Part I: The Litany

| | |
|--|----|
| 1 Things are getting better | 3 |
| The Litany | 3 |
| Things are better – but not necessarily good | 4 |
| Exaggeration and good management | 5 |
| Fundamentals: trends | 5 |
| Fundamentals: global trends | 6 |
| Fundamentals: long-term trends | 8 |
| Fundamentals: how is it important? | 9 |
| Fundamentals: people | 11 |
| Reality versus myths | 12 |
| Reality: Worldwatch Institute | 13 |
| Reality: World Wide Fund for Nature | 16 |
| Reality: Greenpeace | 17 |
| Reality: wrong bad statistics and economics | 18 |
| Reality: water problems | 19 |
| Reality: Pimentel and global health I | 21 |
| Reality: Pimentel and global health II | 24 |
| Reality versus rhetoric and poor predictions | 27 |
| Reality | 30 |
| Reality and morality | 32 |
| 2 Why do we hear so much bad news? | 34 |
| Research | 35 |
| ■ The file drawer and data massage | 36 |
| Organizations | 37 |
| The media | 39 |
| Lopsided reality: sporadic but predictable | 39 |
| Lopsided reality: bad news | 40 |
| Lopsided reality: conflict and guilt | 41 |
| The consequences | 41 |

Part II: Human welfare

| | |
|---|----|
| 3 Measuring human welfare | 45 |
| How many people on earth? | 45 |
| The changing demographics | 47 |
| Overpopulation | 48 |
| 4 Life expectancy and health | 50 |
| Life expectancy | 50 |
| Life expectancy in the developing world | 51 |
| Infant mortality | 53 |
| Illness | 55 |
| Conclusion | 58 |
| 5 Food and hunger | 60 |
| Malthus and everlasting hunger | 60 |
| More food than ever | 61 |
| Lower prices than ever | 62 |
| The Green Revolution | 62 |
| ■ Relative or absolute improvement? | 64 |
| Regional distribution: Africa | 65 |
| Regional distribution: China | 66 |
| Conclusion | 67 |
| ■ Is inflation-adjusted GDP a reasonable measure of wealth? | 68 |
| 6 Prosperity | 70 |
| Poverty and distribution | 71 |
| Ever greater inequality? | 73 |
| Poorer still? | 75 |
| More consumer goods | 78 |
| More education | 81 |
| More leisure time | 82 |
| More safety and security | 84 |
| Fewer catastrophes and accidents | 85 |
| 7 Conclusion to Part II: unprecedented human prosperity | 87 |

Part III: Can human prosperity continue?

| | | |
|----|---|-----|
| 8 | Are we living on borrowed time? | 91 |
| | Resources – the foundation for welfare | 91 |
| 9 | Will we have enough food? | 93 |
| | At least grain per capita is declining | 93 |
| | Declining productivity | 95 |
| | Limits to yields? | 96 |
| | ■ Biomass | 99 |
| | What about ordinary peasants? | 100 |
| | Do we still need the high growth? | 100 |
| | Grain stocks are dropping! | 101 |
| | What about China? | 102 |
| | Should we worry about erosion? | 104 |
| | What about fish? | 106 |
| | Conclusion | 108 |
| 10 | Forests – are we losing them? | 110 |
| | Forests and history | 112 |
| | Deforestation: a general view | 112 |
| | Deforestation: how much? | 114 |
| | How much forest? | 115 |
| | Conclusion | 117 |
| 11 | Energy | 118 |
| | We are a civilization built on energy | 118 |
| | Do we have enough energy to go on? | 119 |
| | The oil crisis | 120 |
| | How much oil left? | 121 |
| | Optimists and pessimists arguing | 124 |
| | Ever more oil available | 125 |
| | Other fossil energy sources | 126 |
| | Nuclear energy | 128 |
| | Renewable energy | 129 |
| | Solar energy | 133 |
| | Wind energy | 134 |
| | Storage and mobile consumption | 135 |
| | Conclusion | 135 |
| 12 | Non-energy resources | 137 |
| | The pessimists bet on resources running out – and lost | 137 |
| | Falling prices | 137 |
| | Cement | 138 |
| | Aluminum | 138 |
| | Iron | 140 |
| | Copper | 143 |
| | Gold and silver | 144 |
| | Nitrogen, phosphorus and potassium | 145 |
| | Zinc | 145 |

| | |
|-------------------------------------|-----|
| Other resources | 146 |
| Why do we have ever more resources? | 147 |
| Conclusion | 148 |

| | | |
|----|---|-----|
| 13 | Water | 149 |
| | How much water in the world? | 149 |
| | The three central problems | 151 |
| | Not enough water? | 152 |
| | Will it get worse in the future? | 154 |
| | Will we see increased conflict? | 156 |
| | Conclusion | 157 |
| 14 | Conclusion to Part III: continued prosperity | 159 |

Part IV: Pollution: does it undercut human prosperity?

| | | |
|----|---|-----|
| 15 | Air pollution | 163 |
| | Air pollution in times past | 163 |
| | What is dangerous? | 165 |
| | Particles | 167 |
| | Lead | 170 |
| | SO ₂ | 172 |
| | Ozone | 173 |
| | NO _x | 174 |
| | CO | 175 |
| | And the developing world? Both growth and environment | 175 |
| | Conclusion | 177 |
| 16 | Acid rain and forest death | 178 |
| 17 | Indoor air pollution | 182 |
| | Indoor air pollution in the developing world | 182 |
| | Indoor air pollution in the developed world | 183 |
| 18 | Allergies and asthma | 185 |
| 19 | Water pollution | 189 |
| | Oil pollution in the oceans | 189 |
| | Oil in the Gulf | 191 |
| | Exxon Valdez: still a catastrophe? | 192 |
| | Pollution in coastal waters | 194 |
| | Suffocation in coastal waters | 195 |
| | Health effects from fertilizer | 201 |
| | Pollution in rivers | 202 |
| 20 | Waste: running out of space? | 206 |
| 21 | Conclusion to Part IV: the pollution burden has diminished | 210 |

Part V: Tomorrow's problems

| | | |
|----|---|-----|
| 22 | Our chemical fears | 215 |
| | Cancer: death | 217 |
| | Cancer: incidence | 222 |
| | ■ 1-in-8 and other lifetime risks | 223 |
| | The fear of pesticides | 226 |
| | ■ Establishing thresholds through risk analysis | 226 |
| | Pesticides and cancer | 228 |
| | Cancer in animal experiments | 231 |
| | Natural and synthetic pesticides | 232 |
| | Synthetic estrogens | 236 |
| | Synthetic estrogens: a fall in sperm quality | 238 |
| | ■ Organic farmers | 240 |
| | Synthetic estrogens: the "cocktail" effect | 241 |
| | Synthetic estrogens: breast cancer | 242 |
| | Synthetic estrogens: should we worry? | 244 |
| | Conclusion: should we use pesticides? | 245 |
| 23 | Biodiversity | 249 |
| | How many species are there? | 249 |
| | Is biodiversity important? | 250 |
| | How many go extinct? | 251 |
| | The claim of 40,000 species | 252 |
| | A model backup | 252 |
| | What do we lose? | 253 |
| | Models and reality | 253 |
| | The biologists' reaction | 254 |
| | Check the data | 254 |
| | The biologists' response | 256 |
| | Conclusion: what are the consequences of seriously overstating the extinctions? | 257 |
| 24 | Global warming | 258 |
| | The basic greenhouse effect | 259 |
| | The long-term development of the climate | 260 |
| | The climate, 1856-2100 | 263 |
| | How much does CO ₂ affect the temperature? | 265 |
| | How much does CO ₂ affect the temperature? | |
| | Particles | 266 |
| | How much does CO ₂ affect the temperature? | |
| | Water vapor | 269 |

How much does CO₂ affect the temperature?

| | |
|--|-----|
| Clouds | 270 |
| ■ The ozone hole | 273 |
| Are there other causes? | 276 |
| Are the scenarios realistic? | 278 |
| Are the scenarios realistic? The 40 new scenarios | 280 |
| Consequences: agriculture | 287 |
| Consequences: sea level rise | 289 |
| Consequences: human health | 291 |
| Consequences: extreme weather | 292 |
| Consequences: present and future weather | 297 |
| The cost of warming | 300 |
| The cost of cutting CO ₂ | 302 |
| Then what should we do? | 305 |
| ■ The double dividend: improve the environment and make money? | 308 |
| ■ Objections: cut CO ₂ and make money | 312 |
| ■ Objections: the price of the future | 313 |
| ■ Objections: the fear of catastrophe | 315 |
| Summing up | 317 |
| More than meets the eye | 318 |
| Conclusion: scares and sound policy | 322 |

Part VI: The Real State of the World

| | | |
|----|--|-----|
| 25 | Predicament or progress? | 327 |
| | The Great Fable of the Litany | 327 |
| | The Real State of the World | 328 |
| | Yet we worry ever more | 330 |
| | Setting priorities and risks | 333 |
| | Weighing risks | 336 |
| | The costs of the Litany | 338 |
| | ■ Genetically modified foods – the encapsulation of the Litany | 342 |
| | Caution when invoking the principle | 348 |
| | Continued progress | 350 |
| | Notes | 353 |
| | Bibliography | 435 |
| | Index | 506 |
