

## Table of Contents

Programme .....	1
Bandžuchová L., Šelešovská R., Chýlková J.: <i>Voltammetric monitoring of phytochelatin synthesis in plant cells exposed to cadmium using p-AgSAE</i> .....	4
Bulíčková J., Pospíšil L., Gál M., Sokolová R., Zhang Y., Rassat A., Filippone S., Yang J., Guan Z.: <i>Redox characterization of fullerene derivatives in water and DMSO</i> .....	6
Dmitrieva E., Dunsch L.: <i>The Influence of the Phenazine Structure on the Polaron Formation in Polyaniline: An in situ ESR-UV/vis/NIR Spectroelectrochemical Study</i> .....	7
Haubner K., Dunsch L., Jaehne E., Koehler D., Loppacher Ch., Eng L., Tarabek J.: <i>Synthesis and characterization of thiophene oligomers as promising materials for organic electronic devices applications</i> .....	8
Heyrovský M.: <i>The development of polarography</i> .....	9
Hnát J., Paidar M., Bouzek K., Schauer J.: <i>Heterogeneous anion exchange membranes for electrolytic splitting of water</i> .....	11
Hudská V., Janda P.: <i>Liquid film embedded electrode for (spectro)electrochemical investigation of redox systems soluble in nonaqueous solvents</i> .....	13
Kästner Ch., Klod S., Dunsch L.: <i>Synthesis, separation and characterization of endohedral cerium metallofullerenes</i> .....	14
Klod S., Ziegls F., Dunsch L.: <i>The mechanism of electrode reactions - a combined in situ NMR and in situ ESR spectroelectrochemical investigation</i> .....	15
Kodým R., Šnita D., Bergmann H., Jiříčný V., Bouzek K.: <i>Mathematical modeling: effective tool for optimization of electrochemical cells with bipolar electrode arrangement</i> .....	16
Kolivoška V., Lachmanová Š., Pospíšil L., Sokolová R., Hromadová M.: <i>Adsorption of bovine serum albumin on highly oriented pyrolytic graphite</i> .....	18
Kvarnström C.: <i>Conducting polymers in room temperature ionic liquids</i> .....	19
Liška A., Ludvík J.: <i>Electrochemical investigation of intramolecular electron interactions in Mono-, Di-, Tri- and Tetranitrocalix-[4]-arenes and their models</i> .....	20
