

Contents

Preface	viii
Acknowledgments	xi
Chapter 1 Geographical Information Science and maps	1
1.1 The map as an interface	1
1.2 Geospatial data	3
1.3 Geographic information systems	8
1.4 Geospatial analysis operations	11
1.5 The spatial data infrastructure and maps	17
Further reading	19
Chapter 2 Data acquisition	20
2.1 The need to know acquisition methods	20
2.2 Vector file characteristics	22
2.3 Raster file characteristics	23
2.4 Deriving data from existing maps	25
2.5 Working with digital data	29
2.6 Control and accuracy	35
Further reading	38
Chapter 3 Map characteristics	39
3.1 Maps are unique	39
3.2 Definitions of cartography	40
3.3 The cartographic communication process	44
3.4 Map functions and map types	48
Further reading	50
Website	50
Chapter 4 GIS applications: which map to use?	51
4.1 Maps and the nature of GIS applications	51
4.2 Cadastre and utilities: use of large-scale maps	51
4.3 Geospatial analysis in geography: use of small-scale maps	54

4.4	Geospatial, thematic and temporal comparisons	57
	Further reading	63
Chapter 5	Map design and production	64
5.1	Introduction	64
5.2	Symbols to portray data related to points, lines, areas and volumes	65
5.3	Graphic variables	66
5.4	Conceptual and design aspects of text on the map	70
5.5	Requirements for the cartographic component of GIS packages	71
5.6	Map design and production	74
5.7	Web map design	79
5.8	Web maps and multimedia	82
	Further reading	84
Chapter 6	Topography	85
6.1	Georeferencing	85
6.2	Map projections	88
6.3	Geometric transformations	94
6.4	Generalization	95
6.5	Relief	105
6.6	Topographic data: mapping and charting organizations	111
6.7	Geographical names	115
	Further reading	118
Chapter 7	Statistical mapping	119
7.1	Statistical surveys	119
7.2	Data analysis	122
7.3	Data classification	126
7.4	Cartographical data analysis	133
7.5	Mapping methods	136
	Further reading	151
Chapter 8	Mapping time	152
8.1	Introduction	152
8.2	Mapping change	154
8.3	Animation	155
8.4	Dynamic variables	157
	Further reading	158

Chapter 9	Maps at work: presenting and using geospatial data in maps and atlases	159
9.1	Introduction	159
9.2	Paper atlases	160
9.3	Electronic atlases	161
9.4	Maps at work: map use functions	163
9.5	Working with (web-based) electronic atlases	167
	Further reading	168
Chapter 10	Maps at work: analysis and geovisualization	169
10.1	Introduction	169
10.2	Geovisual analytics	174
	Further reading	175
Chapter 11	Cartography at work: maps as decision tools	176
11.1	Again: why maps?	176
11.2	Management and documentation of spatial information	176
11.3	Outdated data: at work with the Digital Chart of the World	177
11.4	Accessibility: cartography, GIS and geospatial information policy	180
11.5	Copyright and liability	181
11.6	Map use and usability	187
11.7	Maps and Geographical Information Science revisited	188
	Further reading	189
