Boháč, V. Kubičár L., Némethy L., Dieška P. <i>Investigation of moisture influence on thermophysical parameters of PORFIX aerated concrete</i>	5
Calvo Anibarro C., Kubicar L. <i>Study of the curing process of an epoxy resin by monitoring of the thermal conductivity by the Hot Ball method</i>	6
Casares L., Kubičár L. <i>Moisture Transport through porous materials monitored by the Hot Ball Method</i>	7
Čulík F., Lukovičová J. <i>Diffusivity determination from measurement of the time development temperature inside a SLAB</i>	8
Holubek M., Mihalka P., Matiasovsky P. <i>Relationship between calcium silicate permitivity and thermal conductivity moisture content dependences</i>	9
Koci J., Madera J., Vejmelkova E., Cerny R. <i>Computational modelling of coupled heat and moisture transport with hysteretic hydric parameters</i>	10
Koronthalyova O. <i>Effect of water vapour permeability moisture dependence on simulation of dynamic moisture response</i>	11
Kubičár L., Štofanič V., Vretenár V., Boháč V., Dieška P. <i>Thermophysical Analysis of Porous System</i>	12
Matiasovsky, P., Takacsova, Z. <i>Analysis of water vapour sorption process in static dessicator method</i>	13
Medved I. <i>A statistical mechanical description of phases and first-order phase transitions</i>	14
Mihalka P., Matiasovsky P. <i>Analysis of moisture hysteresis of building materials in hygroscopic range</i>	15
Moravcikova J. <i>Thermodilatometry of ceramics using by the simple push-rod dilatometer</i>	16
Ondruska J., Trník A. <i>The influence of heating rate on thermal processes in cylindric samples of different radius</i>	17
Panas A. J., Nowakowski M. <i>Numerical validation of the scanning mode procedure of thermal diffusivity investigation applying temperature oscillation</i>	18
Pavlík Z., Fiala L., Pavlíková M., Černý R. <i>Experimental analysis of water and nitrate transport in porous building materials</i>	19

Stastnik S., Vala J., Novacek J. <i>Thermomechanical modelling of a maturing concrete mixture</i>	20
Suchorab Z., Sobczuk H. <i>Dielectric Properties of Building Materials</i>	21
Terpiłowski J., Woroniak G. <i>Investigation of the thermal diffusivity of the Fe₅₂Ni₄₈ and Fe₄₀Ni₆₀ alloys by means of modified flash method</i>	22
Toman J., Korecký T., Černý R. <i>Thermal conductivity in dependence on temperature</i>	23
Trník A., Štubňa I., Ondruška J. <i>The thermodilatometric analysis of kaolin-quartz samples</i>	24
Vejmelková E., Keppert M., Pavlíková M., Černý R. <i>Thermal, hygric and salt-related properties of high performance concrete</i>	25
Vretenár V., Kubičár L., Boháč V., Predmerský M. <i>Thermal conductivity measurement of dynamo sheets</i>	26
Zmeškal, O., Hřebenová, L., Štefková, P. <i>The use of step wise and pulse transient methods for the study of photovoltaic cells laminating films properties</i>	27
Zmywaczyk, J., Wielgosz, M., Koniorczyk, P., Gapski, M. <i>Identification of some thermophysical and boundary parameters of black foamlas by an inverse method</i> ..	28
Participants	29
