

Contents

Preface,

O. Urban, M. Šprtová, D. Vačkář, K. Klem

6

From cell to landscape: a multiscale framework to study the climate change effects on forest ecosystems,

M. Vizzarri, S. Antonucci, C. Calderaro, C. Coccozza, E. Conte, A. De Toni, M. di Cristofaro, M. Di Febbraro, P. Di Martino, A. Evangelista, L. Frate, G. Fravolini, V. Garfi, B. Lasserre, F. Lombardi, M. Ottaviano, C. Palombo, C. Paniccia, A. Perone, L. Sallustio, G. Santopuoli, R. Tognetti, D. Tonti, M. Marchetti

9

Impacts of hydrometeorological extremes in South Moravia based on documentary evidence,

K. Chromá, L. Dolák, R. Brázdil, L. Řezníčková.

14

Water-use efficiency of winter wheat under heat and drought stress,

M. Hlaváčová, K. Klem, K. Novotná, B. Rapantová, O. Urban, P. Hlavinka, P. Smutná, V. Horáková, P. Škarpa, M. Trnka

19

Simulating tomato growth in the CROPGRO-Tomato model and evaluations against field data in Central Bohemia,

V. Potopová, L. Türkott, D. Hiřmanová

24

Comparison of leaf area index dynamics and radiation use efficiency of C3 crops in the Czech Republic,

A.M. Tripathi, E. Pohanková, M. Trnka, K. Klem

39

Interactive effect of UV radiation and CO₂ treatment on extractable volatile organic compounds from European beech leaves,

K. Večeřová, N. Pernicová, K. Klem, O. Urban

33

Effect of elevated CO₂ on morphological and photosynthetic parameters in two understory grass species in Beskydy Mountains,

P. Holub, K. Klem, O. Urban

38

- Stem emissions from poplar hybrids grown in a short-rotation plantation contribute to ecosystem balance of nitrous oxide and methane,
K. Machacova, J. Kreuzwieser, H. Rennenberg **43**
- Modulation of ozone flux in a mountain spruce forest under different cloud cover,
S. Juráň, S. Fares, O. Urban **48**
- Potential of flux-variance and surface renewal methods for sensible heat flux measurements at agricultural and forest surfaces,
M. Fischer, G. Katul, G. Pozníková, A. Noormets, J.-C. Domec, M. Trnka, J. King **53**
- Influence of the chlorophylls-to-carotenoids ratio on light use efficiency estimation by optical parameters,
A. Ač, D. Kováč, P. Veselovská, K. Večeřová, K. Klem **58**
- Predicting light use efficiency using optical vegetation indices at various time scales and environmental conditions,
D. Kováč, A. Ač, P. Veselovská, D. Dreveňáková, B. Rapantová, K. Klem **62**
- Application of multispectral remote sensing indices for estimating crop yields at field level,
F. Jurečka, V. Lukas, P. Hlavinka, D. Semerádová, M. Fischer, Z. Žalud, M. Trnka **66**
- Towards a combining of remote sensing and in situ evapotranspiration measurements,
M. Fischer, F. Jurečka, M. Anderson, C. Hain, G. Pozníková, P. Hlavinka, M. Orság, V. Lukas, Z. Žalud, M. Trnka **70**
- Large-scale assessment of changes in Europe during a 33-year period using GIMMS NDVI and E-OBS gridded climatic data sets,
I. Pilas **74**
- Intellectual information platform for thematic services creation with integrated use of ERS and in-situ data,
V. Zelentsov, S. Potryasaev, I. Pimanov, V. Mochalov **81**

Forest regeneration within the treeline ecotone in the Giant Mountains under climate change, <i>O. Cudlín, E. Chumanová-Vávrová, M. Edwards-Jonášová, M. Heřman, P. Štěpánek, P. Cudlín</i>	86
Approaching dangerous impacts of global climate change, <i>A. Ač</i>	91
Carbon-smart forestry for building resilience to global change, <i>S. Brnkalakova, T. Kluvánková, M.V. Marek</i>	98
Urban ecosystem services in climate change mitigation, <i>I. Štecová, T. Kluvánková, M. Pavelka</i>	103
Ecosystem services in environmental policy and decision-making in the Czech Republic, <i>J. Daněk</i>	108
Exploring knowledge and attitudes towards climate change among a study sample from Khartoum State, Sudan, <i>A. Alhuseen, M. Kozová, I. Ismaeel, P. Cudlín</i>	112
Renewable energy sources evaluation: Regional Impact Assessment Framework (RegioIAF), <i>J. Macháč, L. Zemková</i>	117
Authors' index
