

Obsah

<i>Bakošová M., Ondrovičová M., Karšaiová M.</i>	
Adaptive control of distillation columns using LV control configuration	15
<i>Balátě J., Karásek J.</i>	
A contribution to determination of a state model of a multidimensional linear system	19
<i>Balátě J., Sysala T.</i>	
Hierarchy of CAAC (computer aided automatic control) system on WEB pages	20
<i>Balogh R.</i>	
Using I2C* bus in metering applications	24
<i>Baluch D., Horovčák P.</i>	
Solution of the input - output units communication in windows environment	28
<i>Bélai I., Žalman M., Jovankovič J.</i>	
Stator current vector controller of the vector controlled asynchronous motor	29
<i>Belavý C., Hulkó G., Végh P., Lavrinc M.</i>	
Modelling and identification of technological processes as distributed parameter systems	30
<i>Belkov V., Savitskaya T.</i>	
Computer's integrated system for design of flexible chemical manufactures	31
<i>Benčurik B., Rohál' - Il'kiv B.</i>	
PREDICTOR - a software enviroment for MBPC	35
<i>Biglov R., Burljaeva E.</i>	
Inductive logic programming methods for "structure - activity" research for complex organic compounds	39
<i>Biza M.</i>	
Application of simple identification algorithm based on least square method on fuzzy control design	41
<i>Bobál V., Böhm J., Prokop R.</i>	
Selftuning SISO controllers: Matlab Toolbox	42
<i>Bobál V., Böhm J., Prokop R., Fessl J.</i>	
Self-tuning SISO controllers: Algorithm and implementation	43
<i>Bobasu E., Petre E., Popescu D.</i>	
On nonlinear control for electric induction motors	44
<i>Bober P.</i>	
Automatic parameter identification in a mass production	48
<i>Böhm J.</i>	
The use of input reference signal in LQ controllers	52
<i>Brandejský T., Bíla J.</i>	
Novel algebraic operations with fuzzy linguistic variables based on the theory of fuzzy numbers	56
<i>Budinský M., Kozák Š.</i>	
Practical algorithm for design of robust digital control under real parameter uncertainties	60
<i>Bůcha J., Kárný M., Nedoma P., Böhm J., Rojíček J.</i>	
Overview of DESIGNER 2000 project	65
<i>Burljaev V., Tarkhov A.</i>	
The analysis of biological activity of retinals with inductive logic programming	71
<i>Burý A., Hettner M.</i>	
Modelling of haulage dynamics in underground coal mines	73
<i>Burý A.</i>	
Simulation and control of enhancement mining process optimization	74
<i>Doganovsky S., Kuznetsov A.</i>	
Deficient of controlability, parametrization and parametric control of active plant	75
<i>Dostál P., Prokop R., Prokopová Z.</i>	
Suboptimal control of continuous stirred tank reactor	79

<i>Dúbravská M., Mudrončík D., Lenjik P.</i>	83
A software support for the control loop design	
<i>Dúbravský J., Mudrončík D.</i>	86
An analog model of a central heating system	
<i>Ďulík M., Chmúrny J.</i>	91
Adaptive routing in narrowband mobile packet radio networks using neural networks	
<i>Durnáš M.,</i>	92
The dynamic of automated heat distribution networks	
<i>Dušek F., Krejčí S., Macháček J., Hrubeš P.</i>	96
The temperature difference control	
<i>Dvořák J.</i>	97
Lot size scheduling in a flow shop	
<i>Dvořáková R., Horáček P.</i>	98
Stability of fuzzy systems	
<i>Egorov A., Egorova M.</i>	102
Integrated automated control systems: principles of construction and functional opportunities	
<i>Farana R.</i>	105
Development of the interactive database systems on Internet and using on education process	
<i>Fedor P., Perduková D.</i>	106
Information system of smaller heating station	
<i>Filasová A., Krokavec D.</i>	107
Duality of Kalman estimators and LQR controllers from the point of dual dynamic programming	
<i>Filasová A.</i>	113
Decentralized robust control of uncertain systems with measurable disturbances	
<i>Finkeová J.</i>	114
Controlling chaos of hypothetical chemical reaction by periodic perturbation	
<i>Fišer L., Kadlec K.</i>	118
Calibration of the process ethanol analyzer in fermentation media	
<i>Gemza E., Kašpar J., Krejčí S., Taufer I., Kotyk J.</i>	119
Control systems for difficult controlled processes	
<i>Gordeev L., Dubrovskii I., Lukyanov V., Plyutto V.</i>	120
Transient processes simulation and controller setting by expanded frequency responses method	
<i>Gordeev L., Koznov A., Nagajcev A., Chistiakov K.</i>	124
The system of synthesis of distillation scheme of raw benzene with visualization of outcomes	
<i>Gordeeva E., Volodin V., Gordeev L.</i>	127
Dynamic behaviour of stirred tank reactor with exothermic reaction	
<i>Gordeeva J., Ivashkin J.</i>	131
Simulation of dynamic process in stirred fermenter to form cell mass and product	
<i>Góts P., Kobulský J.</i>	135
Some problems of expert systems utilization for control of technological processes	
<i>Góts P., Kobulský J.</i>	136
The new approach to modeling and simulation of production systems	
<i>Grzywacz B.</i>	137
On the simple formulae for indirect identification of transfer functions	
<i>Hanta V.</i>	141
The optimum configuration of intermediate storage for multi-product batch processes	
<i>Hanuš B., Hernych M., Šindelář R.</i>	145
Parameters setting of a controller with flexible feedback	
<i>Harsányi L., Veselý V., Králová Z.</i>	149
Optimal steady state control of complex systems	

<i>Havřila M., Monka P., Petík A.</i>	153
Modelling of flexible manufacturing cell	
<i>Henrych M.</i>	157
Computer aided design and parameters setting of a controller with flexible feedback	
<i>Horáček P.</i>	158
Modeling by bond graphs	
<i>Horovčák P., Baluch D.</i>	164
Application for collection and processing of analog signals	
<i>Hrubina K., Hapáková A.</i>	165
On algorithms for solving optimal control problems for systems with distributed parameters	
<i>Huba M., Sovišová D., Oravec I.</i>	171
Minimum time pole assignment PWM PD-controller	
<i>Hubinský P., Jurišica L.</i>	175
Control signal shaping reducing residual oscillations	
<i>Hulkó G., Belavý C., Végh P., Heugerová A.</i>	179
Methods of control of technological processes as distributed parameter systems	
<i>Hušek P.</i>	180
Elementary operations for different representations of linear multivariable systems	
<i>Hyniová K., Stríbrský A.</i>	181
External control of simulated technological processes	
<i>Hypiusová M., Kozák Š.</i>	185
A new modifying approach to the robust analysis and synthesis of linear dynamic systems	
<i>Jadlovská A.</i>	189
The method of decoupling of nonlinear system of control manipulators	
<i>Jakeš B., Staněk V., Ondráček J., Svoboda P., Jiříčný V.</i>	190
Helium probe utilisation for dynamic study of packed bed columns	
<i>Ježek K., Zima M.</i>	191
Deductive control of traffic process	
<i>Jirák E., Karabel J.</i>	195
Application of solid state elektrochemical sensors	
<i>Juračková L., Kozák Š., Hejdiš J.</i>	199
Modelling and control of linear and non-linear systems using Laguerre orthonormal function	
<i>Jurišica L., Vitko A.</i>	203
Control of mechatronic systems	
<i>Kačmář D.</i>	207
SIPRO-G implementation in the distributed computing environment of VŠB TUO-NET	
<i>Kadlec K., Čadil J., Fišer L., Macháček J.</i>	211
Process control in standard gas mixture preparation	
<i>Kachaňák A., Krbat'a R.</i>	212
Design of controllers for systems with structured uncertainty	
<i>Kachaňák A.</i>	213
Significance of systems determinateness and systems uncertainty in modeling and control of processes	
<i>Karšaiová M., Bakošová M., Ondrovičová M., Zemanovičová A.</i>	214
Decentralised control method in robust control	
<i>Klán P.</i>	218
On information in identification	
<i>Kmínek M., Palatová M.</i>	222
Education of biotechnology using simulation models	
<i>Kolcun M., Benč. R., Szathmáry P.</i>	223
A neural network based power system contingency analyser	
<i>Kolínová M., Procházka A.</i>	227
Adaptive noise cancellation	

<i>Krajčí V., Jurišica L.</i>	231
Robust fuzzy control method for a robot arm	
<i>Králová Z., Veselý V.</i>	235
Production line optimization using simulation	
<i>Krejčí S., Macháček J., Dušek F., Hruběš P.</i>	236
Design of a new control system for heating a feed to distillation	
<i>Kudin V.F.</i>	240
Analog uravnenia Gamiltona-Jakobi-Bellmana dlia cifrovikh sistem i neklassicheskie celevie funkcionali	
<i>Macháček J., Krejčí S., Dušek F., Hruběš P.</i>	249
Gain scheduling control of desalter tank	
<i>Marcin J.</i>	253
Vizual and vizualizing subsystem in distributed control system	
<i>Matko J., Staroselská J.</i>	254
Optimization of sulphenax (2-MBT) production	
<i>Mészáros A., Rusnák A., Fikar M.</i>	255
Neural network based predictive control of a tubular chemical reactor	
<i>Mikleš J., Čirka L., Kožka Š.</i>	259
Closed-loop systém identification	
<i>Mikulová Z.</i>	263
Distributed control based on lonworks - futurism? - presence? ... and what will go on?	
<i>Mikulová Z.</i>	264
Identification of the position as a part of control of cokework plant KB11 and KB12	
<i>Monková K., Monka P.</i>	265
Computer - aided optimalization of tool angle	
<i>Mudrončík D.,</i>	269
VEGA island operation - experiments and modelling	
<i>Murgaš J., Miklovičová E.</i>	274
Phase-lead controller design for nonlinear systems	
<i>Murgaš J.</i>	278
MIMO nonlinear turbogenerator control system	
<i>Nečasová A., Mészáros A., Danko J.</i>	282
Adaptive control of a laboratory storage tank systém	
<i>Němec Z.</i>	286
Simulation of control at thermal power plant	
<i>Novák-Marcinčin J., Petruška P., Doliak M.</i>	287
The ROANS - simulation and programming system for the automated manufacturing workplaces	
<i>Ogonowski Z.</i>	291
Influence of the observer polynomial on pole placement control properties	
<i>Olehla J., Olehla M.</i>	295
The humidity device and dynamic behavior	
<i>Ondrovičová M., Bakošová M., Karšaiová M.</i>	299
Design of control system for a laboratory distillation column	
<i>Pakshin P.V., Fomin D.</i>	303
Robust control of hybrid systems with dynamic output feedback and switching estimator structure	
<i>Pakshin P.V., Geraskina T.</i>	307
Robust decentralized control of discrete-time hybrid systems	
<i>Pakshin P.V., Pakshina N.</i>	311
Robust nonlinear control of hybrid stochastics systems	
<i>Palatová M., Kmínek M., Finkeová J., Votruba J.</i>	315
Model of the production of the baker yeast fuzzy control	

<i>Pazdera K., Poživil J.</i>	
Tutorial of process system engineering using max process simulator	316
<i>Petr P., Olej V.</i>	
The possibility uses fuzzy clustering methods in the images processing	317
<i>Petre E., Popescu D., Bobasu E.</i>	
On nonlinear adaptive control of chemical reactors using neural networks	318
<i>Petrovský V., Zapletal T., Hutýra M.</i>	
New approach to development of bus for smart sensors utilize LabView	322
<i>Pilishkin V.N.</i>	
Construction of rough regulators on restrictions in space of condition	323
<i>Pitel' J., Perečinská V., Saloky T., Vojtko I.</i>	
Control of decentralized heating and hot water supply	327
<i>Podlubny I.</i>	
On identification of fractional-order dynamic system	328
<i>Popescu D., Bobasu E., Petre E.</i>	
On the fragility of some optimal controllers	332
<i>Poživil J., Štuka P.</i>	
Calculation of power generation potential at the transit pipeline gas transmitting stations in ČR	336
<i>Prokop R., Prokopová Z., Dostál P.</i>	
Control design of unstable time delay systems	340
<i>Prokopová Z., Prokop R.</i>	
Analysis of continuous controllers for time delay systems	341
<i>Pupkov K.A., Pilishkin V.N.</i>	
Construction of intelligent system in the task of management of dynamic object	342
<i>Pupkov K.A., Pilishkin V.N., Tsaregorodtsev A.V.</i>	
Adaptive optimal control system of technological process of ion-beam etching	345
<i>Rusnák A., Fikar M., Mészáros A.</i>	
Iterative dynamic programming based on artificial neural network	349
<i>Saloky T.</i>	
Applications of search-oriented automated problem-solving techniques	353
<i>Sarnovský J., Baisová Z.</i>	
Multiagent control of large scale systems	356
<i>Sarnovský J., Borták J., Liguš J., Kováček P.</i>	
The hierarchical decision-making in the technological complex control	360
<i>Serov V.A.</i>	
A concept of a stable generalized equilibrium in multicriterion conflict optimization problems	365
<i>Shergold I.B., Skotnikova N., Telepchonkov P.</i>	
Development of mathematical models for a integrated control system of quality of production	370
<i>Skibitski N.V.</i>	
Management of dynamic object with intervally given parameters of a problem for a partial vector of conditions	373
<i>Slobodová A.</i>	
Decision making and belief functions	377
<i>Smutný L., Wagnerová R.</i>	
Position control of levitation object by the method of the aggregation on state variables	381
<i>Staněk V., Jakeš B., Svoboda P., Ondráček J., Jiříčný V.</i>	
Transient hydrodynamics under two-phase counter-current flow in a packed bed column	381
<i>Stavěl J.</i>	
The application of orthonormal polynomials in adaptive control	386
<i>Štuka P., Poživil J.</i>	
The heuristic approach for scheduling of multipurpose batch plants	390

<i>Stluka P., Poživil J.</i>	
Applying milp algorithms to the scheduling in chemical batch plants (polemic)	391
<i>Stránský V., Chmúrny J.</i>	
Adaptive equalization of telecommunication channels by neural networks	392
<i>Stříbrský A., Hyniová K.</i>	
Dynamic response limitations for active suspension of vehicles	396
<i>Stříbrský J., Procházka A.</i>	
Adaptive methods of signal prediction	400
<i>Šeda M.</i>	
An application of modern heuristic techniques to flow shop scheduling	404
<i>Široký K., Jirešová J.</i>	
Iron oxide thin film gas and vapour sensor	405
<i>Štastný J.</i>	
Analysis of system Atlas	409
<i>Šturcel J., Balogh R.</i>	
Methods for signal processing in smart sensors systems	410
<i>Švarc I.</i>	
Contribution to the theory of Z transform	414
<i>Tauchman M.</i>	
Wonderware InBatch flexible management system	415
<i>Vášek V., Kolomazník K., Langer P.</i>	
In touch visualisation and control system for the tannery wastes processing	416
<i>Vdoleček F.</i>	
Teaching models of measurement for automatization	417
<i>Veselý V.</i>	
Decentralized robust exponential stability of nonlinear complex systems	418
<i>Víteček A.</i>	
Robust Control of nonlinear dynamic subsystems of standard types	422
<i>Vítečková M.</i>	
Simple PI and PID controllers tuning for critical nonoscillatory closed-loop step response by inversion dynamic method	423
<i>Vörös J.</i>	
Nonlinear dynamic system with two-segment polynomial nonlinearities	424
<i>Wagnerová R., Farana R.</i>	
Simulation of optimal control flexible link of manipulator's arm with program SIPRO	428
<i>Záda V.</i>	
Direct method of dynamical optimization	429
<i>Zapletal T., Petrovský V., Hutýra M.</i>	
Simulation real case at environment LabView	433
<i>Zemanovičová A., Karšajová M.</i>	
Measurement of characteristic variables combustion process	434
<i>Zezulka F., Hrdlička M., Bradáč Z.</i>	
Standardization in process control	435
<i>Zitek P., Hlava J.</i>	
Design of anisochronic internal model controllers for hereditary systems	436
<i>Zuchowski A., Paplinski J.</i>	
The application decomposition of zeros and poles to create simplified models of dynamics	441
<i>Zvara I., Veselý V.</i>	
Decentralized robust exponential stability of linear systems	445
<i>Zvirimovský V., Badida M., Majerník M.</i>	
AVIS education of simulation	449
<i>Žilková J.</i>	
Neural network based estimation of feedback signals for an induction motor drive	450
