

Contents

1 INTRODUCTION	11
1.1 Risk Factors	13
1.2 The Role of Implanted Material at the Origins of Infection	16
2 ANTIMICROBIAL PROPHYLAXIS DURING JOINT REPLACEMENT OPERATIONS	18
2.1 The History of Antibiotic Prevention	18
2.2 Timing	19
2.3 The Duration of the Prophylactic Administration of an Antibiotic	20
2.4 Local Antibiotic Irrigative Substances	20
2.5 Cement Impregnated with an Antibiotic	20
2.6 The Postoperative Period	21
2.7 Selecting a Type of Antibiotic	22
3 PREVENTION OF LATE HEMATOGENOUS INFECTION OF JOINT REPLACEMENTS	25
3.1 Stomatology	26
3.2 General Surgery	27
3.3 Gynaecology	28
3.4 Urology	29
3.5 Piercing	30
3.6 A File of Patients and a Method	30
3.7 Results	30
3.8 Selecting an Antibiotic	31
3.9 Recommended Antibiotic Prophylaxis	31
4 CAUSERS OF INFECTIONS IN JOINT REPLACEMENTS	38
4.1 Biofilm	38
4.2 Bacterial Causers of Joint Replacement Infections	42
4.3 Resistance to Antibiotics	46
4.4 Antibiotic Therapy	50
4.5 Options for the Antibiotic Therapy of Deep Infections Depending on Etiology	53
5 DIAGNOSTICS	55
5.1 Classification of a Joint Replacement Infection	56
5.2 Case History and Clinical Testing	57

5.3 Laboratory Results	59
5.4 Radiographic Examinations and Other Imaging Methods	61
5.5 A Joint Puncture and Microbiological Examination	66
5.6 Intraoperative Diagnostics	71
5.7 Complications in Making a Diagnosis	73
 6 METHODS OF TREATING AN INFECTION OF AN ARTHROPLASTY	 76
6.1 Single Antibiotic Therapy	78
6.2 Debridement and Irrigation Drainage	80
6.3 A One-stage Exchange	84
6.4 A Two-stage Exchange	88
6.5 Articulating Spacers	93
6.6 PROSTALAC	96
6.7 Other Articulating Spacers	100
6.8 Factory-built "Ready-made" Spacers	103
6.9 A Three-stage Exchange	104
6.10 Resection Arthroplasty	104
6.11 Arthrodesis and Amputation	108
 7 BONE CEMENT AND ANTIBIOTIC CARRIERS	 113
7.1 Antibiotic Carriers and Materials Used in Their Preparation	113
7.2 Bone Cement	114
7.3 Bone Grafts	122
7.4 Other Local Carriers	123
 8 MANAGEMENT OF DEEP INFECTIONS OF HIP JOINT REPLACEMENTS	 124
8.1 Observations of Our Patients with Infections of Hip Joint Replacements	124
8.2 A Group of Patients Treated by Resection Arthroplasty	125
8.3 A Group of Patients Treated by a Two-stage Exchange Without Using a Spacer	126
8.4 A Group of Patients Treated by a Two-stage Exchange Using a Standard Spacer	127
 9 A CANNULATED SPACER	 134
 10 CANNULATED ARTICULATING SPACERS – CATS	 142
10.1 Construction of the CATS Implant	142
10.2 Surgical Technique for the Implantation of an Articulating Spacer	143
10.3 Results	153
10.4 Complications	154
 11 OUR TECHNIQUE FOR THE TWO-STAGE EXCHANGE OF AN INFECTED KNEE JOINT REPLACEMENT USING A SPACER	 160
11.1 First Period – Extraction of an Infected Implant	160
11.2 The Preparation and Shaping of a Spacer	163
11.3 Modification – Channelized Spacer	166

11.4 Postoperative Care 168

11.5 Second Stage – Reimplantation 168

11.6 A File of Patients with Infection of the Knee Joint 175

11.7 Results of the File of Patients with Infection of the Knee Joint Replacement 175

12 INFECTIOUS COMPLICATIONS OF SHOULDER JOINT REPLACEMENTS 184

12.1 Our Files 189

DISCUSSION 195

CONCLUSIONS 202
