

Contents

1. Introduction	6
1. Moisture action in building materials and structures	6
2. Moisture sources, effect of porosity, moisture forms.....	9
3. Definition and classification of moisture	11
4. Moisture measurement methods and principles	14
5.1 Gravimetric method.....	14
5.2 Extraction method	15
5.3 Resistance methods	15
5.4 Dielectric methods.....	16
5.5 Radiometric methods.....	18
5.6 The nuclear magnetic resonance method (NMR method).....	20
6. Strong and weak points of moisture measurement methods	21
7. TDR (Time-domain reflectometry) method	23
7.2 Practical example of calibration of TDR method.....	25
8. Conclusions and the trends of future research.....	28
