Summary 2

Souhrn 3

Keywords 4

1. Oscillatory functions 6

1.1. Oscillatory time 6

1.2. Examples 6

2. Auxiliary functions and sets 7

2.1. The summit function 8

2.2. The universal comparison function 9

2.3. Cone sets in the plane 9

3. Ordinary differential equations 10

3.1. Oscillatory function 10

3.2. Generalized Liénard equations 11

3.3. Oscillation assumptions 11

3.4. Uniformly oscillatory equation 12

3.5. Examples 13

4. Partial differential equations 13

4.1. An eigenvalue problem 14

4.2. Conservative systems 14

4.3. Globally oscillatory function 15

4.4. Dissipative systems with internal damping 16

4.5. Dissipative systems with viscous damping 17

5. Abstract differential equations 18

5.1. Spaces 18

5.2. Operators 19

5.3. Abstract evolution equation and energy solutions 20

5.4. K -oscillatory functions 20

5.5. Uniformly K -oscillatory equation 21

5.6. Application 21

6. Conclusion and further goals 23
