

Contents

| | | |
|----------|---|-----------|
| 1 | Introduction | 8 |
| 2 | The Complexity of Intervertebral Kinetics | 9 |
| 3 | Spine as the Axial System Basis | 15 |
| 3.1 | The Kinesiological View on Complexity of the Axial System | 15 |
| 3.1.1 | The Morphological and Biomechanical Aspects of the Axial System | 15 |
| 3.1.2 | Stiffness of Axial System in Trunk Region and Its Transitional Phases . . | 16 |
| 3.1.3 | New Premises and Myth of the Axial System | 17 |
| 3.1.4 | Conclusion | 18 |
| 3.2 | Neuronal Control of Abdominal and Paraspinal Muscles | 19 |
| 3.2.1 | Introduction | 19 |
| 3.2.2 | Anatomy | 19 |
| 3.2.3 | Location of Motor Neurons | 21 |
| 3.2.4 | Suprasegmental control | 22 |
| 3.2.5 | Supraspinal control | 23 |
| 3.2.6 | Pathophysiological remarks | 23 |
| 3.2.7 | Conclusion | 24 |
| 3.3 | Complexity in Human Motor Control | 25 |
| 4 | Spinal Canal and Dura Mater | 31 |
| 4.1 | Spinal canal | 31 |
| 4.2 | Structure and shape characteristics- short notes and biomechanical characterisation | 32 |
| 4.3 | Dynamics of the cerebrospinal fluid, propulsion mechanisms | 34 |
| 4.4 | Transport of the cerebrospinal fluid | 35 |

| | | |
|----------|---|-----------|
| 4.4.1 | Principle and local particularities | 35 |
| 4.5 | Modelling of the CSF system | 36 |
| 4.5.1 | Etiology of pathological changes of spinal canal and spinal cord - biomechanical interpretation | 38 |
| 5 | Intervertebral Kinematics | 48 |
| 5.1 | Introduction to Intervertebral Kinematics | 48 |
| 5.1.1 | What is an Appropriate Coordinate System? | 49 |
| 5.1.2 | Kinematic Concept of Spinal Movement and Hypotheses | 50 |
| 5.2 | Methods- Experimental Background | 50 |
| 5.3 | Intervertebral Kinematics | 51 |
| 5.3.1 | Physical Meaning of Instantaneous Axis of Rotation | 52 |
| 5.3.2 | Using the Intersegmental Kinematics in Replacement Development | 53 |
| 5.4 | Discussion | 54 |
| 6 | Intervertebral Joint and its Elements | 58 |
| 6.1 | Introduction | 58 |
| 6.2 | The structure of Intervertebral Joint | 59 |
| 6.3 | The Structural Preferred Kinematics | 59 |
| 6.4 | Passive Elements | 60 |
| 6.5 | Intervertebral Disc | 60 |
| 6.5.1 | The Structure of the IVD | 61 |
| 6.5.2 | Function of the IVD | 62 |
| 6.6 | The Zygapophyseal Joints | 63 |
| 6.6.1 | Function of the ZJ | 63 |
| 6.7 | The Ligamentous System | 64 |
| 6.8 | The Tuned Intervertebral Kinematics | 66 |
| 6.8.1 | Correction of Vertebra Position | 67 |
| 6.9 | The Direct Movement Control | 67 |
| 6.10 | Hypothesis Concerning Human Body Control Modes | 67 |
| 6.11 | Conclusion | 69 |
| 7 | Microstructure and Microrheology of Intervertebral Disc | 74 |
| 7.1 | Biomedical Engineering Motivation | 74 |

| | | |
|-----------|---|------------|
| | Introduction | 1 |
| 7.2 | Tissue Engineers Meet the Biomechanics | 75 |
| 7.3 | Nanoindentation of Isotropic Elastic Materials | 75 |
| 7.4 | Tissue Engineering and Nanoindentation | 76 |
| 7.5 | Structural Studies | 76 |
| 7.5.1 | Intervertebral Disc | 78 |
| 7.6 | Modeling of Anulus Fibrosus | 79 |
| 7.7 | Tissue Engineering Aspects | 81 |
| 7.8 | Nanoindentation of Anisotropic Elastic Tissue | 82 |
| 7.9 | Nanoindentation of Isotropic Linear Viscoelastic Tissue | 83 |
| 7.10 | Conclusions | 85 |
| 8 | Intervertebral Muscular Component | 91 |
| 8.1 | Functional Properties | 91 |
| 8.1.1 | Functional Properties | 91 |
| 8.1.2 | Contraction Dynamics | 99 |
| 8.2 | Macrostructure of skeletal muscle | 101 |
| 8.2.1 | Formative typology of muscles | 101 |
| 8.2.2 | Relationship of the nervous and muscular tissue | 102 |
| 8.2.3 | Surface and deep muscles | 102 |
| 8.2.4 | Visualization of cervical muscles- graphic modeling | 103 |
| 8.2.5 | Targeted modeling of cervical muscles | 104 |
| 9 | Respiratory Aspects of the Spinal System: The Formative Influence of Respiratory Mode on Trunk | 112 |
| 9.0.6 | Respiratory Mode and Its Impacts | 113 |
| 9.0.7 | Respiration and spinal flexibility | 116 |
| 10 | The Complexity of Intervertebral Disc Degeneration's Causes and Consequences | 122 |
| 10.1 | Mechanical Properties of Healthy and Degenerated IVD | 123 |
| 10.1.1 | Vessel Diseases, Back Pain – Problems of Medicine Today | 124 |
| 10.1.2 | How is the Substances Transport Between IVD and Its Surrounding Realized?124 | 124 |
| 10.1.3 | Metabolism in Relation to the Degeneration of the IVD | 125 |
| 10.2 | Conclusion and Discussion | 128 |

| | |
|--|------------|
| 11 Limit Loading Processes and their Reflection in Intervertebral Dynamics | 131 |
| 11.1 Dynamic of Transfer Characteristics of Driver's Body Biocomponents During Vehicle Driving | 131 |
| 11.1.1 Transfer of Vibrations in Organism or in a Segment of Human Body | 132 |
| 11.1.2 Measurement "in situ" – Driving a Vehicle | 135 |
| 11.1.3 Results | 136 |
| 11.1.4 Discussion | 137 |
| 11.1.5 Conclusion | 139 |
| 11.2 Implants and Loading Causes of their Failure | 142 |
| 11.2.1 Methods of Treatment | 142 |
| 11.2.2 Types of Treatment Options in the Spinal Surgery | 143 |
| 11.2.3 The Criticism of Current Methods | 144 |
| 11.2.4 Current Implants - Causes of Failure | 147 |
| 11.2.5 Thoughts on Better Concepts | 148 |
| 11.2.6 Conclusion | 151 |

| | |
|----------------------|------------|
| 12 Conclusion | 155 |
|----------------------|------------|
