

Auth Contents

Preface	vii
CHAPTER 1	
Mathematics from earth to space	1
Math 2 save the earth	3
Flying an airplane	8
Finance matters	13
Space shuttle landing	17
CHAPTER 2	
Expect to be surprised by what you can do with mathematics	23
This is not the title of this theme	25
(De-)Coding adventures for young researchers	31
Optimizing under constraints	37
In search of shortest paths	43
Order and chaos in a model of population biology	49
CHAPTER 3	
Mathematics – a tool in your hand	55
Christmas stars	57
Maths at work	62
Maths at the gym	67
Animation – bringing motion into mathematics	72
CHAPTER 4	
Mathematical challenges from the town of Galilei	79
Navigation through numbers and fun	81
Spherical trigonometry: sum of angles of triangle on a sphere	85
Astronomy and how instruments draw quadratic curves	94
From fun problems to deep open problems	98
CHAPTER 5	
Gardens, lemonade, space shuttle and others have a common denominator	103
Geometry in gardens and parks	105
Mathematics in school chemistry	115
Travelling the space at 1 g acceleration	124
CHAPTER 6	
Bringing mathematics to earth ... using many languages	129
