PART 1: LABORATORY PRACTICE

1 Safety in the chemical laboratory

3

1.1 Essential rules for laboratory safety

4

1.2 Hazardous chemicals

7

1.3 Disposal of hazardous waste

11

1.4 Accident procedures

12

2 Glassware and equipment in the laboratory

15

2.1 Glass equipment

16

2.2 Hardware

21

2.3 Heating

24

2.4 Stirring

30

2.5 Vacuum pumps

32

2.6 The rotary evaporator

42

2.7 Catalytic hydrogenation

46

2.8 Ozonolysis

48

2.9 Irradiation

50

2.10 Compressed gases

54

3 Organic reactions: From starting materials to pure organic product

61

3.1 Handling chemicals

62

3.2 The reaction

81

3.3 Purification of organic compounds

105

4 Qualitative analysis of organic compounds

185

4.1 Purity

185

4.2 Determination of structure using chemical methods

202

5	Spectroscopic analysis of organic compounds	207
5.1	Absorption spectroscopy	207
5.2	Infrared spectroscopy	209
5.3	Nuclear magnetic resonance spectroscopy	227
5.4	Ultraviolet spectroscopy	279
5.5	Mass spectrometry	295
6	Keeping records: The laboratory notebook and chemical literature	311
6.1	The laboratory notebook	312
6.2	The research report	322
6.3	The chemical literature	327
PART 2: EXPERIMENTAL PROCEDURES		329
	Introduction	331
	List of experiments	333
	Experiments that can be taken in sequence	353
	Experiments that can be used to compare directly different techniques for undertaking a reaction	354
	Experiments that illustrate particular techniques	354
7	Functional group interconversions	355
7.1	Simple transformations	355
7.2	Reactions of alkenes	366
7.3	Substitution	386
7.4	Reduction	390
7.5	Oxidation	424
7.6	Rearrangements	436
8	Carbon–carbon bond-forming reactions	443
8.1	Grignard and organolithium reagents	444
8.2	Enolate anions	456
8.3	Heteroatom-stabilized carbanions	484
8.4	Aromatic electrophilic substitution	504
8.5	Pericyclic reactions	514
8.6	Metal-mediated coupling reactions	534
9	Experiments using enabling technologies	545
9.1	Microwave chemistry	545
9.2	Flow chemistry	554

10	Projects	569
10.1	Natural product isolation and identification	569
10.2	Project in organic synthesis	578
10.3	Aspects of physical organic chemistry	608
	APPENDICES	627
	Organic solvents	629
	Spectroscopic correlation tables	635
	Index of chemicals	649
	General index	657
