GENERAL PATHOLOGY

1. Introduction to pathology	9
2. Cell injury and cell death	11
3. Healing, repair, regeneration. Pathology of tissue growth	14
4. Degenerative disorders	16
5. Congenital anomalies and anomalies of growth	17
6. Genetic disorders	20
7. Metabolic disorders	24
8. Thrombosis, embolism, infarction	27
9. Oedema and serous effusions	29
10. Inflammation	30
11. Diseases of immunity	35
12. Amyloidosis	38
13. Neoplasia and carcinogenesis	39
14. Infective agents	44

SYSTEMIC PATHOLOGY

15. Pathology of vessels	49
16. Congenital Heart Disease	56
17. The Heart	59
18. Red cell disorders	64
19. White cell disorders and pathology of thymus	68
20. Leukaemia, myeloproliferative disorders, myelodysplasia	72
21. The Head and Neck	75
22. Pathology of the Oesophagus, Stomach, Small and Large Intestine and Appendix	79
23. Malabsorption syndromes	87
24. The Liver	89
25. The Biliary Tract	97
26. The Pancreas	100
27. The Peritoneum	103
28. Pathology of the Conducting Airways, Lung and Pleura	104
29. The Male Genital Tract	111
30. The Female Genital Tract	115
31. The Breast	122
32. The Kidney and the urogenital system	127
33. Glomerular diseases	135
34. The Endocrine system	140
35. The Central Nervous System	147
36. Peripheral Nerves	154
37. The Skeletal system	156
38. Pathology of the skin	163
39. Diseases of infancy and childhood	169
