

TABLE OF CONTENTS

FOREWORD	13
I. TECHNOLOGICAL AND ENERGETIC ASPECTS OF THE AGRICULTURAL FIELD PRODUCTION	14
1.1 Terminology	14
1.2 Definition of the Concept of "Appropriate Technology"	15
1.3 Classification of Employed Technologies	16
1.3.1 Hand-tool Technology	16
1.3.2 Draught-Animal Technology	16
1.3.3 Mechanical-Power Technology	16
1.3.4 Special Machines and Systems	16
1.4 Current Status of Agricultural Mechanization in Less developed Countries	17
1.5 Energetic Requirements of Farming Processes	17
1.5.1 Technology Levels	17
1.5.2 Energetic Inputs in the Production	18
1.5.2 Estimating Energetic Demand of Field Operations	20
II. MECHANIZATION STRATEGIES AND THE UTILIZATION OF ENERGY RESOURCES IN THE LESS DEVELOPED COUNTRIES	22
2.1 Institutional and Organizational Support Measures	22
2.1.1 Characteristics of Agricultural Mechanization Strategy	22
2.1.2 General Statements	22
2.1.3 Institutional Support	23
2.1.4 Solutions for Way Out	23
2.1.5 Research and Extension	24
2.1.6 Manpower Development	25
2.2 Technical and Economical Aspects of Using Mechanical Power in the Less developed Countries	26
2.2.1 Soil Aspects	26
2.2.2 Agronomic Aspects	26
2.2.3 Economic Aspects	27
2.2.4 Mechanization Aspects	27
2.3 Formulation of Mechanization Strategy	28
2.3.1 Variables of Mechanization Strategy	28
2.3.2 Adoption Process for Mechanization and Labour Productivity-Enhancing Technology	29
2.3.3 Rural Development Programmes	30
2.4 Utilization of Power Units in Agriculture of Less Developed Countries	30
2.4.1 Man as a Source of Power	30
2.4.2 Adaptation of Implements to Man	31
2.4.3 The Use of Draught Animal Power	32
2.4.3.1 Worldwide Importance of Draught Animals	32
2.4.3.2 Draught Animal Power and Development	32
2.4.3.3 Priority of Draught Animals	33
2.4.3.4 Energy Requirements of Animals	33
2.4.3.5 Thermo-mechanic Requirements of Animals	33
2.4.3.6 Forms of Animal Power Utilization	34
2.4.3.7 Draught Effort of Animals	35
2.4.3.8 Suitability of Some Animals for Works	36
2.4.3.9 Other Benefits that the Animals Leave Behind for Man	39
2.4.4 Mechanical Energy Sources	40
2.4.4.1 How Does Mechanical Energy Suite Agricultural Production	40
2.4.4.2 Fundamentals of Economical Utilization of Tractors	40
2.4.4.2 Case Study	47
2.4.4.3 Factors of Field Capacity	47
2.4.4.4 Field Capacity of Working Machines	48
III. HAND-TOOLS, IMPLEMENTS AND MACHINERY	49
3.1 Hand Implements for Tillage	49
3.2 Hand Implements for Planting and Seeding	52
3.3 Hand Implements for Inter-row Cultivation	54
3.4 Hand Implements for Harvesting	55
3.4.1 Fodder and Cereal Harvesting	55
3.4.2 Harvest of More Robust Crops	55

3.4.3 Root Crops Harvesting	56
3.5 Hand Implements for Post-harvest Treatment and Processing	56
IV. DRAUGHT ANIMAL IMPLEMENTS AND MACHINES	58
4.1 Types of Harnessing and Team Systems	58
4.2 Animal Drawn Machines and Implements	61
4.2.1 Generalities	61
4.2.2 Multi-purpose Implement	61
4.2.3 Tillage and Seed-bed Preparation Implement	62
4.2.4 Sowing and Planting Machines	64
4.2.4.1 Seed Drills	64
4.2.4.2 Precision Seed Drills	64
4.2.4.3 Other Equipment	65
4.2.5 Implements for Inter-row Cultivation	65
4.2.6 Harvesting and Threshing Machinery	65
4.2.6.1 Harvesting Machinery and Implements	65
4.2.6.2 Threshing Machinery and Implements Using Animals	67
V. MECHANIZATION OF CEREALS GROWING	69
5.1 Rice (<i>Oryza sativa</i>)	69
5.1.1 General Description and Technologic Approach	69
5.1.1.1 Technologic Approach	69
5.1.1.2 Most Labour Intensive Method	70
5.1.2 Specificity of Machinery Work in Rice Fields	70
5.1.3 Ways to Improving Traction	73
5.1.3.1 Special Pneumatic Tyres	73
5.1.3.2 Traction Devices to Complement Standard Tyres	73
5.1.3.3 Devices Mounted on Rubber Tyres	75
5.1.3.4 Cage Wheels without Rubber Tyres	75
5.1.3.5 Traction/Adhesion Improvement for Crawler Tractors	76
5.1.3.6 Special Devices for Combine Harvesters	76
5.1.4 Seedbed Preparation	76
5.1.4.1 Puddling	77
5.1.4.2 Systems of Paddy Cultivation	78
5.1.5 Crop Initiation	78
5.1.5.1 Seeding Versus Transplanting	78
5.1.5.2 Mechanical Transplanting	79
5.1.5.3 Preparation of Seedlings	79
5.1.5.4 Mechanical Transplanters	81
5.1.5.5 Direct Seeding	83
5.1.6 Harvesting Rice	84
5.1.6.1 Constraints at Harvesting Rice	84
5.1.6.2 Rice Harvesting Technologies	84
5.1.6.3 Harvesting Technologies and Harvesting Equipment	85
5.1.6.4 Harvesting Machinery of Japanese Type	86
5.1.6.5 Harvesting Machinery of Western Type (Through-Flow Combines)	88
5.1.6.6 Recent Developments and Trends	91
5.1.6.7 New trends in Construction of Rice Harvesting Machines	91
5.1.7 Threshing on Stationary Threshers	92
5.1.8 Rice Cleaning	93
5.1.9 Hulling and Polishing	93
5.2 Maize (<i>Zea mays</i>)	94
5.2.1 General Description	94
5.2.2 Land Preparation and Planting	97
5.2.2.1 General Characteristics	97
5.2.2.2 Conservation Cropping (Minimum Tillage)	97
5.2.3 Harvesting	100
5.2.3.1 Grain Harvesting	100
5.2.4 Growing Maize for Fodder and Silage	110
5.2.4.1 Harvesting of Maize for Green Fodder	111
5.2.4.2 Harvesting Maize for Silage	110
5.2.4.3 Types of Precision-Chop Harvesters	113

5.3 Sorghum (<i>Sorghum vulgare</i> L.) and Millet (<i>Panicum miliaceum</i> L.)	114
5.3.1 Sorghum Generally	114
5.3.2 Millet Generally	114
5.3.3 Land Preparation	115
5.3.4 Seeding	115
5.3.4.1 Seeding Machines	115
5.3.5 After Care	115
5.3.6 Harvesting and Threshing	116
5.3.6.1 Sorghum	116
5.3.6.2 Millet	118
5.3.6.3 Two Millet Thresher Models	118
5.3.7 Grain Decortications	119
5.3.7.1 Traditional Methods (by Hand)	119
5.3.7.2 Mechanical Methods	119
5.4 Teff (<i>Eragrostis teff</i> L.)	120
5.4.1 Teff – General Information	120
5.4.2 Land Preparation	120
5.4.3 Planting	120
5.4.4 Harvesting	120
5.4.4.1 Threshing and Cleaning	120
5.4.5 Future of the Teff	121
VI. SUGAR CANE	122
6.1 Importance of Sugar Cane	122
6.2 Mechanical, Physical and Biological Properties of Sugar Cane	122
6.3 Mechanized Operations for Contemporary Technology of Growing Sugar Cane	122
6.3.1 Discussion of Flow Chart for Growing Operations	122
6.4 Planting	124
6.4.1 Planting Methods	124
6.4.2 Planting Material	125
6.4.3 Fungicidal Treatment	125
6.4.4 Hand Planting	125
6.4.4.1 West Indies Practice	125
6.4.4.2 General Practice	126
6.4.5 Mechanical Planting	126
6.4.5.1 Mechanical Planting Methods	126
6.4.5.2 Functions of Some Components of the Planters	127
6.4.5.3 Some Sugarcane Planters	127
6.5 Pre-harvest Preparation of the Fields	129
6.6 Sugar Cane Harvest	129
6.6.1 General Aspects	129
6.6.2 Choice of Harvesting Technology	130
6.6.2.1 Hand Harvesting	130
6.6.2.2 Mechanized Harvesting	130
6.6.2.3 Mechanized Harvesting Technologies	131
6.6.2.4 Cane-cutting Machines	131
6.6.2.5 Whole Cane Harvesting Machines	132
6.6.2.6 Chopper Harvesters	135
6.7 Loading and Transport	136
6.7.1 Loading Operations	136
6.7.1.1 Push Loaders	137
6.7.1.2 Flex-boom Cane Loaders	137
6.7.2 Self-loading Equipment and Methods	138
6.7.2.1 Equipment for Sugar Cane Self-loading	138
6.7.2.2 Equipment for Sugar Cane Back Self-loading	138
6.7.2.3 Equipment for Sugar Cane Side Self-loading	139
6.7.3 Machinery for Loading Pallets and Containers	139
6.7.4 Self-loading Trucks	140
6.8 Transport Means and Systems	140
6.8.1 Transport of Whole Cane	140
6.8.1.1 From Field to Reloading Points	140

6.8.1.2 From Reloading Points to the Factory	142
6.8.1.3 Trailer Vehicles	142
6.8.2 Transport of Cut Cane	142
6.9 Off-and Re-loading Bay	142
6.10 Handling and Storage	142
VII. MECHANIZATION OF ROOT CROPS	145
7.1 Cassava (<i>Manihot Esculenta</i> L.)	145
7.1.1 Requirements of Cultivation	145
7.1.2 Planting	145
7.1.2.1 Planting Methods	145
7.1.2.2 Ways of Planting	147
7.1.2.3 Cassava Planters	147
7.1.3 Harvesting	151
7.1.3.1 Harvesting in General	151
7.1.3.2 Traditional Cassava Harvesting	152
7.1.3.3 Modern Cassava Harvest	152
7.1.3.4 Implements and Machines for Cassava Roots Harvesting	153
7.1.4 Cassava Roots Post-harvest Processing	159
7.1.4.1 Peeling Cassava Roots	159
7.1.4.2 Processing Cassava Roots	159
7.1.4.3 Some Useful Information	160
7.2 Sweet Potato (<i>Ipomoea batatas</i> L.)	161
7.2.1. Sweet Potato - General	161
7.2.2 Planting	161
7.2.2.1 Planting Methods Variations	161
7.2.2.2 Sweet Potato Planters	162
7.2.3 Harvesting	162
7.2.3.1 Harvesting Technologies	162
7.2.3.2 Sweet Potato Diggers	163
7.2.3.3 Sweet Potato Harvester	163
7.3 Yam (<i>Dioscorea</i> sp.)	165
7.3.1 General Information	165
7.3.2 Planting	165
7.3.2.1 Planting Material	165
7.3.2.2 Seedbed Preparation	165
7.3.2.3 Planting Equipment	166
7.3.3 Harvesting	167
7.3.3.1 Mechanical Harvesting	167
7.3.3.2 Using Potato Diggers	167
7.3.3.3 Other Types of Yam Harvesting Machines	168
7.4 Taro (<i>Colocasia esculenta</i> L.)	168
7.4.1 Basic Information	168
7.4.2 Review of Operations	169
7.4.3 Planting	170
7.4.3.1 Types of Planting	169
7.4.3.2 Planting Technology	169
7.4.4 Harvesting	170
7.4.4.1 Harvest Time	170
7.4.4.2 Hand Harvest	170
7.4.4.3 Mechanical Harvesting	171
VIII. MECHANIZATION OF TEXTILE CROPS	172
8.1 Cotton (<i>Gossypium hirsutum</i> L.)	172
8.1.1 General Information	172
8.1.2 Cotton Stalk Clearing Machines	172
8.1.2.1 Some Clearing Methods	172
8.1.2.2 Crushers	174
8.1.2.3 Uprooters (Diggers)	174
8.1.2.5 Handling Shredded Shrubs	176
8.1.3 Land Preparation	176
8.1.4 Seed Preparation	177

8.1.5 Thinning	177
8.1.5.1 General Principles	177
8.1.5.2 Mechanical Thinning	177
8.1.6 Trimming Shrub Hedge	178
8.1.7 Defoliation and Desiccation	178
8.1.8 Harvesting	179
8.1.8.1 Hand Harvesting	178
8.1.8.2 Mechanical Harvesting	178
8.1.8.3 Harvesting Machines	178
8.1.9 Transport of Raw Cotton	190
8.1.10 Seed Removing and Cleaning	191
8.1.10.1 Separation	191
8.2 Hemp (<i>Cannabis sativa</i> L.)	193
8.2.1. General Information	193
8.2.1.1 Hemp Use	193
8.2.1.2 Cultivation Methods	193
8.2.2 An Overview of Some of the Operations	193
8.2.2.1 Soil Preparation	193
8.2.2.2 Planting	193
8.2.2.3 After Care	193
8.2.3 Harvesting	193
8.2.3.1 Harvesting Methods	193
8.2.3.2 Requirements on Quality of Product	194
8.2.3.3 Machinery and Equipment	194
8.2.4 Threshing	198
8.3 Jute (<i>Corchorus olitorius</i> , <i>Colchorus capsularis</i> L)	199
8.3.1 Historical and Geographical Review	199
8.3.2 Jute Main Properties	199
8.3.3 Natural Condition Requirements	200
8.3.4 Agronomic Requirements	200
8.3.5 Harvesting	201
8.3.5.1 Methods of Harvesting	201
8.3.6 Defoliation and Retting	202
8.3.7 Stripping Fibre from the Stems and Washing	202
8.3.7.1 Traditional Methods	202
8.3.7.2 Modern Processing Methods	203
8.4 Sisal (<i>Agave sisalana</i> L)	205
8.4.1 Historical and Geographical Review	205
8.4.2 The Plant	205
8.4.3 Other Species	206
8.4.4 Basic Tillage and Seed-bed Preparation	206
8.4.5 Planting	206
8.4.5.1 Transplanting Methods	206
8.4.5.2 Planters Suitable for Sisal Seedlings	207
8.4.6 Harvesting	207
8.4.7 Processing	208
IX. MECHANIZATION OF OIL CROPS	209
9.1 Groundnuts (<i>Arachis hypogaea</i> L.)	209
9.1.1 General Information	209
9.1.1.1 Historical and Geographical Peculiarities	209
9.1.1.2 Role in Human and Animal Nutrition	209
9.1.1.3 Botany and Agronomic Requirements	209
9.1.2 Land Preparation	209
9.1.3 Planting	209
9.1.3.1 Seed Shelling and Grading	211
9.1.3.2 Planting Equipment	211
9.1.4 Harvesting	213
9.1.4.1 Harvest Conditions and Methods	213
9.1.4.2 Phases of Harvesting	213
9.1.4.3 Harvesting Technologies	213
9.1.4.4 Methods of Mechanical Harvesting	214

9.1.4.5 Two Phase/Stage Harvesting	214
9.1.4.6 One- phase/Stage Harvesting.....	218
9.1.5 Pod Separating (Pod Combing)	220
9.1.5.1 Stationary Threshers.....	220
9.1.5.2 Picker – thresher (Fig. IX.20)	222
9.1.5.3 Modified Grain Harvesters Used for Groundnuts Harvesting.....	222
9.1.6 Shelling Peanut Pods.....	223
9.1.6.1 Shellers for Large-scale Production.....	223
9.1.6.2 Shellers for Small-scale Production	224
9.2 Soyabean (<i>Glycine max</i> L.)	224
9.2.1 General Information	224
9.2.2 Areas of Soybean Growing	224
9.2.3 Seed-bed Preparation, Sowing and Care	225
9.2.3.1 Seedbed Preparation.....	225
9.2.3.2 Sowing.....	225
9.2.3.3 Care.....	225
9.2.4 Harvesting	225
9.2.4.1 Technological Properties of Soyabean	225
9.2.4.2 Alternatives and Technologies.....	225
9.2.4.3 One-phase Harvesting /Direct Combining	226
9.2.4.4 Two-Phase Harvesting.....	227
9.2.4.5 Modification of Grain Combine Harvester to Harvest Soyabean	228
9.2.4.6 New Advances in Mechanized Soyabean Harvesting	229
9.3 Sunflower (<i>Helianthus annuus</i> L.)	229
9.3.1 Generally about the Sunflower.....	229
9.3.1.1 Importance for Human Diet.....	229
9.3.1.2 Importance for Animal Feeding.....	230
9.3.1.3 Industrial Applications.....	230
9.3.2 Agronomic Requirements.....	230
9.3.3 Mechanized Technology	231
9.3.4 Harvesting	231
9.3.4.1 Conditions to Begin Harvesting.....	231
9.3.4.2 Harvesting Technologies	231
9.3.4.3 Use of Grain Combine Harvester.....	232
9.3.5 Harvesting and Post-harvest Operations Flow.....	234
9.4 Poppy Seed (<i>Papaver somniferum</i> L.).....	235
9.4.1 Generally about the Poppy Seed	235
9.4.2 Growing Operations	235
9.4.3 Sowing	235
9.4.4 Inter-row Cultivation	235
9.4.5 Harvesting	235
9.4.5.1 General Requirements for Harvesting	235
9.4.5.2 Combine Harvesting	236
9.4.5.3 Harvesting Poppy Seed with Special Equipment.....	236
9.4.5.4 Poppy Seed Harvesters.....	236
9.4.5.5 Poppy Seed Attachment for Grain Combine Harvester	238
9.4.5.6 Poppy Seed Threshing	239
9.5 Oil Palm (<i>Elaeis guineensis</i> J.) and Coconut (<i>Cocos nucifera</i> L.)	240
9.5.1 General Information	240
9.5.2 Establishing a Plantation.....	240
9.5.2.1 Jungle Clearing Process	240
9.5.2.2 Jungle Clearing Machines.....	241
9.5.3 Pre-planting Soil Preparation	242
9.5.4 Planting	242
9.5.5 Harvesting	243
9.5.5.1 Oil Palm	243
9.5.5.2 Coconut Palm	243
9.6 Castor Beans (<i>Ricinus communis</i> L.)	243
9.6.1 Castor Beans - General Information	243
9.6.2 Seedbed Preparation, Seeding and After-care	244
9.6.3 Harvesting	244

9.6.3.1 Harvesting Annual Castorbean	244
9.6.3.2 Harvesting Perennial Castorbean	244
9.6.3.3 Machinery for Castor Bean Harvesting	244
9.6.3.4 After-harvest Operations	246
9.6.4 Threshing	246
9.6.4.1 Friction Threshing	246
9.6.4.2 Crushing Principle Threshing	246
9.7 Safflower (<i>Carthamus tinctorius</i> L.)	246
9.7.1 Safflower - General Information	246
9.7.2 Soil and Seedbed Preparation	247
9.7.3 Sowing	247
9.7.4 Harvesting and Threshing	247
9.7.4.1 Direct Harvesting	247
9.7.4.2 Phased Harvest	248
9.7.4.3 Small Safflower Windrower	248
X. MECHANIZATION OF LEGUME GROWING	249
10.1 General Information	249
10.2 Agronomic Requirements, Seedbed Preparation and Planting	249
10.3 Harvesting	249
10.3.1 Technological Properties of Legumes	250
10.3.2 Properties of Individual Legumes	250
10.3.2.1 Peas (<i>Pisum sativum</i> L.)	250
10.3.2.2 Beans (<i>Phaseolus</i> L.)	251
10.3.2.3 Fababeans (<i>Vicia faba</i> L.)	251
10.3.2.4 Lentil (<i>Lens esculenta</i> Medik.)	252
10.3.2.5 Chickpea (<i>Cicer arietinum</i> L.)	253
10.3.3 Harvesting Technologies	253
10.3.3.1 Methods of Harvesting:	253
10.3.3.2 Hand Harvesting	254
10.3.3.3 Direct Combining	254
10.3.3.4 Two-phase Harvesting	254
10.3.4 Machinery for Harvesting Legumes	255
10.3.4.1 Cutting or Pulling	255
10.3.4.2 Parts of Harvesting Machinery Other than Cutterbar	258
10.3.5 Threshing Legumes	259
10.3.5.1 Threshing Units of Special Legume Harvesters	260
10.3.5.2 Modifications of the Threshing Units in Grain Harvesters	261
10.3.5.3 Other Modifications of the Grain Combine Harvester	263
10.4 Special Legume Combine Harvesters and Harvesting	263
10.5 Some Practical Experience with Legume Harvesting	264
10.5.1 Harvesting Dry Beans	264
10.5.2 Cutting and Windrowing	264
10.5.3 Harvest Losses with Conventional Harvest Systems	264
10.5.4 Combine Operations	265
10.5.4.1 Resume of Combine Harvesters	265
10.5.4.2 Combining Operation	265
10.5.5 How to Get a Quality Product	266
XI. MECHANIZATION OF FRUIT GROWING	267
11.1 Citrus (<i>Citrus</i> spp.)	267
11.1.1 Introduction	267
11.1.2 Soil Requirements	267
11.1.3 Plantation Foundation	267
11.1.3.1 Soil Preparation	267
11.1.3.2 Planting	268
11.1.3.3 After Care	270
11.1.4 Pruning	270
11.1.4.1 Pruning Generally	270
11.1.4.2 Vertical Pruning	270
11.1.4.3 Horizontal Pruning	270
11.1.4.4 Light Pruning	271
11.1.5 Citrus Harvesting	273

11.1.5.1 Citrus Harvesting Equipment	273
11.1.5.2 Harvesting Fresh Market Fruits	274
11.1.5.3 Harvesting Citrus Fruit for Processing	275
11.1.6 Transport	275
11.2 Banana (<i>Musa paradisiacal</i> L.)	276
11.2.1 Introduction	276
11.2.2 Soil Requirements	276
11.2.3 Establishing a Plantation	276
11.2.3.1 Establishing a Plantation on Cleared Forestland	276
11.2.3.2 Renewal of Plantation	276
11.2.3.3 Land Preparation	277
11.2.4 Planting	277
11.2.4.1 Banana Planter	277
11.2.5 Harvesting and Transport	277
11.2.5.1 Harvest	277
11.2.5.2 Transport	277
11.3 Pineapple (<i>Ananas comosus</i> L. Merr)	278
11.3.1 Introduction	278
11.3.2 Land Preparation	278
11.3.3 Planting	279
11.3.3.1 Planting Material and Techniques	279
11.3.3.2 Mechanical Planter	279
11.3.4 Harvesting	279
11.3.4.1 Preconditions for Mechanical Harvesting	279
11.3.4.2 Setting Up Proper Harvesting Time	280
11.3.4.3 Manual Harvesting	280
11.3.4.4 Mechanical Harvesting	280
11.3.4.5 Full Mechanical Harvesting	280
XII. MECHANIZATION OF SEASONING PLANTS	283
12.1 Tea (<i>Camellia sinensis</i> L.)	283
12.1.1 Crop Description	283
12.1.2 Climate	283
12.1.3 Plantation Establishment	283
12.1.3.1 Land and Soils	283
12.1.3.2 Crop Rotation and Main Tillage	283
12.1.4 Seeding and Planting	285
12.1.4.1 Nursery Foundation	285
12.1.4.2 Planting in the Plantation	285
12.1.5 After Care	285
12.1.6 Pruning and Training	285
12.1.7 Harvesting (Plucking)	287
12.1.8 Haulage of Tea Leaves	293
12.1.9 Processing	294
12.1.9.1 Classic Method	294
12.1.9.2 Modern Method	294
12.2 Coffee (<i>Coffea arabica</i> L. and <i>Coffea canephora</i> , var. Robust)	295
12.2.1 Crop Description and Agronomic Requirements	295
12.2.1.1 Main Growing Areas	295
12.2.1.2 Mechanization Point of View	295
12.2.1.3 Shades Requirements	295
12.2.2 Plantation Establishment	296
12.2.2.1 Planting	296
12.2.3 Pruning	296
12.2.3.1 Importance of Pruning	296
12.2.3.2 Pruning and Mechanical Harvesting	297
12.2.4 Harvesting	298
12.2.4.1 Hand-harvesting and Hand-harvesting Equipment	299
12.2.4.2 Mechanical Harvesting	299
12.2.4.3 Brazil Made Coffee Harvesters	300
12.2.4.4 Preparing the Plantation for Mechanical Harvesting	300
12.2.4.5 Advantage of Mechanical Harvesting	302

12.2.5 Processing	302
12.2.5.1 Wet Method	302
12.2.5.2 Dry Method	303
12.2.5.3 Hulling Machines	304
12.3 Tobacco (Nicotiana L.)	304
12.3.1 Crop Description and Agronomic Requirements	304
12.3.2 Planting and Preparation	304
12.3.3 After Care	3055
12.3.4 Harvesting	306
12.3.4.1 Hand Harvesting	3066
12.3.4.2 Mechanical Harvesting	3066
12.3.4.3 Machines for Tobacco Harvesting	3088
12.3.5 Haulage of Leaves	310
12.3.6 Housing and Curing	310
USED AND RECOMMENDED LITERATURE	312
