	Annex II: Acronyms, abbreviations and chemical compounds	619
	Annex III: List of contributors	691
	Annex IV: List of reviewers	745
	Index	809

The preparation of an IPCC Assessment Report is a complex and absorbing process. We would like to express our gratitude to the Technical Support Unit for its massive organizational efforts. We would also like to thank the IPCC Secretariat for its dedication to the efficient completion of the report.

We express our appreciation to the Government of the Netherlands which hosted the Technical Support Unit; the Government of the Netherlands which hosted the plenary session for the approval of the report; the Governments of China, Germany, New Zealand and Peru, who hosted the Lead Authors' meetings; and to all the countries that supported IPCC work through financial and logistic support.

We wish to sincerely thank Dr Rajendra K. Pachauri, Chairman of the IPCC, for his steady and discreet guidance and support. We also express our deep gratitude to Drs Ogeziade Davidson and Bert Metz, Co-Chair of Working Group III, who successfully led their team in this positive, efficient and constructive direction.

M. Jarraud
