Introduction

1. Defining health institutions' strategic and operational goals following evaluation of the economic indexes

1.1. Strategic goals of health institutions

1.2. Operational goals of health institutions

2. Determining standardization criteria for evaluation of economic and financial indexes

2.1. Finding the key metric for index and analysis evaluation

3. Basic ratio determination and calculation

3.1. Profitability index

3.1.1. Return on sales

3.1.2. Return on costs

3.1.3. Cost ratio

3.1.4. Return on assets

3.1.5. Return on capital employed

3.1.6. Return on equity

3.2. Activity (turnover) ratio

3.2.1. Inventory turnover

3.2.2. Average collection period

3.2.3. Creditors payment period

3.3. Indebtedness index

3.3.1. Overall indebtedness ratio

3.3.2. Equity ratio

3.3.3. Debt – equity – ratio

3.3.4. Dynamic level of indebtedness

3.3.5. Interest coverage

3.4. Liquidity ratio

3.4.1. General liquidity

3.4.2. Available liquidity

3.4.3. Immediate liquidity

3.5. Development of profit (loss) before tax

4. Financial analysis – Horizontal and vertical analysis

4.1. Horizontal analysis:

4.1.1. Profit and loss statement, an example

4.1.2. Balance sheet, an example

4.1.3. Cash Flow, an example

4.2. Vertical analysis:

4.2.1. Balance sheet, an example

5. Total evaluation indexes

5.1. Pyramid index systems

5.2. Systems of purposefully chosen indexes

5.2.1. Bankruptcy models

5.2.1.1. IN Model credibility index

5.2.2. Credibility models

5.2.2.1. Kralicek's Quick Test

6. Balanced Scorecard (BSC) – a tool for evaluation of strategic values, areas and prospects in health institutions

6.1. Finances

6.2. Innovations

6.3. Growth

6.4. Internal processes and learning
