

CONTENTS

INTRODUCTION.....	7
1. CORPORATE FINANCE.....	17
1.1 COMPANY'S LONG-TERM FINANCIAL MODEL	18
1.2 PYRAMIDAL DECOMPOSITION OF FINANCIAL INDICATORS	24
1.3 OPTIMIZING THE PROJECTS SELECTION UNDER DETERMINISTIC CONDITIONS.....	35
1.4 INTERNATIONAL CASH-MANAGEMENT	39
1.5 OPTIMIZATION OF AN OWNERSHIP STRUCTURE	42
1.6 SELECTED REFERENCES	46
2. BONDS.....	49
2.1 YIELD CURVES	50
2.2 DEDICATED PORTFOLIO	54
2.3 SWAP PORTFOLIO	58
2.4 IMMUNIZED PORTFOLIO.....	61
2.5 PORTFOLIO OPTIMIZATION UNDER PROBABILITY CONSTRAINTS.....	68
2.6 BOND CREDIT RISK.....	73
2.7 SELECTED REFERENCES.....	76
3. STOCKS	79
3.1 OPTIMAL PORTFOLIO OF ASSETS (STOCKS, FOREIGN EXCHANGE RATES) AND EXPECTED UTILITY FUNCTION	80
3.2 MARKOWITZ MODEL – EFFICIENT SET CONSTRUCTION.....	83
3.3 BLACK'S MODEL – EFFICIENT SET CONSTRUCTION.....	89
3.4 TOBIN MODEL - EFFICIENT SET CONSTRUCTION	90
3.5 COMBINATION OF EFFICIENT SETS.....	94
3.6 APPLICATION OF VALUE AT RISK METHODOLOGY FOR A PORTFOLIO OF STOCKS	98
3.7 SELECTED REFERENCES.....	104
4. SIMULATING THE RANDOM EVOLUTION OF FINANCIAL ASSETS.....	107
4.1 SIMULATING THE RANDOM EVOLUTION OF FINANCIAL ASSET PRICES	108
4.2 SIMULATION OF INTEREST RATE EVOLUTION	116
4.3 SIMULATING THE VALUE OF THE PORTFOLIO OF FINANCIAL ASSETS.....	119
4.4 SELECTED REFERENCES.....	131
5. OPTIONS.....	133
5.1 BINOMIAL MODEL OF PRICING FINANCIAL DERIVATIVES ON STOCKS, INDICES AND CURRENCIES	134
5.2 THE BINOMIAL MODEL TO PRICE INTEREST RATE DERIVATIVES.....	143
5.3 THE BLACK – SCHOLES MODEL TO PRICE OPTIONS	148
5.4 OPTIONS HEDGING.....	152
5.5 THE ANALYTICAL DELTA VAR METHOD.....	158
5.6 SELECTED REFERENCES.....	167

6. DETERMINATION OF FINANCIAL MODELS' INPUT PARAMETERS INCLUDING STATISTICAL TESTS	171
6.1 UNCONDITIONAL ESTIMATION OF PARTICULAR STOCK PARAMETERS BY THE HISTORICAL DATA APPROACH	172
6.2 THE EXPERT'S APPROACH TO ESTIMATE STOCK PARAMETERS	177
6.3 ESTIMATION OF THE SINGLE-INDEX MODEL	179
6.4 ESTIMATING THE PARAMETERS OF RANDOM PROCESSES BY LSM	185
6.5 VOLATILITY FORECASTING BY THE GARCH AND THE EWMA MODEL	187
6.6 SELECTED REFERENCES	194
7. FINANCIAL MODELS UNDER RISK AND VAGUENESS	197
7.1 FUZZY AND FUZZY-STOCHASTIC APPROACH	198
7.2 SELECTED REFERENCES	213
CONCLUSIONS	215
APPENDIX	219
APPENDIX I CHOSEN FINANCIAL FUNCTIONS	220
APPENDIX II OPERATIONS WITH VECTORS AND MATRICES	223
APPENDIX III LINEAR PROGRAMMING IN EXCEL BY SOLVER	227
APPENDIX IV ESTIMATION OF THE MULTIFACTOR REGRESSION LINE BY THE REGRESSION MODULE	229
APPENDIX V REGRESSION ESTIMATING BY THE MAXIMUM LIKELIHOOD METHOD	236
LIST OF EXERCISES AND TABLES WITH SOLUTION	237
REFERENCES	241
SUBJECT INDEX	249
