

Prague Castle - Monitoring of stability of historical buildings

Table of contents

1	Introduction	6
2	Reasons for line-wise geotechnical deformation monitoring	6
2.1	Selection of the measuring equipment	8
2.2	Evaluation of accuracy of vertical shifts of the top of the casing	11
2.3	Design of a reference point of the local geodetic network	12
3	Foundation of the geodetic network	13
3.1	Morphology of the area of interest	14
3.2	Design of positioning of the reference points in the network	15
4	Examples of results of geotechnical activities at the Prague Castle	16
4.1	Determination of the foundation level and the subsoil conditions	16
4.2	Coupled subsoil description and measured vertical deformations	18
5	Summary and outlook	20
6	Acknowledgements	21
7	References	21
