Introduction.	5
The Erzgebirge Mountains.	6
The Granulitgebirge	14
The Slavkovský les Mts. and the Tepelská plošina Upland. . . .	15
Description of localities	17
1. Újezd near Trmice — young volcanics of the České středohoří Mts.	17
2. Teplice Spa — Neoidic mineralization	17
3. The Most Dam — relict granite and augen gneiss	18
4. Přítkov — fluidal quartz porphyry	18
5. Cínovec (Zinnwald) — tin-tungsten deposit.	19
6. Altenberg, the "Pinge" — mining field in the tin-bearing granite stock	20
7. Hermsdorf (Rehefeld) — section through migmatite gneiss, mica-schist and phyllite	20
8. Lauenstein — Lower Grey Gneiss	21
9. Röhrsdorf — acid granulite	21
10. Chemnitztal, quarry of Diethensdorf — pyroxene granulite	22
11. Chemnitztal — the group of cordierite gneisses	22
12. Freiberg-Lößnitz — Lower Grey Gneiss	23
13. Oberschöna — metaquartzites	23
14. Freiberg — Abraham Mine.	24
15. Zöblitz/Ansprung — outcrops of pyrope-bearing serpentine, eclogite, granulite	24
16. Vogeltöffelsen — Grey Gneiss, Red Gneiss	24
17. Niederschmiedeberg — skarn deposit	25
18. Niederschmiedeberg — "Dense Gneiss" with concretions .	25
19. Warmbad near Wolkenstein (railway station).	26
20. Raschau — quartzite cliff and abandoned dolomite quarry.	26
21. Markersbach-Obermittweida — pebble-bearing metagreywackes	27
22. Gifhüttenberg — quartzites	27
23. Breitenbrunn — skarn deposit	28
24. Railway cutting at Oberaffalter — Upper Ordovician—Silurian	28

25. Road cutting east of Lößnitz — Upper Devonian diabase and diabase tuff.	29
26. 27. The Sosa Dam — Erzgebirgsgranit (two localities) . .	29
28. Scheibenberg — sand pit and quarry with Tertiary sediments and nephelinite	29
29. „Sfinx” — interrelationships between mica-schists, migmatites and orthogneisses.	30
30. Měděnec — skarn bodies.	31
31. The Křimov Dam — greywackeous gneiss	31
32. Vernéřov — migmatites	32
33. Stráž nad Ohří — Ohře granulites	32
34. Loket — porphyritic biotite granite	33
35. The Teplá river valley — Mariánské Lázně basic complex	34
36. The Úterský potok valley — metamorphic zoning in the Tepelská plošina Upland.	34
37. Horní Bříza — kaolin deposit.	35
38. Točnick — the Algonkian—Ordovician contact	35
