Preface	5
List of Abbreviation	6
Introduction	9
1 Memory institutions in Czechia	11
1.1 Libraries	11
1.2 Archives	13
1.2.1 Archive Groups in the Czech Republic (PeVa)	13
1.2.2 Badatelna.eu portal	14
1.3 Museums and galleries	15
1.3.1 Museums in Czechia	15
System Demus	15
System Bach ProMuseum	16
Central Registry of Museum-type Collections (CES)	16
Museum Authorities project	17
Register of Fine Art collections	18
2 Information Technologies Context	19
2.1 Application of database technologies in memory institutions	19
2.2 Advent of the Internet	20
2.2.1 Hypertext technology	20
2.2.2 World Wide Web	20
2.2.3 Semantic Web	21
2.2.4 Linked Data	22
2.3 Metadata standards used by memory institutions	22
2.3.1 Data Content standards	25
Anglo-American cataloguing rules (AACR)	25
Resource Description and Access (RDA)	25
Cataloguing of Cultural Objects: a Guide to Describing Cultural Works and Their Images (CCO)	26
International Standard Archival Description (General) – ISAD (G)	27
International Standard Archival Authority Record (Corporate Bodies, Persons and Families)	27
Describing Archives: A Content Standard (DACS) – national application of ISAD (G)	28
Basic Rules of Archival Processing	28
2.3.2 Data structure standards – metadata schemes applied in memory institutions	29
MARC format	30
Bibliographic Framework (BIBFRAME)	31
Categories for the Description of Works of Art (CDWA)	32
VRA core categories (VRA)	33
Encoded Archival Description (EAD)	33
2.3.3 Conceptual Data Models developed by memory institutions communities	34
The FRBR family of conceptual model models (FRBR, FRAD, FRSAD) FRBR _{oo}	34

2.3.4 CIDOC CRM	39
Conceptual model for archival description	40
2.4 Conclusion – what we have learned	40
3 INTERMI conceptual model	42
3.1 The role of National Authority files in making available digital content in Czechia	43
3.1.1 Strengths of traditional authority files	43
3.1.2 Weaknesses of traditional authority files	43
3.1.3 National Authority files applied in the INTERMI project	44
3.2 Principles of object-oriented paradigm	44
3.3 Relationships between entities in INTERMI conceptual model – event-centric approach	45
3.4 Key elements of INTERMI conceptual model: entities and relationships	47
3.4.1 Brief characteristics of class of entities used in INTERMI project	48
Class of entities: Person/Creature	48
Class of entities: Family	48
Class of entities: Corporate body	48
Class of entities: Geographic object	49
Class of entities: Work	49
Class of entities: Event	50
Class of entities: General concept	50
3.5 Application of INTERMI conceptual model	50
3.5.1 INTERMI knowledge model rules	50
INTERMI rules for entities appellation	51
INTERMI rules for dates in entity description	52
3.5.2 INTERMI rules for mapping of controlled vocabularies, registries etc. used in memory institutions	52
The role of Topical authorities	54
4 The model of cooperation and the plan of INTERMI knowledge database operation	55
4.1 Groups of users in INTERMI operation	55
4.2 Technological components of INTERMI knowledge database operation	56
4.2.1 Data storage and database system, application server and web server	56
4.2.2 Web interface for data processing	60
4.2.3 Web interface for searching and data presentation	63
4.2.4 Web interface for administration of users account and access rights	64
4.2.5 Technologies for communication with other systems – web services, Z39.50 server	64
5 Conclusion	68
References	69
List of figures	74
List of tables	74
