

CONTENT

1. Introduction	6
2. The objectives of modelling the economic risk of a project; the options of identifying project risk exposure	8
3. Approach to project risk exposure quantification with the knowledge of the criterial function of the project.....	9
3.1 Identifying the risk factors and their significance.....	11
3.2 Construction of the risk factor probability distribution and the criterial function of a project.....	14
3.3 Comparing the risk variants of a project	17
4. Approach to project risk exposure quantification based on the quantitative assessment of risk factors	22
5. Contribution to indirect identification of project risk	24
5.1. Model of multicriterial assessment of variants	25
5.2 Construction of global formulation of the development of a locality as a characteristic of the project risk degree.....	26
6. Conclusion.....	31
7. Literature	33
