An introduction by the editor to all three volumes appears in Volume I

PART I URBAN AND REGIONAL SYSTEMS

1. Thomas C. Schelling (1971), 'Dynamic Models of Segregation', *Journal of Mathematical Sociology*, **1** (2), July, 143–86 3
2. Tõnu Puu (1981), 'Catastrophic Structural Change in a Continuous Regional Model', *Regional Science and Urban Economics*, **11**, 317–33 47
3. Peter M. Allen, Guy Engelen and Michele Sanglier (1986), 'Towards a General Dynamic Model of the Spatial Evolution of Urban Systems', in Bruce Hutchinson and Michael Batty (eds), *Advances in Urban Systems Modelling*, Amsterdam: North-Holland, 199–220 64
4. Wolfgang Weidlich and Günter Haag (1987), 'A Dynamic Phase Transition Model for Spatial Agglomeration Processes', *Journal of Regional Science*, **27** (4), November, 529–69 86
5. Paul Krugman (1997), 'How the Economy Organizes Itself in Space: A Survey of the New Economic Geography', in W. Brian Arthur, Steven N. Durlauf and David A. Lane (eds), *The Economy as an Evolving Complex System II*, Proceedings Volume XXVII, Reading, MA: Addison-Wesley, 239–62, reset 127
6. Masahisa Fujita, Paul Krugman and Tomoya Mori (1999), 'On the Evolution of Hierarchical Urban Systems', *European Economic Review*, **43** (2), February, 209–51 147

PART II EVOLUTIONARY ECONOMIC DYNAMICS

7. Richard M. Goodwin (1986), 'The Economy as an Evolutionary Pulsator', *Journal of Economic Behavior and Organization*, **7** (4), December, 341–9 193
8. W. Brian Arthur (1989), 'Competing Technologies, Increasing Returns, and Lock-in by Historical Events', *Economic Journal*, **99**, March, 116–31 202
9. Richard H. Day and Jean-Luc Walter (1989), 'Economic Growth in the Very Long Run: On the Multiple-phase Interaction of Population, Technology, and Social Infrastructure', in William A. Barnett, John Geweke and Karl Shell (eds), *Economic Complexity: Chaos, Sunspots, Bubbles, and Nonlinearity: Proceedings of the Fourth International Symposium in Economic Theory and Econometrics*, Chapter 11, Cambridge: Cambridge University Press, 253–89 218

10. Dean Foster and Peyton Young (1990), 'Stochastic Evolutionary Game Dynamics', *Theoretical Population Biology*, **38**, 219–32 255
11. Kristian Lindgren (1997), 'Evolutionary Dynamics in Game-Theoretic Models', in W. Brian Arthur, Steven N. Durlauf and David A. Lane (eds), *The Economy as an Evolving Complex System II*, Proceedings Volume XXVII, Reading, MA: Addison-Wesley, 337–67 269
12. Ken Binmore and Larry Samuelson (1999), 'Evolutionary Drift and Equilibrium Selection', *Review of Economic Studies*, **66** (2, No. 227), April, 363–93 300

PART III ECOLOGIC–ECONOMIC SYSTEMS

13. Dixon D. Jones and Carl J. Walters (1976), 'Catastrophe Theory and Fisheries Regulation', *Journal of the Fisheries Resource Board of Canada*, **33**, 2829–33, reset 333
14. James E. Conklin and William C. Kolberg (1994), 'Chaos For the Halibut?', *Marine Resource Economics*, **9**, 159–82 342
15. J. Barkley Rosser, Jr., Carl Folke, Folke Günther, Heikki Isomaki, Charles Perrings and Tönu Puu (1994), 'Discontinuous Change in Multilevel Hierarchical Systems', *Systems Research*, **11** (3), 77–93 366
16. Gardner Brown and Jonathan Roughgarden (1995), 'An Ecological Economy: Notes on Harvest and Growth', in Charles Perrings, Karl-Göran Mäler, Carl Folke, C.S. Holling and Bengt-Owe Jansson (eds), *Biodiversity Loss: Economic and Ecological Issues*, Chapter 5, Cambridge: Cambridge University Press, 150–89, references 383
17. Zhiqi Chen (1997), 'Can Economic Activities Lead to Climate Chaos? An Economic Analysis on Global Warming', *Canadian Journal of Economics*, **XXX** (2), May, 349–66 424
18. S.R. Carpenter, D. Ludwig and W.A. Brock (1999), 'Management of Eutrophication for Lakes Subject to Potentially Irreversible Change', *Ecological Applications*, **9** (3), August, 751–71 442
19. J. Barkley Rosser, Jr. (2001), 'Complex Ecologic-Economic Dynamics and Environmental Policy', *Ecological Economics*, **37** (1), April, 23–37 463
