|---------------------|----------|
| Introduction | 1 |
|---------------------|----------|

PART 1

| | |
|---|----------|
| Construction of knowledge in classroom interaction | 9 |
|---|----------|

| | |
|--|-----------|
| 1 The nested epistemic actions model for abstraction in context | 11 |
|--|-----------|

BARUCH B. SCHWARZ, TOMMY DREYFUS AND
RINA HERSHKOWITZ

| | |
|---|-----------|
| 2 The construction of physics knowledge in the classroom from different perspectives: the classroom as a community and the students as individuals | 42 |
|---|-----------|

ANDRÉE TIBERGHIEU AND LAYAL MALKOUN

| | |
|---|-----------|
| 3 Technology-based algebra learning: epistemological discontinuities and curricular implications | 56 |
|---|-----------|

MICHAEL YERUSHALMY

| | |
|---|-----------|
| 4 Toward a dialogical approach to learning | 65 |
|---|-----------|

KAI HAKKARAINEN AND SAMI PAAVOLA

| | |
|--|-----------|
| 5 Commentary on the chapters on the construction of knowledge | 81 |
|--|-----------|

IVY KIDRON AND JOHN MONAGHAN

PART 2

| | |
|--|-----------|
| The role of the teacher in the transformation of knowledge in classroom interaction | 91 |
|--|-----------|

| | |
|---|-----------|
| 6 Expert support for group work in elementary science: the role of consensus | 93 |
|---|-----------|

CHRISTINE HOWE

| | | |
|-------------------|---|------------|
| 7 | Guided construction of knowledge in the classroom: the troika of talk, tasks and tools | 105 |
| | RICHARD SOHMER, SARAH MICHAELS, M. G. O'CONNOR AND LAUREN RESNICK | |
| 8 | Implementing technology-facilitated collaboration and awareness in the classroom: roles for teachers, educational researchers and technology experts | 130 |
| | H. ULRICH HOPPE, REUMA DE GROOT AND RAKHELI HEVER | |
| PART 3 | | |
| | The role of argumentation and dialogue in transformation of knowledge | 143 |
| 9 | Intersubjective and intrasubjective rationalities in pedagogical debates: realizing what one thinks | 145 |
| | MICHAEL BAKER | |
| 10 | Transformation of robust misconceptions through peer argumentation | 159 |
| | CHRISTA S. C. ASTERHAN AND BARUCH B. SCHWARZ | |
| 11 | Commentary on the chapters by Baker and Asterhan and Schwarz through the lens of commognition | 173 |
| | ANNA SFARD | |
| 12 | A dialogue on dialogue and its place within education | 184 |
| | RUPERT WEGERIF, PAOLO BOERO, JERRY ANDRIESSEN AND ELLICE FORMAN | |
| PART 4 | | |
| | Methodologies for studying transformation of knowledge in classroom interaction | 201 |
| 13 | A methodological framework and empirical techniques for studying the travel of ideas in classroom communities | 203 |
| | GEOFFREY B. SAXE, MARYL GEARHART, MEGHAN SHAUGHNESSY, DARRELL EARNEST, SARAH CREMER, YASMIN SITABKHAN, LINDA PLATAS AND ADENA YOUNG | |

-
- 14 **A design research perspective on the identities that students are developing in mathematics classrooms** 223
PAUL COBB, MELISSA GRESALFI AND LYNN LIAO HODGE
- 15 **Methodological considerations for the study of intersubjectivity among participants of a dialogic mathematics classroom** 244
MITCHELL J. NATHAN, SUYEON KIM AND BILLIE EILAM
- 16 **Comparing and contrasting methodologies: a commentary** 261
ANGELIKA BIKNER-AHSBAHS AND GAYE WILLIAMS

PART 5

General reflections on transformation of knowledge in classroom interaction 271

- 17 **Contour lines between a model as a theoretical framework and the same model as methodological tool** 273
RINA HERSHKOWITZ
- 18 **Learning in schools: a dialectical materialistic, cultural-historical activity-theoretic perspective** 281
WOLFF-MICHAEL ROTH
- 19 **Sociogenesis and cognition: the struggle between social and cognitive activities** 302
STEN LUDVIGSEN

Index 319
