

# Table of contents

<b>1</b>	<b>Introduction</b>	<b>7</b>
<b>2</b>	<b>Preliminaries</b>	<b>9</b>
2.1	Continuous and discrete theory of regular and rapid variation . . . . .	9
2.2	Essentials on time scales . . . . .	12
2.3	Half-linear dynamic equations on time scales . . . . .	15
2.4	$q$ -calculus and theory of $q$ -difference equations . . . . .	19
<b>3</b>	<b>Regular and rapid variation on time scales with applications to dynamic equations</b>	<b>23</b>
3.1	Theory of regular variation on time scales . . . . .	23
3.2	Theory of rapid variation on time scales . . . . .	33
3.3	Applications to dynamic equations on time scales . . . . .	41
3.4	$\mathbb{M}$ -classification and Karamata functions . . . . .	54
3.5	Concluding comments and open problems . . . . .	59
<b>4</b>	<b><math>q</math>-regular and <math>q</math>-rapid variation with applications to <math>q</math>-difference equations</b>	<b>63</b>
4.1	Theory of $q$ -regular variation . . . . .	63
4.2	Theory of $q$ -rapid variation . . . . .	68
4.3	Applications to $q$ -difference equations . . . . .	71
4.4	Concluding comments and $\mathbb{M}_q$ -classification . . . . .	81
<b>5</b>	<b>Conclusion</b>	<b>85</b>
	<b>References</b>	<b>87</b>
