

# Contents

1. PRELIMINARIES	1
1.1 Sets, relations, mappings	1
1.2 Ordered sets, lattices	3
1.3 Tolerances, equivalences	5
1.4 Algebras	6
2. FUZZY APPROACH, GRADED TRUTH, AND STRUCTURES OF TRUTH VALUES	11
2.1 Fuzzy approach: from resolving paradoxes to engineering applications	12
2.2 Graded truth and structures of truth values	25
2.3 Residuated lattices	27
2.4 Residuated lattices and t-norms	62
2.5 Bibliographical remarks	71
3. FUZZY STRUCTURES	75
3.1 Fuzzy sets and fuzzy relations	76
3.2 Fuzzy logic: syntax and semantics	96
3.3 Similarity issues	110
3.4 Morphisms, products, substructures	125
3.5 Representation by crisp structures: cutlike semantics	154
3.6 Algebras with fuzzy equalities	159
3.7 Many-sorted case	173
3.8 Bibliographical remarks	176
4. BINARY FUZZY RELATIONS	181
4.1 Operations and properties of binary fuzzy relations	182
4.2 Similarity: fuzzy equivalences	193
4.3 Hierarchy: fuzzy order	203

4.4	Bibliographical remarks	212
5.	OBJECT-ATTRIBUTE FUZZY RELATIONS AND FUZZY CONCEPT LATTICES	215
5.1	Conceptual granulation: fuzzy context, fuzzy concepts, and fuzzy concept lattice	215
5.2	Similarity and logical precision	222
5.3	Fuzzy Galois connections	244
5.4	Main theorem of fuzzy concept lattices	261
5.5	Bibliographical remarks	271
6.	COMPOSITION AND DECOMPOSITION OF FUZZY RELATIONS	273
6.1	Composition of fuzzy relations	273
6.2	Decomposition: fuzzy relational equations	279
6.3	Bibliographical remarks	296
7.	MISCELLANEA	299
7.1	Fuzzy closure operators and similarity spaces	299
7.2	Applications of selected results to some problems and models	339
7.3	Fuzzy logic with truth degrees in residuated lattices	350
7.4	Bibliographical remarks	354
	References	357
	Index	367
