

Contents

Preface	xi
1 Introduction	1
Using this Book with Your Curriculum	2
Planning and Scheduling	3
Work Areas	3
Maintaining a Laboratory Notebook	4
2 Equipping a Home Biology Laboratory	9
Microscopes and Accessories	10
Microscope Accessories	24
Culturing Equipment and Supplies	33
Histology Equipment and Supplies	37
General Laboratory Equipment	40
Major Equipment	42
Prepared Slides	45
Specimens	46
3 Laboratory Safety	49
Lab I-1 Using a Microscope	53
Equipment and Materials	53
Background	53
Procedure I-1-1: A Microscope Tour	55
Build a Darkfield Apparatus from Pocket Change	59
Review Questions	61
Lab I-2 Mounting Specimens	63
Equipment and Materials	63
Background	64
Procedure I-2-1: Making Wet Mounts	64
Procedure I-2-2: Making Smear Mounts	66
Procedure I-2-3: Making Hanging Drop Mounts	67
Procedure I-2-4: Making Sectional Mounts	68
Review Questions	69
Lab I-3 Staining	71
Equipment and Materials	71
Background	72
Procedure I-3-1: Simple Staining	72
Procedure I-3-2: Gram Staining	74
Review Questions	76

Lab II-1	Building and Observing Microcosms	79
	Equipment and Materials	79
	Background	80
	Procedure II-1-1: Gathering Materials	82
	Procedure II-1-2: Building Aquarium Microcosms	83
	Procedure II-1-3: Building Winogradsky Column Microcosms	83
	Procedure II-1-4: Observing Winogradsky Column Microcosms	84
	Review Questions	85
Lab II-2	Observing Succession in Aquarium Microcosms	87
	Equipment and Materials	87
	Background	88
	Procedure II-2-1: Observe Succession in Microcosms	88
	Review Questions	90
Lab II-3	Observing the Effects of Pollution in Microcosms	93
	Equipment and Materials	93
	Background	94
	Procedure II-3-1: Build Polluted Microcosms	94
	Procedure II-3-2: Observe Succession in Polluted Microcosms	95
	Review Questions	96
Lab III-1	Acids, Bases, and Buffers	99
	Equipment and Materials	99
	Background	100
	Procedure III-1-1: Percentage and Molar Concentrations	100
	Procedure III-1-2: Effect of Concentration on pH	103
	Procedure III-1-3: pH of Household Materials	105
	Procedure III-1-4: Buffers	105
	Review Questions	107
Lab III-2	Carbohydrates and Lipids	109
	Equipment and Materials	109
	Background	110
	Procedure III-2-1: Investigating Sugars	112
	Procedure III-2-2: Investigating Starches	114
	Procedure III-2-3: Investigating Lipids	115
	Review Questions	116
Lab III-3	Proteins, Enzymes, and Vitamins	119
	Equipment and Materials	119
	Background	120
	Procedure III-3-1: Investigating Proteins	122
	Procedure III-3-2: Investigating Enzyme Catalysis	124
	Procedure III-3-3: Assaying Vitamin C Concentration in Urine	126
	Review Questions	128
Lab III-4	Coacervates	131
	Equipment and Materials	131
	Background	132
	Procedure III-4-1: Prepare and Observe a Coacervate	132
	Review Questions	134

Lab III-5	Extracting, Isolating, and Visualizing DNA.....	137
	Equipment and Materials	137
	Background	138
	Procedure III-5-1: Extracting and Visualizing DNA.....	138
	Review Questions	140
Lab III-6	Build a Gel Electrophoresis Apparatus.....	143
	Equipment and Materials	143
	Background	143
	Procedure III-6-1: Making the Gel Casting Container and Comb	145
	Procedure III-6-2: Assemble the Apparatus	147
Lab III-7	Simulated DNA Separation by Gel Electrophoresis.....	149
	Equipment and Materials	149
	Background	150
	Procedure III-7-1: Prepare Running Buffer	151
	Procedure III-7-2: Prepare and Cast the Gel	152
	Procedure III-7-3: Load and Run the Dye Specimens.....	153
	Review Questions	154
Lab IV-1	Chlorophyll and Photosynthesis	157
	Equipment and Materials	157
	Background	158
	Procedure IV-1-1: Observing Carbon Dioxide Uptake	158
	Procedure IV-1-2: Determining the Effect of Light Intensity on Photosynthesis	159
	Procedure IV-1-3: Chromatography of Plant Pigments and Locating Cellular Energy Reserves.....	160
	Review Questions	163
Lab IV-2	Investigating Osmosis	167
	Equipment and Materials	167
	Background	167
	Procedure IV-2-1: Observing Osmosis in Chicken Eggs	168
	Review Questions	170
Lab IV-3	Investigating Cell Division.....	173
	Equipment and Materials	173
	Background	173
	Procedure IV-3-1: Observing Mitosis	179
	Review Questions.....	181
Lab V-1	Sampling Plant Populations in a Community.....	185
	Equipment and Materials	185
	Background	185
	Procedure V-1-1: Choosing and Preparing the Survey Area	186
	Procedure V-1-2: Surveying the Plant Community	187
	Procedure V-1-3: Performing a Population Count.....	189
	Review Questions.....	191

Lab V-2	Observing the Effect of Rhizobia on Plant Growth.....	193
	Equipment and Materials	193
	Background	194
	Procedure V-2-1: Grow Lima Beans With and Without Rhizobia	195
	Review Questions	197
Lab V-3	Air Pollution Testing.....	199
	Equipment and Materials	199
	Background	200
	Procedure V-3-1: Building Particle Traps	201
	Procedure V-3-2: Positioning and Exposing the Particle Traps	201
	Procedure V-3-3: Counting and Identifying Particles.....	202
	Review Questions	203
Lab V-4	Soil and Water Pollution Testing	205
	Equipment and Materials	205
	Background	206
	Procedure V-4-1: Obtaining Soil and Water Specimens.....	207
	Procedure V-4-2: Testing the Reagents.....	207
	Procedure V-4-3: Making Boron Concentration Comparison Standards.....	208
	Procedure V-4-4: Testing Specimens for Boron	209
	Review Questions	210
Lab VI-1	Exploring Mendelian Genetics	213
	Equipment and Materials	213
	Background	213
	Procedure VI-1-1: Testing Subjects for the Ability to Taste PTC.....	215
	Procedure VI-1-2: Charting Inheritance of PTC-Tasting Ability	215
	Review Questions	215
Lab VII-1	Observing Specialized Eukaryotic Cells.....	217
	Equipment and Materials	217
	Background	217
	Procedure VII-1-1: Observing Onion Epidermal and Elodea Leaf Cells.....	218
	Procedure VII-1-2: Comparing and Contrasting Eukaryotic Cells	220
	Review Questions	220
Lab VII-2	Preparing Culturing Media.....	223
	Equipment and Materials	223
	Background	224
	Procedure VII-2-1: Preparing Normal Saline and Nutrient Media	227
	Review Questions	229
Lab VII-3	Culturing Bacteria.....	233
	Equipment and Materials	233
	Background	234
	Procedure VII-3-1: Staining and Observing the Original Culture.....	235
	Procedure VII-3-2: Inoculating Plates and Tubes	237
	Procedure VII-3-3: Producing Pure Cultures	238
	Review Questions	239

Lab VII-4	Investigating Bacterial Antibiotic Sensitivity.....	241
	Equipment and Materials	241
	Background	242
	Procedure VII-4-1: Testing Antibiotic Sensitivity.....	243
	Procedure VII-4-2: Culturing an Antibiotic-Resistant Bacteria Strain.....	245
	Procedure VII-4-3: Retesting Sensitivity of the Resistant Strain	246
	Review Questions.....	246
Lab VIII-1	Investigating Protista	249
	Equipment and Materials	249
	Background	249
	Procedure VIII-1-1: Observing Spirogyrae.....	251
	Procedure VIII-1-2: Observing Euglenae.....	252
	Procedure VIII-1-3: Observing Amoebae	253
	Procedure VIII-1-4: Observing Paramecia	255
	Review Questions.....	256
Lab IX-1	Investigating Fungi.....	259
	Equipment and Materials	259
	Background	260
	Procedure IX-1-1: Observing Zygomycota	264
	Procedure IX-1-2: Observing Ascomycota.....	265
	Procedure IX-1-3: Observing Basidiomycota	267
	Review Questions.....	268
Lab X-1	Investigating Simple Plants: Mosses and Ferns.....	271
	Equipment and Materials	271
	Background	272
	Procedure X-1-1: Observing Moss Structures	277
	Procedure X-1-2: Observing Fern Structures	277
	Review Questions.....	278
Lab X-2	Investigating Seed Plants	281
	Equipment and Materials	281
	Background	282
	Procedure X-2-1: Observing Germination of a Seed Plant.....	283
	Procedure X-2-2: Observing Root Structures.....	283
	Procedure X-2-3: Observing Stem Structures.....	285
	Procedure X-2-4: Observing Leaf Structures	289
	Procedure X-2-5: Observing Reproductive Structures	293
	Review Questions.....	296
Lab XI-1	Investigating Porifera and Cnidaria	299
	Equipment and Materials	299
	Background	299
	Procedure XI-1-1: Observing Porifera	301
	Procedure XI-1-2: Observing Cnidaria	302
	Review Questions.....	305

Lab XI-2 Investigating Platyhelminthes, Nematoda, and Annelida	309
Equipment and Materials	309
Background	309
Procedure XI-2-1: Observing Platyhelminthes (flatworms)	310
Procedure XI-2-2: Observing Nematoda (roundworms)	312
Procedure XI-2-3: Observing Annelida (segmented worms)	313
Review Questions	314
Lab XI-3 Investigating Arthropods.....	317
Equipment and Materials	317
Background	318
Procedure XI-3-1: Observing and Comparing Arthropod Structures.....	319
Procedure XI-3-2: Observing Insect Metamorphosis	323
Review Questions	325
Lab XI-4 Investigating Vertebrate Tissues.....	329
Equipment and Materials	329
Background	329
Procedure XI-4-1: Observing Epithelial Tissues	331
Procedure XI-4-2: Observing Connective Tissues.....	336
Procedure XI-4-3: Observing Muscle Tissues.....	341
Procedure XI-4-4: Observing Nervous Tissues	343
Review Questions	344
Index	349
