

Contents

List of Abbreviations	5
1. Preface	7
2. Introduction to the risk assessment	9
2.1. Overview	9
2.2. Hazard identification	11
2.3. Exposure assessment	12
2.4. Dose–response assessment	15
2.4.1. Toxic substances	15
2.4.2. Carcinogens	17
2.5. Risk characterization	20
2.6. Uncertainty analysis	21
3. Cases overview	23
4. Analytical methods	27
5. Occupational risk posed by soil contaminants	31
5.1. Background	31
5.2. The site characterization	32
5.3. Starting data	33
5.4. Hazard identification and toxicity assessment	36
5.5. Toxicity profiles of the studied contaminants	39
5.6. Exposure assessment	44
5.7. Determination of dose–response relation	49
5.8. Risk characterization	53
5.9. Uncertainty analysis	54
5.10. Conclusions	55
6. Environment polluted with chromium	57
6.1. Background	57
6.2. The site description	60
6.3. Health risk assessment	61
6.3.1. Exposure assessment	62
6.3.2. Dose–response relation	65
6.3.3. Uncertainty analysis and discussion	67
6.4. Conclusions	68
7. Nitrogen compounds in the surface waters	69
7.1. Background	69
7.2. Sampling spot	70
7.3. Results of water analyses	71
7.4. Hazard identification	72
7.5. Determination of dose–response relation	73
7.6. Exposure assessment	74

7.7. Hazard characterization	76
7.8. Uncertainty analysis	77
7.9. Conclusions	78
8. Persistent organic pollutants in drinking water supply system	79
8.1. Background	79
8.2. Results of water analyses	81
8.3. Hazard identification	83
8.4. Determination of dose–response relation	84
8.5. Dose–carcinogenic response relation	85
8.6. Dose–non-carcinogenic response relation	86
8.7. Exposure assessment	87
8.8. Exposure assessment for carcinogenic effects	87
8.9. Exposure assessment for non-carcinogenic effects	89
8.10. Risk characterization	89
8.10.1. Cancer risk characterization	90
8.10.2. Characterization of non-cancerous health effects chances	92
8.11. Uncertainty analysis	92
8.12. Conclusions	93
9. Asbestos in the ambient air	95
9.1. Background	95
9.2. Hazard identification	97
9.3. Determination o dose–response relation	98
9.4. Exposure assessment	100
9.5. Risk characterization	104
9.6. Uncertainty in risk assessment	105
9.7. Conclusions	106
10. Summary	109
11. References	111
List of Figures	119
List of Tables	121
About the Authors	123
