

## Contents

1. Introduction	6
1.1. Challenges in Agent-based Computing	6
1.2. In this paper	8
2. Multi-agent planning	8
2.1. Properties of multi-agent planning scenarios	9
2.2. Component-based multi-agent planning architecture	9
2.2.1. Automated planning	11
2.2.2. Negotiation	12
2.2.3. Acquaintance models	14
2.2.4. Social Commitments	16
2.2.5. Adversarial Reasoning and Adversarial Planning	17
2.3. Abstract Distributed Planning Architecture	18
2.3.1. Non-centrality and multi-party involvement:	19
2.3.2. Dynamic Environments:	20
2.3.3. Semi-trusted and partially accessible environment:	21
2.3.4. Adversarial environment:	21
3. Multi-agent applications and prototypes	22
3.1. Agent-based free-flight planning	22
3.1.1. Planning in AgentFly	22
3.1.2. Collision avoidance (CA) in AgentFly	23
3.2. Agent-based production planning	25
3.3. Agent-based supply chain management	28
4. Conclusion	30
