Rybárová)	345
19.1. Ovaries	346
19.1.1. Ovarian follicles	346
19.1.2. Ovulation	348
19.1.3. Corpus luteum	349

19.1.4. Corpus albicans	349
19.2. Uterus	350
19.2.1. Endometrium	350
19.2.2. Myometrium	351
19.2.3. Uterine serosa or adventitia	351
19.2.4. Menstrual cycle	352
19.2.5. Cervix	353
19.3. Uterine tube (Fallopian tube, oviduct)	354
19.3.1. Introduction into histology of uterine tube	354
19.3.2. Structure of uterine tube epithelium and sperm capacitation	356
19.3.3. Functional overview of uterine tube	358
19.4. Vagina	360
19.4.1. Introduction into functional histology of vagina	360
19.4.2. Vaginal epithelium	361
19.5. Female external genitalia	362
19.5.1. Labia majora and minora	362
19.5.2. Functional histology of clitoris	363
19.5.3. Vestibule and vestibular glands	363
19.6. Placenta and umbilical cord	364
19.6.1. Formation of placenta	364
19.6.2. Microscopic structure of mature placenta	368
19.6.3. Placental barrier	370
19.6.4. Functional overview of placenta	370
19.6.5. Anomalies of the placenta	372
19.6.6. Microscopic structure of umbilical cord	373
19.7. References	374
<b>20. Nervous system (Š. Tóth)</b>	376
Anatomy introduction (S. Rybárová)	376
20.1. General morphological and functional features of the nervous system	378
20.2. Central nervous system	379
20.2.1. Spinal cord	380
20.2.1.1. Structure of the spinal cord	380
20.2.1.2. Laminae of Rexed	381
20.2.1.3. Neurons of the spinal cord	382

20.2.2. Cerebellum	384
20.2.2.1. Structure of the cerebellum	384
20.2.3. Brain	387
20.2.3.1. Types and cytoarchitecture of neurons in the cerebral cortex	388
20.2.3.2. Layers of the isocortex	390
20.2.4. Meninges	393
20.2.5. Blood-Brain Barrier	394
20.2.6. Choroid plexus	396
20.3. Peripheral nervous system	397
20.3.1. Nerves	397
20.3.1.1. Types of nerve fibers in peripheral nerves	399
20.3.1.2. Classification of nerve fibers in relation to the CNS	399
20.3.1.3. Classification of peripheral nerves	399
20.3.2. Ganglia	399
20.3.2.1. Sensory ganglia	400
20.3.2.2. Autonomic ganglia	401
20.3.2.3. Enteric ganglia	401
20.3.3. Nerve endings	401
20.3.3.1. Sensory endings – receptors	402
20.4. References	405
<b>21. Special senses (E. Fuseková, L. Bošelová, S. Báľentová, M. Adamkov)</b>	<b>407</b>
21.1. Eye	407
21.1.1. Tunica fibrosa	408
21.1.2. Tunica vasculosa	410
21.1.3. Tunica nervosa	414
21.1.4. Chambers of eye	417
21.1.5. Accessory structures of the eye	418
21.1.5.1. Conjunctiva	418
21.1.5.2. Eyelid	418
21.1.5.3. Lacrimal apparatus	420
21.2. Ear – Vestibulocochlear apparatus	422
21.2.1. Inner ear	423
21.2.1.1. Bony labyrinth	424
21.2.1.2. Membranous labyrinth	424

21.3. Sense of smell (olfaction, olfactory perception)	429
21.4. References	431
<b>22. Apoptosis (M. Adamkov)</b>	<b>433</b>
22.1. Morphology of apoptosis	434
22.2. Mechanisms of apoptosis	435
22.2.1. Intrinsic or mitochondrial pathway of apoptosis	436
22.2.2. Extrinsic or death receptor pathway	437
22.3. Caspases	437
22.4. Phagocytosis of apoptotic cells and bodies	437
22.5. References	439
