Abbreviations ix

Contributors xiii

SECTION 1

General aspects of neurorehabilitation

- 1 The International Classification of Functioning, Disability, and Health** 3
Diane Playford
- 2 An interdisciplinary approach to neurological rehabilitation** 8
Derick Wade
- 3 The economic benefits of rehabilitation for neurological conditions** 18
Rory O'Connor
- 4 Predicting activities after stroke** 24
Gert Kwakkel and Boudewijn Kollen
- 5 Designing a clinical trial for neurorehabilitation** 35
Bruce Dobkin and Andrew Dorsch
- 6 The influence of age on neurorehabilitation** 46
Markus Wirz and Louise Rutz-LaPitz
- 7 The applicability of motor learning to neurorehabilitation** 55
John W. Krakauer

SECTION 2

Physiological consequences of CNS damage

- 8 Spinal neuronal dysfunction after deprivation of supraspinal input** 67
Michèle Hubli and Volker Dietz

- 9 Secondary changes after damage of the central nervous system: significance of spastic muscle tone in rehabilitation** 76
Volker Dietz and Thomas Sinkjaer

- 10 Autonomic nervous system dysfunction** 89
Angela Gall and Mike Craggs

- 11 Functional recovery in CNS disease: impact of animal models** 112
Steffen Franz, Andreas Hug, and Norbert Weidner

SECTION 3

Neuroplasticity and repair

- 12 Animal models of damage, repair, and plasticity in the brain** 129
Andreas Luft
- 13 Animal models of damage, repair, and plasticity in the spinal cord** 135
V. Reggie Edgerton, Roland R. Roy, Daniel C. Lu, and Yury Gerasimenko
- 14 Stem cell application in neurorehabilitation** 148
Sebastian Jessberger, Armin Curt, and Roger Barker
- 15 The role of neuroimaging in understanding the impact of neuroplasticity after CNS damage** 161
Nick Ward
- 16 Enhancement of neuroplasticity by cortical stimulation** 174
Orlando Swayne and John Rothwell
- 17 Enhancement of neuroplasticity by drug therapy** 193
Ulf Ziemann

SECTION 4**Clinical concepts**

- 18 Rehabilitation of gait and balance after CNS damage** 211
Jacques Duysens, Geert Verheyden, Firas Massaad, Pieter Meyns, Bouwien Smits-Engelsman, and Ilse Jonkers
- 19 Neurorehabilitation approaches for disorders of the peripheral nervous system** 224
William Huynh, Michael Lee, and Matthew Kiernan
- 20 Treatment of arm and hand dysfunction after CNS damage** 238
Nick Ward
- 21 Acquired disorders of language and their treatment** 251
Alex Leff and Jenny Crinion
- 22 Neuropsychological rehabilitation of higher cortical functions after brain damage** 262
Radek Ptak and Armin Schnider
- 23 The clinical neurology of problems with oral feeding** 272
Tom Hughes
- 24 Management of bladder, bowel, and sexual dysfunction** 281
Ulrich Mehnert
- 25 The assessment and treatment of pain syndromes in neurorehabilitation** 314
Eva Widerström-Noga
- 26 The impact of fatigue on neurorehabilitation** 328
Killian Welch and Gillian Mead

- 27 Neuropalliative rehabilitation—managing neurological disability in the context of a deteriorating illness** 341
Gail Eva, Jo Bayly, and Diane Playford
- 28 Recognition and management of functional (non-organic) symptoms after CNS damage** 352
Lucia Ricciardi, Alan Carson, and Mark Edwards

SECTION 5**Technical concepts**

- 29 Promises and challenges of neurorehabilitation technology** 359
William Rymer and Arun Jayaraman
- 30 Application of orthoses and neurostimulation in neurorehabilitation** 363
Jacopo Carpaneto and Silvestro Micera
- 31 Technology to enhance arm and hand function** 374
Arthur Prochazka
- 32 Technology to enhance locomotor function** 385
Rüdiger Rupp, Daniel Schließmann, Christian Schuld, and Norbert Weidner
- 33 Enhancing independent community access and participation: services, technologies, and policies** 399
Luc Noreau, Geoffrey Edwards, Normand Boucher, Francois Routhier, Claude Vincent, Hubert Gascon, and Patrick Fougereyrolas
- 34 Virtual reality for neurorehabilitation** 418
Robert Riener
- Index** 441
