

Contents

List of Participants	5
Gray, E.: Introduction	7
Reviewed Papers	9
Bartoncová, L.: Methodology for Analyzing Communication between Students Working in Pairs	9
Boz, N.: 'Knowing That' and 'Knowing Why': Prospective Teachers' Subject Matter Knowledge of Variables	15
Doraisamy, L.: Solving Algebra Problems: The Influence of Structuring Resources in the Setting	21
Doritou, M.: An Investigation into People's Number Forms: Comparing with Galton	31
de Hoyos, M. G.: Students' Problem Solving Processes: Two Distinct Categories	39
Kopáčeková, A.: How Not Only Czech Students Think about Functions	47
Prokopová, M.: Students' Conception of a Point: A Comparison of Phylogenesis and Ontogenesis	53
Roubíček, F.: Semiotic Approach as a Methodological Basis in the Didactics of Mathematics	59
Zakaria, N.: Knowledge Transfer Across Subject Boundaries: a Study on Calculus and Physical Chemistry	67
Short Contributions	75
Herman, J.: Transition from Numerical Word Problem Assignment to the Assignment Containing Algebraic Elements	75
Petrová, J.: Suggestions From Research for Improving Mathematics Instructions for Bilinguals	77

Pěchoučková, Š.: Geometric Thinking of Young Children	79
Šebánková, L.: The Role of the Context in Problems	83
Výbohová, D.: Teaching of Physics and Technical Education in Combined Blocks	87

Keynote Presentations	91
------------------------------	-----------

Hejný, M., Hanušová, J.: Analysis of a Pupil's Solution of a Problem on Angles – Workshop	91
Simpson, A.: People's Perceptions or Perceptions of People: Comparing Phenomenographic and Grounded Approaches in Mathematics Education Research	93
