

## CONTENT

1	INTRODUCTION TO SCIENTIFIC DATA ANALYSIS .....	7
1.1	Introduction .....	7
1.2	Scientific experimentation.....	7
1.3	Units and standards .....	9
2	DECISION-MAKING AND PROBLEM-SOLVING .....	10
2.1	Possible approaches to decision-making .....	10
2.2	Assumptions of the decision-making process .....	11
2.3	The conditions under which the decision-making process take place.....	12
2.4	Decision-making and problem solving.....	13
2.5	Situation analysis.....	14
2.6	Analysis of the problem .....	15
2.7	Decision analysis.....	16
2.8	Analysis of potential problems .....	18
2.9	Scientific Approach.....	19
3	SYSTEMS AND MODELS .....	21
3.1	Systems approach .....	21
3.2	Important terms of the system theory .....	24
3.3	Methods related to systems .....	29
3.4	Types of systems .....	30
3.5	Models and modelling.....	32
3.6	Classification of models.....	34
3.7	Classification of mathematical models.....	39
3.8	Economic and mathematical models.....	42
4	MODELLING PROCESS.....	44
4.1	Step 1: Analysis of the real situation.....	44
4.2	Step 2: Defining the problem .....	44
4.3	Step 3: Classification of the problem .....	45
4.4	Step 4: Data acquisition.....	46
4.5	Step 5: Delimitation of the system .....	47
4.6	Step 6: Formulation of an economic model .....	48
4.7	Step 7: Determination of the model type.....	48
4.8	Step 8: Formulation of a mathematical model .....	48
4.9	Step 9: Selection of solution method.....	52
4.10	Step 10: Solution of the model.....	52
4.11	Step 11: Classification of solution.....	53
4.12	Step 12: Assessment the solution .....	53
4.13	Step 13: Using the model to select an alternative .....	54
4.14	Step 14: Sensitivity analysis.....	55
4.15	Step 15: Interpretation of results .....	56
4.16	Step 16: Implementation of results.....	56
4.17	Step 17: Monitoring the results .....	56
4.18	Step 18: Gap analysis .....	57
5	PRINCIPLES OF OPTIMIZING .....	58
5.1	Introduction .....	58
5.2	Optimizing problems.....	58

5.3	Linear programming .....	59
5.4	Components of the optimizing model .....	65
5.5	General procedure for solving the optimizing problems .....	68
6	QUANTITATIVE METHODS AND TECHNIQUES .....	72
6.1	Fundamental classification of quantitative techniques .....	72
6.2	Quantitative methods in management science .....	81
6.3	Quantitative methods and tools in Microsoft Excel .....	83
