

Content

1. Introduction	7
2. Systems Alliances Fundamentals	9
2.1 An Overview of Approaches Suitable for Modeling Complexes (i.e. complex heterogeneous wholes).....	9
2.2 Backgrounds of the Theory of Systems Alliances	10
2.3 Alliances Identification.....	13
3. Concept of System Alliances Structures and Their Dynamics	22
3.1 Structure of System Alliances	22
3.2 Information Reliability	27
4. Time Dynamics of System Alliances	32
4.1 Example of Real Alliance.....	34
4.2 Requirements on Time Coordination of Alliance Partial System Functions.....	36
5. Functional Properties of System Alliances	38
6. Reliability Aspects	42
6.1 General Aspects of System Alliances Reliability.....	43
6.2 Functional Reliability of System Alliances and the Cause of Its Limitation	49
6.3 The Existence Reliability of System Alliances	50
6.4 The Structural Reliability of System Alliances.....	51
6.5 Transformation of Pair of Finite State Machines (FSMs) Sharing Input Symbols	53
6.6 Alliances in Critical Situations	58
6.7 Practical Reliability Aspects.....	60
6.7.1 <i>The Structures of Car Cockpit Assistance System Alliances</i>	60
6.7.2 <i>Requirements on the Reliability of Assistance Systems alliances and Their Functionality</i>	62
6.7.3 <i>Requirements on the Reliability of Interactions between the Driver and Assistance Systems Alliance</i>	64
6.7.4 <i>Influence of assistance system alliance operation on the limitation of driver error</i>	65
6.8 More General Aspects Concerning the Alliance Function Reliability	66
7. Alliance and Information Power	67
7.1 Interfaces in Alliances	67
7.1.1 <i>Models of Interfaces in Alliances</i>	67
7.1.2 <i>Generalization of the Model for Interacting Interfaces</i>	69
7.2 Alliance Control	70
8. Sensitivity of Alliances	73
8.1 Sensitivities of the Systems and of the Alliance Functions.....	74
8.2 Theorem on Sensitivity Invariance.....	79

8.3	Determination of Sensitivities Extremes in Space and Time	80
8.4	Possibilities for Sensitivities Values Adjustment.....	86
8.5	Sensitivities in Transportation Systems Alliances	87
9.	Prediction Diagnostics in System Alliances	89
10.	Models of Mental Alliances	93
10.1	General Aspects.....	93
10.2	Transportation System Model	93
10.3	The Influence of Empathy	94
10.4	Real Time Reasoning Limitations	94
10.5	World Model Based on Objects, Features, Behaviors and Structure Schemas	95
10.6	Class Description.....	97
10.7	Feature Description.....	100
10.8	Behavior Description.....	100
10.9	Logical System of Features and Behaviour.....	101
10.10	Kinds of Problem Solving Reasoning Used by Human Operators.....	101
10.11	Harnad's List of Techniques	101
10.12	Mechanisms of Creativity.....	103
10.13	Alliance Arising between Separate Techniques	106
10.14	Conclusion	106
11.	Identification of Self-organizing Alliances in Car Stream	108
11.1	Congestion Transport Alliance Structure	109
11.2	Alliance Formation	110
11.3	Traffic Congestion Alliance Topology.....	110
11.4	System Functions of Transport System Alliance	110
11.5	Co-operative Systems	110
11.6	Traffic Congestion Alliance Evaluation	111
11.6.1	<i>Entropy</i>	<i>112</i>
11.6.2	<i>Measuring alliance organization on interfaces.....</i>	<i>112</i>
11.6.3	<i>Alliance Organization Evaluation.....</i>	<i>113</i>
11.7	Alliance Dynamics	115
11.8	Importance	116
12.	Problems of Alliances in Railway Traction Systems	117
12.1	Introduction	117
12.2	Problem Specification.....	119
12.3	Simple Moving Average Prediction Model.....	120
12.4	ARIMA Prediction Models	123
12.5	Prediction Models Based on Artificial Neural Networks.....	128
12.6	Summary of Chapter 12.....	131
13.	Multilingual Approach to System Alliances	132
13.1	Natural communication	132
13.2	Correctness of Translation.....	132
13.3	Multilingual Model of Alliance.....	133

13.4	Evolutionary Techniques in Translation Process in Alliance Environment.....	135
13.5	Searching Translation Grammar.....	136
13.6	Resource Requirements of Grammars.....	143
13.7	Dynamics in Alliances and Grammars.....	144
14.	Hybrid Intelligent Vehicle Architecture – Systems Alliance Approach..	146
14.1	Systems Alliance Representation of Hybrid Intelligent Vehicle (HIV) Architecture	146
14.2	Discussion.....	147
15.	Alliance Approach to Driver-car Simulation Synthesis	149
15.1	Alliance Control Processes Dynamics.....	149
15.2	Architecture of a Systems Alliance Representation of a Driving Simulator Laboratory	150
15.3	Physical Architecture of a Driving Simulator Laboratory	151
15.4	Functional Architecture of the Driving Simulator Assembly	152
15.5	DSL Control Architecture	152
15.6	15.6 Discussion of Dynamics	153
16.	Summary.....	155
17.	References	156
