

# Table of contents

	V
Organisation	XIII
Preface	XV
Acknowledgements	XVII
<b>Section 1</b>	
<b>Design and implementation of underground constructions – conventional tunnelling and cut-and-cover tunnels</b>	1
<b>NATM – The Austrian Practice of Conventional Tunnelling - Invited Lecture</b>	3
<i>R. Galler</i>	
<b>Construction of the North-South-Metro Line in Cologne and the accident on March 3<sup>rd</sup>, 2009 - Invited Lecture</b>	14
<i>A. Haack</i>	
Design and construction issues of a motorway tunnel close to an active fault	19
<i>A. Alexandris, E. Griva, M. Abarioti, P. Vettas, J. Makadasis, J. Bournazos</i>	
Královopolské Tunnels – Project Description, Summary of Construction Progress	25
<i>J. Bača, V. Dohnálek</i>	
Bujanovský tunnel – proposal for reconstruction of the longest double track railway tunnel in Slovakia	37
<i>M. Bakoš, I. Šnauková</i>	
Experiences with tunnel excavation in Scandinavia	43
<i>P. Balušik</i>	
The Královská obora tunnel – reasons of Emergencies occurrence and their liquidation methods	52
<i>A. Butovič, J. Kvaš, M. Padevêt</i>	
The Královská obora (King's Game Park) Tunnel – Plan, Realization and Redevelopment Works Inspection	62
<i>A. Butovič, J. Múhl</i>	
Design of underground structures for new London railway system – Crossrail Project	70
<i>A. Caravanas, P. Salák</i>	
"D8 - 805 Lovosice Řehlovice" Part E - the Prackovice tunnel	75
<i>D. Cyroň, J. Svoboda, J. Suchý</i>	
Grouting operations in Iceland: Problems of injecting chemical grout using the pre-grouting method on the Héðinsfjarðargöng project	82
<i>D. Cyroň, V. Pavlovský, I. Piršć, P. Kučera</i>	
Fibre sprayed concrete relevant test of characterization to choice the right fibre for the right used.	86
<i>B. de Rivaz</i>	
Wenceslas Square Utility Tunnel in the centre of Prague – from design to completed construction	90
<i>F. Dvořák, L. Zapletal, D. Kuplík</i>	
Traditional systems for the construction of tunnels in difficult ground	97
<i>A. Focaracci</i>	
Design of underground stations Nivy and Centrum within the construction of the railway corridor interconnection in Bratislava	105
<i>M. Frankovský, J. Snopko, T. Marcher</i>	
Exploratory gallery excavation – soapstone deposit Gemerská Poloma	109
<i>J. Gatiaľ, M. Oravec</i>	
Efficient conventional tunnelling - the Bibra railway tunnel in Germany	112
<i>B. Gisi, S. Schöbel</i>	
Tunnels on the 4th railway corridor from Benešov to České Budějovice	119
<i>M. Gramblička, M. Marek</i>	
Design and construction of permanent waterproof tunnel linings based on sprayed concrete and spray-applied double-bonded membrane	121
<i>K. G. Holter, R. Bridge, O. Tappy</i>	

Královo Pole tunnel in Brno – Expectations and Reality from the Designer's Point of View <i>V. Horák, L. Kosík, J. Pechman, J. Rožek</i>	127
Construction of Mypra Drop Shaft and Nad Královskou oborou Ventilation Shafts - Blanka Tunnel Complex <i>P. Kacíř, M. Kula, J. Augusta, O. Kostohryz</i>	134
Geodetic works at the Tunnel Driveage and their Influence on the Break Through <i>T. Kárník</i>	140
Underground Stations of Operating Section V. A in Prague <i>M. Kochánek, J. Kácovský, P. Šýs, J. Lipovčan</i>	143
Cut-and-cover parts of the Královo Pole tunnels <i>L. Kosík</i>	151
Design for and implementation of additional stabilization measures for Špelc tunnel within the Královská Obora section <i>P. Kučera, J. Kvaš</i>	157
"Královská obora" Tunnel <i>J. Kvaš, J. Škrábek, M. Salač</i>	160
Influence of optimisation of the technical solution for executing tunnels on construction lot 513 of the Prague City Ring Road <i>L. Mařík, V. Prajzler, J. Hořejší, V. Petráš, R. Bohman</i>	167
The Upgrade to Prague – Kladno rail line; stage 1 with a link to the Ruzyně Airport. <i>J. Martinec, P. Zobal, J. Lipovčan</i>	175
Designing of the utility tunnel Revoluční – Dlouhá <i>P. Menger, O. Fabián</i>	182
Tunnels on the Radlice Radial Road <i>A. Merta, V. Petržílka, A. Havrda</i>	188
History of PERI Steel Formworks, Reconstruction of Jablunkov Tunnel. <i>P. Merta</i>	193
Brusnice Tunnel in Prague <i>J. Němeček, T. Louženský, M. Novotný</i>	198
Pořana tunnel <i>B. Neuschl</i>	203
Evaluation Tunnel structures on the D3 motorway in the Central Bohemian Region <i>K. Novosad</i>	209
Problems of tunnel portals in slide areas <i>K. Novosad</i>	215
Tunnelling the Prague tunnel 513 Vestec - Lahovice with a use of exploration gallery as an access driveway <i>A. Petko</i>	221
Diaphragm walls carried out with the use of a trench wall cutter on a trenched section of the Blanka tunnel complex construction at Letná <i>L. Petrá</i>	225
Waterproofing Systems at the Blanka Complex of Tunnels in Prague <i>V. Petržílka, P. Šourek</i>	229
Reconstruction of mass public transport crossing point Prague Dejvice <i>J. Pitín, V. Valeš, P. Zobal</i>	237
Highway Tunnel Klimkovice – Experience from Construction <i>B. Polák</i>	243
Urban tunnel in Český Krumlov – Feasibility study <i>V. Prajzler</i>	245
Nouzov ventilation station of tunnels on construction lot 513 of Prague city ring road – design and construction <i>V. Prajzler, L. Mařík, R. Bohman, J. Kraliček, J. Fiala</i>	252
Design and construction of metro tunnels excavated by conventional techniques under the severe seismic condition of Istanbul <i>G. Quaglio, G. Astore, P. Grasso, O. Angelini, M. Oguz</i>	259

Lessons learned – review of recent sequential excavations <i>K. Rossler, M. Salač, J. Škrábek</i>	268
Repair of the Route "C" of the Wenceslas Square Utility Tunnel <i>V. Sálus, J. Jánický</i>	276
Blanka complex of tunnels on city circle road in Prague <i>P. Šourek, L. Šajtar, A. Butovič</i>	281
Traditional Cut and Cover Tunnels on the Blanka Complex of Tunnels, Prague <i>P. Šourek, V. Petržílka, P. Kasal, M. Šístek</i>	291
Cover-and-cut tunnels on the Blanka complex of tunnels in Prague <i>P. Šourek, L. Grünwald, J. Kuřák, M. Remeš</i>	300
Completion of City Circle Road in Prague <i>P. Šourek, L. Rákosník, P. Hanuš, M. Hrdlička</i>	311
Securing a deep foundation pit for a technological centre of the Královopolský tunnel <i>J. Šperger, P. Průcha</i>	319
Modern Transport tunnels under Indian Himalayas <i>M. Srb, M. Hilar, P. Svoboda</i>	323
Construction of the second tube of the Horelica motorway tunnel <i>J. Svoboda, M. Hnilička</i>	327
Watertight sprayed concrete for road tunnels <i>M. Thewes, G. Vollmann, R. Breitenbuecher, H. Rahm, F. Heimbecher, I. Kaundinya</i>	333
SAT 2A – cut and cover tunnels <i>Z. Podráský, P. Kalabis, T. Kohout, M. Tocháček</i>	340
Future safeguarding design of a metro station for New Doha International Airport <i>J. H. Rodwell, M. Yesugey, M. Uhrin</i>	344
The Conventional tunnelling excavation a universal excavation method for different rock formations <i>K. - H. Wennmohs</i>	355
The Brusnice Tunnel <i>M. Zelenka, M. Salač</i>	358
The First Driven Tunnel in Poland – Laliki – Project and Construction <i>R. Zwilling</i>	362

## Section 2

<b>Design and implementation of underground constructions – mechanised tunnelling</b>	369
<b>Shield tunnelling technology for increasingly difficult site conditions - Invited Lecture</b> <i>M. Thewes</i>	371
Innovation in the Tunnel Boring Machine Industry <i>K. Bäßler</i>	380
Presentation of special long-life tools for EPB applications in which cutterhead maintenance is expensive/problematic (high pressure under hyperbaric conditions) <i>A. Busillo, S. Lupi, G. Fumagalli, R. Ginanneschi</i>	384
Delhi Metro: Experience gained during the construction of BC 24 Contract <i>C. R. Mann, C. Mookhan</i>	388
TBM tunnels for Kárahnjúkar Power Station <i>A. Caravanas</i>	395
Interconnection of TEN-T railway corridors with the airport and rail system in Bratislava <i>V. Chomová, I. Kačo</i>	402
Preparing the Bratislava "zero" motorway ring <i>V. Chomová, M. Jurkovič, M. Frankovský</i>	408
Railway tunnels in project TEN-T in difficult conditions in Petržalka – Bratislava <i>M. Dávid, J. Martinec, J. Sedmidubský</i>	413
Large diameter micro-tunnelling in Karviná <i>V. Drobík, K. Franczyk</i>	419
At the "Labe-Loučná" construction site in Pardubice, non-mechanised pipe jacking <i>I. Fryč</i>	423

Planning of underground constructions located at 3rd corridor from Prague to Pilsen up to German boarder	429
<i>M. Gramblička, L. Píkhartová, J. Velebil</i>	
Road Tunnel TBM for Calming Down Traffic in the Centre of Prague	432
<i>J. Růžička, O. Hasík, J. Kykal</i>	
New Connection – railway tunnels below the centre of Prague	437
<i>O. Hasík, V. Pátek, P. Višňák</i>	
Risk of a high hydrostatic pressure on the tunnel Prague – Beroun	441
<i>M. Hilar, M. Srb, J. Nosek</i>	
Modern pre-injection in underground construction with rapid setting microcements and colloidal silica	445
<i>K. G. Holter, H. O. Hognestad</i>	
Driven Running Tunnels for the V.A Metro Line in Prague	452
<i>M. Kochánek, J. Růžička, J. Korejčík, P. Višňák</i>	
The truth about soil conditioning: dos and don'ts	457
<i>L. Langmaack</i>	
New Pedestrian Subway in Prague	462
<i>J. Němeček, T. Louženský, M. Novotný</i>	
Finne tunnel - ice rail line Erfurt – Leipzig / Halle a TBM driven advance with single-shell tunnel lining	466
<i>R. Pechhacker</i>	
New experience with roadheaders in hard rock tunnelling applications	471
<i>U. Restner, J. Pichler</i>	
Steel Fiber Reinforced Concrete (SFRC): the Use of SFRC in Precast Segment for Tunnel Lining	479
<i>B. de Rivaz</i>	
Ústí nad Orlicí – Choceň rail link along a new alignment	487
<i>J. Velebil, J. Korejčík, M. Gramblička</i>	
Study on pile underpinning of shield machine crossing through the pile foundation of Shajinggang Bridge and its 3D numerical analysis	492
<i>Q. W. Xu, X. F. Ma, H. H. Zhu, X. R. Ge, Z. Z. Ma</i>	

## Section 3

<b>Geotechnical investigation, monitoring and risk management</b>	499
<b>Current State of Investigation, Monitoring, and Risk Management - Invited Lecture</b>	501
<i>W. Schubert</i>	
Monitoring during the construction of the Myslbekova – Pelc-Tyrolka section of the City Ring Road	506
<i>J. Augusta</i>	
Stabilization and Seepage Control Measures Suggested at 100 Yrs Old Parsik Tunnel of Central Railways	514
<i>M. N. Bagde, A. K. Soni, A. Sinha</i>	
Šibenik tunnel primary lining design based on assessment of potential geotechnical risks	518
<i>M. Bakoš, I. Šnauková</i>	
The comparison of certain classical geotechnical terms for underground structures with terminology for deep radioactive waste repositories. A geophysicist's view	522
<i>J. Bárta</i>	
Deformations of southern portal of Prackovice tunnel during construction	528
<i>J. Barták, O. Čejka</i>	
Indetshock system in blasting tunnels, adjustments of blasting charge, calculations	534
<i>L. Bartoš, L. Bartoš jun.</i>	
Risk Management in Infrastructure Projects (Mypra Tunnel, Prague)	538
<i>F. Blindow, M. Padevėt</i>	

Prague - Beroun, new railway connection – geotechnical survey in extravillan for a tunnel with a high overburden in the Czech Republic <i>L. Bohátková, J. Bohátka</i>	542
Issues of Geotechnical Surveys for Underground transport Constructions in City Intravillans <i>J. Bohátka, L. Bohátková</i>	548
Monitoring seepage of groundwater into the Stockholm Metro tunnels <i>S. Celander, T. Strång</i>	552
Tunnels in Baltimore Railroad Study <i>J. Cermak, W. B. Frank</i>	559
Experience with Use of Geotechnical Monitoring Results Obtained in New Type of Exploratory Galleries for Subsequent Excavation of Slivenec Tunnel in Prague <i>R. Chmelář, L. Síla, R. Bernard</i>	566
VMO Dobrovského, tunnel II, consolidation and partial sealing of uncompacted soil in the overburden rock of galleries IIa and IIb <i>Z. Cigler</i>	575
Program of measurements during excavation by blasting of "Katarina" tunnel <i>M. Dobrilović, V. Bohanek, V. Škrlec, Z. Karlovac</i>	580
Evaluation of the Klimkovice Tunnel secondary lining temperature measurement results <i>L. Ďuriš, J. Aldorf</i>	587
Kralovopolske Tunnels in Clays: Comparison of Deformation Response to Excavation – Estimation vs. Reality, Influence of Pilot Gallery and Extra Measures <i>T. Ebermann, M. Janec, V. Veselý, L. Kosík, D. Rupp, O. Pazdírek</i>	594
Supporting Measurements at Execution of Compensation Grouting in the Královo Pole Tunnels Project - VMO (the Big City Ring) in Brno <i>P. Hlaváček, P. Havel</i>	601
Evaluation Kralovopolske Tunnels in Clays: The Impact of Deformation on Surface Buildings – Response to Excavation <i>O. Hort, T. Ebermann, M. Rychtecký, J. Lossmann, M. Polák</i>	607
Tunnels in Flysch Environment – Geotechnical Risk, Practical Experience <i>V. Veselý, O. Janděšek</i>	614
The Seismic Loading of Underground Bridge above Medieval Mine <i>Z. Kaláb, J. Knejzlík, M. Lednická</i>	619
Risk Management by Means of Geotechnical Monitoring during Královská obora Tunnel Construction <i>O. Kostohryz, A. Rozsypal</i>	626
BARAB information system for monitoring <i>J. Lossmann, T. Mikolášek, P. Jakubová</i>	631
Ways of application of convergence measurements for prediction of geotechnical conditions for excavation of tunnels <i>R. Marek, J. Aldorf</i>	638
Influence of disintegration tool on vibration signal in rock disintegration process <i>V. Míklušová</i>	643
The technology of compensation grouting used for the Královopolské Tunnels project on the Big City Ring in Brno <i>J. Mühl, P. Maláč, J. Mráz</i>	647
Estimating roadway tunnel stability in polish carpathian flysch <i>Z. Niedbalski, T. Majcherczyk</i>	654
The Use of Classic Convergence Measurement during the Assembly of TOM-2 Cut-and-Cover Constructions <i>J. Pacovský, R. Vašíček</i>	660
Tunneling through tectonic broken Liben shales in km 5,930 – 5,630 – tunnel Špejchar – Pelc-Tyrolka of the tunnel Blanka complex <i>M. Plíšková, M. Jaso, R. Chmelář, L. Síla</i>	667
Real time monitoring during the Budapest metro line 4 construction <i>N. Poitrineau, E. Gastine</i>	669

Experimental tests on tunnel precast segmental lining with fiber reinforced concrete <i>P. Romualdi, M. Moccichino, P. Perruzza, A. Caratelli, A. Meda, Z. Rinaldi</i>	672
The Královo Pole Tunnels – The Concept of Monitoring and The Knowledge Obtained from Its Implementation in the Urban Area <i>D. Rupp, J. Lossmann</i>	678
Geotechnical Monitoring during the Excavation of the Utility Tunnel under the Wenceslav Square <i>V. Sálus, J. Šilhavý</i>	683
HBZS Stabilized Mixture <i>P. Šarboch</i>	688
Investigation of Adherence Behaviour and Related Effects on different Scales in Mechanical Tunnel Driving <i>G. Spagnoli, T. Fernández-Steege, R. Azzam, M. Feinendegen, H. P. Neher, H. Stanjek</i>	692
Knowledge from the Geotechnical Survey and Monitoring of the Near-Portal Sections of the Klimkovice Tunnel <i>J. Stach</i>	700
Elimination of the emergency state of rocky walls and slopes in portal adjacent areas of tunnels <i>V. Tóth, B. Prelovský, M. Novák</i>	706
The Geotechnical Monitoring of the tunnel Vestec – Lahovice construction at the Prague Ring Road, Construction 513 <i>I. Zemánek, L. Vydrová</i>	712

## Section 4

### Modelling underground structures

#### New challenges in numerical modelling - Invited Lecture

<i>A. H. Thomas</i>	721
Numerical simulation of surface deformation due to compressed air tunnelling <i>A. Chinkulkijniwat</i>	726
Analysis of cracking in tunnel lining segments <i>A. Focaracci</i>	730
Design of parallel non-circular tunnel linings constructed in urban areas with the application of grouting <i>N. N. Fotieva, N. S. Bulychev, P. V. Deev</i>	738
Prackovice Tunnel – Prague's Portal Modelling and Construction <i>M. Hilar, M. Srb, J. Nosek</i>	742
Probabilistic Designing of Bolted Support <i>P. Janas, M. Krejsa, R. Šrůpárek, V. Krejsa</i>	746
New tunnels on the railway line Blažovice – Nezamyslice <i>J. Ježek, M. Gramblička, F. Pták, P. Soukup</i>	753
NATM Tunneling in Soft Ground – Numerical Modelling Techniques for Urban Areas <i>F. Jiricny, T. Marcher, R. Šabata</i>	756
Vinohrady Tunnel in Brno – FEM Modeling of Behavior of Specific Environment for Tunnel Driving <i>O. Krásný, O. Holý</i>	761
The Review of current rock mass characterization practices <i>C. Leber, W. Schubert</i>	765
Artificial ground freezing in the Limmat project: Assessment of frozen body closure <i>S. Papakonstantinou, E. Pimentel, G. Anagnostou</i>	771
LHS as a Tool for Input Data <i>J. Pruška, M. Šedivý</i>	777
Design of Sheet Piling for the Prague Metro Operation System IV. C 2nd Phase Using GEO5 Software <i>J. Pruška, J. Kopečný</i>	783
Subsidence Induced by the Brescia Metrobus Tunnel Excavation (Italy) <i>A. Sanzeni, L. Zinelli, F. Colleselli</i>	789

Convergence-confinement method for simulating NATM tunnels evaluated by comparison with full 3D simulations <i>T. Svoboda, D. Mašín</i>	795
Determination of development of elastic modulus value for primary steel concrete reinforcement according to cooperative-ring-exchange theory <i>K. Vojtasík, E. Hrubešová, M. Mohyla, J. Staříková</i>	802
An estimate of the ground subsidence curve above an opening in grained soil <i>K. Vojtasík</i>	805
Evaluation Of The Tunnel Lining Bearing Capacity <i>J. Zlámal</i>	808

## Section 5

<b>Equipment, safety and maintenance of underground structures</b>	813
<b>Safety and maintenance of tunnels - Invited Lecture</b>	815
<i>J. G. Arnaudet</i>	
Traffic management and safety in a road three-tunnel system <i>R. P. Arenas, S. R. Ortiz</i>	818
Supplying Central Prague with Energy <i>O. Čapek</i>	824
Utilization of Mathematical Model in Fire Safety Design for the Komořany Tunnel <i>I. Bradáčová, A. Dudáček, P. Kučera</i>	828
Cable Tunnels of PREdistribuce, a.s. Assesment of Functioning after First Year of Operation <i>P. Fatka, P. Sláma</i>	833
Italian Risk Analysis Method <i>A. Focaracci</i>	837
Safety in tunnels: innovation and tradition <i>A. Focaracci</i>	846
Width arrangement of the highway tunnels in Slovakia, pluses and minuses of the development in the previous period <i>M. Frankovský</i>	852
Risk Assessment of Road Tunnels – New Developments <i>B. Kohl, Ch. Zulauf</i>	856
The road and freeway network tunnels Administered by the Road and Motorway Directorate of the Czech Republic <i>A. Lebl</i>	862
Tunnel safety management in the Netherlands <i>S. A. Lezwijn, T. Reitsma, P. de Kok</i>	869
Reinstating of the Banskobystrický railway tunnel <i>P. Makásek, J. Svoboda</i>	876
Safety Documentation of the Radejčín Tunnel in the phase of Building Licence <i>J. Možná, J. Svoboda</i>	880
Technological equipment of road tunnels in the Czech Republic and Slovakia: projects and execution <i>M. Novák, V. Mišárek, D. Benda</i>	885
Refurbishment of the ventilation system of the Elbe tunnel in Hamburg <i>P. Pospíšil</i>	894
Training of tunnel operators – State of the art in the Czech Republic <i>P. Příbyl</i>	898
Safety Documentation of the Strahov Road Tunnel in Prague <i>L. Rákosník, J. Zápačka, L. Ferkl, O. Nývlt, S. Přívara</i>	903
Risk analysis for 25 km long railway tunnel Prague – Beroun <i>R. Šabata, Ch. Neumann</i>	907

Tunnel operating control and education <i>F. Schlosser, Š. Šedivý</i>	914
Application of linear heat sensor for fire detection in railway tunnels <i>A. Schöbel, T. Maly, J. Grübl, G. Zapf</i>	918
Measurement of Atmospheric Influence on Tunnel Lining and on Steel Interior Equipment <i>J. Svoboda, M. Hnilička</i>	922
Post-disaster, underground communications <i>S. J. Ward, W. Farjow, S. Parsons</i>	927
Maintenance of Tunnels Operated by the Road and Motorway Directorate of the Czech Republic <i>R. Zelenka, B. Goldberger, A. Lebl</i>	932

## Section 6

### Contractual relationships, funding and insurance for underground structures

#### Why not Underground? - Invited Lecture

<i>H. Wagner</i>	941
Contractual Relations and Financing of the Construction of the Břežno Tunnel <i>J. Heřt, M. Majer</i>	946
Legal Risks of Underground Constructions <i>D. Hruška</i>	950
Implementation of underground constructions vs. ownership right to real <i>V. Kacálek</i>	962
The Dief and Koží Chrbát Tunnels within the Slovak R1 section between Slovenská Ľupča and Korytnica. <i>L. Píkhartová, M. Gramblička</i>	965
Tunnelling in Iceland – Contractual Problems and their Settlement <i>E. Stehlík</i>	969
Money Isn't Everything, or Is It? <i>B. Welburn, P. Villard</i>	973
