PREFACE	7
INTRODUCTION	9
1. CHILDREN'S ENDURANCE TRAINING	15
1.1 The individuality of children's endurance training	15
1.2 Stages of children's endurance preparation	29
1.3 Influence of sports training on the motor efficiency, competence, physical development of children at the school age	40
1.4 Characteristics of the endurance athletics competitions	66
2. METHODOLOGICAL ASSUMPTIONS OF RESEARCH	76
2.1 The aim, the experimental assumptions, the hypothesis, the research questions	76
2.2 The research material	77
2.3 Stages and criteria of recruitment and selection	78
2.4 General programme's assumptions and the organization of schooling	80
2.5 The structure of annual training macrocycle	82
3. THE RESEARCH METHODS	84
3.1 The methods applied in the measurement of somatic features	84
3.2 Research methods applied in testing functional efficiency of the cardiovascular and the respiratory system	86
3.3 Research methods applied in the measurements of the motor efficiency	90
3.4 The research methods applied in the measurement of training loads	90
3.5 Method applied in the statistic data processing	94
4. ANALYSIS OF TRAINING LOADS	96
4.1 Analysis of training loads' value and structure	96
4.2 Analysis of methods and training resources	101
4.3 Analysis of training loads' dynamics	105
5. THE REMARKS CONSIDERING THE METHOD OF PRESENTATION OF RESULTS THAT DETERMINE THE LEVEL OF ADAPTIVE CHANGES	108
6. INFLUENCE OF DIVERSE TRAINING PROGRAMMES ON THE PHYSICAL DEVELOPMENT OF BOYS	109

7.	DEVELOPMENT OF BOYS' EFFORT ADAPTATION IN CORRELATION TO REALISED TRAINING PROGRAMME	116
7.1	Characteristics of basic physiological indicators in repose	116
7.2	Boys' physical efficiency in the light of functional trials' results	122
8.	FORMATION OF THE LEVEL OF BOYS' MOTOR AGILITY IN REGARD WITH THE REALISED TRAINING PROGRAMME	126
9.	THE DIDACTIC EFFECTS OF THE RESEARCH	135
10.	SUMMING UP	136
11.	THE CONCLUSIONS AND RECOMMENDATIONS FOR PRACTISE	147
12.	REFERENCES	151
	INDEX	159
	APPENDIXES	162
	Appendix 1. The register of groups of training resources in medium- and long-distance runs	
	Appendix 2. The coding sheet of training loads	
	Appendix 3. The example of training unit's registration	
	Appendix 4. The list of abbreviations that were used in the publication
