Electrify Europe

Messe Wien June 19 to 21, 2018

Electrify Europe, the new conference and exhibition is the successor to the well-known POWER-GEN Europe and the first PennWell event to focus on the changes of the electricity industry, i.e. power generation, transmission and distribution as well as the factors influencing these changes, namely digitalisation, decarbonisation, decentralisation as well as electrification of the heat and transport sector.

The three day expert conference is supported off by an exhibition offering purchasers, experts and decision makers from all areas of the energy industry to exchange information, present products and services and networking. Electrify Europe initiates the exchange between established and new market players to create sustainable solutions across the entire electricity value network.
