Preface	xiii
1 Introduction	1
1.1 About Econometrics	1
1.2 The Structure of this Book	3
1.3 Illustrations and Exercises	4
2 An Introduction to Linear Regression	7
2.1 Ordinary Least Squares as an Algebraic Tool ✓	8
2.1.1 Ordinary Least Squares	8
2.1.2 Simple Linear Regression	10
2.1.3 Example: Individual Wages	12
2.1.4 Matrix Notation	12
2.2 The Linear Regression Model ✓	14
2.3 Small Sample Properties of the OLS Estimator ✓	16
2.3.1 The Gauss–Markov Assumptions	16
2.3.2 Properties of the OLS Estimator	17
2.3.3 Example: Individual Wages (Continued)	20
2.4 Goodness-of-fit	20
2.5 Hypothesis Testing ✓	23
2.5.1 A Simple t -test	23
2.5.2 Example: Individual Wages (Continued)	25
2.5.3 Testing One Linear Restriction	25
2.5.4 A Joint Test of Significance of Regression Coefficients	27
2.5.5 Example: Individual Wages (Continued)	28
2.5.6 The General Case	30
2.5.7 Size, Power and p -Values	31

2.6	Asymptotic Properties of the OLS Estimator	32
2.6.1	Consistency	32
2.6.2	Asymptotic Normality	34
2.6.3	Small Samples and Asymptotic Theory	36
2.7	Illustration: The Capital Asset Pricing Model	38
2.7.1	The CAPM as a Regression Model	38
2.7.2	Estimating and Testing the CAPM	39
2.8	Multicollinearity	42
2.8.1	Example: Individual Wages (Continued)	44
2.9	Prediction	44
	Exercises	46
3	Interpreting and Comparing Regression Models	51
3.1	Interpreting the Linear Model	51
3.2	Selecting the Set of Regressors	55
3.2.1	Misspecifying the Set of Regressors	55
3.2.2	Selecting Regressors	56
3.2.3	Comparing Non-nested Models	59
3.3	Misspecifying the Functional Form	62
3.3.1	Nonlinear Models	62
3.3.2	Testing the Functional Form	63
3.3.3	Testing for a Structural Break	63
3.4	Illustration: Explaining House Prices	65
3.5	Illustration: Explaining Individual Wages	68
3.5.1	Linear Models	68
3.5.2	Loglinear Models	71
3.5.3	The Effects of Gender	74
3.5.4	Some Words of Warning	76
	Exercises	77
4	Heteroskedasticity and Autocorrelation	79
4.1	Consequences for the OLS Estimator	79
4.2	Deriving an Alternative Estimator	81
4.3	Heteroskedasticity	82
4.3.1	Introduction	82
4.3.2	Estimator Properties and Hypothesis Testing	84
4.3.3	When the Variances are Unknown	85
4.3.4	Heteroskedasticity-consistent Standard Errors for OLS	87
4.3.5	A Model with Two Unknown Variances	88
4.3.6	Multiplicative Heteroskedasticity	89
4.4	Testing for Heteroskedasticity	90
4.4.1	Testing Equality of Two Unknown Variances	90
4.4.2	Testing for Multiplicative Heteroskedasticity	91
4.4.3	The Breusch–Pagan Test	91
4.4.4	The White Test	92
4.4.5	Which Test?	92

4.5	Illustration: Explaining Labour Demand	92
4.6	Autocorrelation	97
4.6.1	First Order Autocorrelation	98
4.6.2	Unknown ρ	100
4.7	Testing for First Order Autocorrelation	101
4.7.1	Asymptotic Tests	101
4.7.2	The Durbin–Watson Test	102
4.8	Illustration: The Demand for Ice Cream	103
4.9	Alternative Autocorrelation Patterns	106
4.9.1	Higher Order Autocorrelation	106
4.9.2	Moving Average Errors	107
4.10	What to do When you Find Autocorrelation?	108
4.10.1	Misspecification	108
4.10.2	Heteroskedasticity-and-autocorrelation-consistent Standard Errors for OLS	110
4.11	Illustration: Risk Premia in Foreign Exchange Markets	112
4.11.1	Notation	112
4.11.2	Tests for Risk Premia in the One-month Market	113
4.11.3	Tests for Risk Premia Using Overlapping Samples	116
	Exercises	119
5	Endogeneity, Instrumental Variables and GMM	121
5.1	A Review of the Properties of the OLS Estimator	122
5.2	Cases Where the OLS Estimator Cannot be Saved	125
5.2.1	Autocorrelation with a Lagged Dependent Variable	126
5.2.2	An Example with Measurement Error	127
5.2.3	Simultaneity: the Keynesian Model	129
5.3	The Instrumental Variables Estimator	131
5.3.1	Estimation with a Single Endogenous Regressor and a Single Instrument	131
5.3.2	Back to the Keynesian Model	135
5.3.3	Back to the Measurement Error Problem	136
5.3.4	Multiple Endogenous Regressors	136
5.4	Illustration: Estimating the Returns to Schooling	137
5.5	The Generalized Instrumental Variables Estimator	142
5.5.1	Multiple Endogenous Regressors with an Arbitrary Number of Instruments	142
5.5.2	Two-stage Least Squares and the Keynesian Model Again	145
5.5.3	Specification Tests	146
5.5.4	Weak Instruments	147
5.6	The Generalized Method of Moments	148
5.6.1	Example	149
5.6.2	The Generalized Method of Moments	150
5.6.3	Some Simple Examples	153
5.7	Illustration: Estimating Intertemporal Asset Pricing Models	154

5.8	Concluding Remarks	157
	Exercises	158
6	Maximum Likelihood Estimation and Specification Tests	161
6.1	An Introduction to Maximum Likelihood	162
6.1.1	Some Examples	162
6.1.2	General Properties	166
6.1.3	An Example (Continued)	169
6.1.4	The Normal Linear Regression Model	170
6.2	Specification Tests	171
6.2.1	Three Test Principles	171
6.2.2	Lagrange Multiplier Tests	173
6.2.3	An Example (Continued)	177
6.3	Tests in the Normal Linear Regression Model	178
6.3.1	Testing for Omitted Variables	178
6.3.2	Testing for Heteroskedasticity	179
6.3.3	Testing for Autocorrelation	181
6.4	Quasi-maximum Likelihood and Moment Conditions Tests	182
6.4.1	Quasi-maximum Likelihood	182
6.4.2	Conditional Moment Tests	184
6.4.3	Testing for Normality	185
	Exercises	186
7	Models with Limited Dependent Variables	189
7.1	Binary Choice Models	190
7.1.1	Using Linear Regression?	190
7.1.2	Introducing Binary Choice Models	190
7.1.3	An Underlying Latent Model	192
7.1.4	Estimation	193
7.1.5	Goodness-of-fit	194
7.1.6	Illustration: the Impact of Unemployment Benefits on Reciprocity	197
7.1.7	Specification Tests in Binary Choice Models	199
7.1.8	Relaxing Some Assumptions in Binary Choice Models	201
7.2	Multi-response Models	202
7.2.1	Ordered Response Models	203
7.2.2	About Normalization	204
7.2.3	Illustration: Willingness to Pay for Natural Areas	205
7.2.4	Multinomial Models	208
7.3	Models for Count Data	211
7.3.1	The Poisson and Negative Binomial Models	211
7.3.2	Illustration: Patents and R&D Expenditures	215
7.4	Tobit Models	218
7.4.1	The Standard Tobit Model	218
7.4.2	Estimation	220

7.4.3	Illustration: Expenditures on Alcohol and Tobacco (Part 1)	222
7.4.4	Specification Tests in the Tobit Model	225
7.5	Extensions of Tobit Models	227
7.5.1	The Tobit II Model	228
7.5.2	Estimation	230
7.5.3	Further Extensions	232
7.5.4	Illustration: Expenditures on Alcohol and Tobacco (Part 2)	233
7.6	Sample Selection Bias	237
7.6.1	The Nature of the Selection Problem	237
7.6.2	Semi-parametric Estimation of the Sample Selection Model	239
7.7	Estimating Treatment Effects	240
7.8	Duration Models	244
7.8.1	Hazard Rates and Survival Functions	245
7.8.2	Samples and Model Estimation	247
7.8.3	Illustration: Duration of Bank Relationships	249
	Exercises	251
8	Univariate Time Series Models	255
8.1	Introduction	256
8.1.1	Some Examples	256
8.1.2	Stationarity and the Autocorrelation Function	258
8.2	General ARMA Processes	261
8.2.1	Formulating ARMA Processes	261
8.2.2	Invertibility of Lag Polynomials	264
8.2.3	Common Roots	265
8.3	Stationarity and Unit Roots	266
8.4	Testing for Unit Roots	268
8.4.1	Testing for Unit Roots in a First Order Autoregressive Model	269
8.4.2	Testing for Unit Roots in Higher Order Autoregressive Models	271
8.4.3	Extensions	273
8.4.4	Illustration: Annual Price/Earnings Ratio	274
8.5	Illustration: Long-run Purchasing Power Parity (Part 1)	276
8.6	Estimation of ARMA Models	279
8.6.1	Least Squares	279
8.6.2	Maximum Likelihood	280
8.7	Choosing a Model	281
8.7.1	The Autocorrelation Function	281
8.7.2	The Partial Autocorrelation Function	283
8.7.3	Diagnostic Checking	284
8.7.4	Criteria for Model Selection	285
8.7.5	Illustration: Modelling the Price/Earnings Ratio	286

8.8	Predicting with ARMA Models	288
8.8.1	The Optimal Predictor	288
8.8.2	Prediction Accuracy	291
8.9	Illustration: The Expectations Theory of the Term Structure	293
8.10	Autoregressive Conditional Heteroskedasticity	297
8.10.1	ARCH and GARCH Models	298
8.10.2	Estimation and Prediction	301
8.10.3	Illustration: Volatility in Daily Exchange Rates	303
8.11	What about Multivariate Models?	305
	Exercises	306
9	Multivariate Time Series Models	309
9.1	Dynamic Models with Stationary Variables	310
9.2	Models with Nonstationary Variables	313
9.2.1	Spurious Regressions	313
9.2.2	Cointegration	314
9.2.3	Cointegration and Error-correction Mechanisms	318
9.3	Illustration: Long-run Purchasing Power Parity (Part 2)	319
9.4	Vector Autoregressive Models	321
9.5	Cointegration: the Multivariate Case	324
9.5.1	Cointegration in a VAR	325
9.5.2	Example: Cointegration in a Bivariate VAR	327
9.5.3	Testing for Cointegration	328
9.5.4	Illustration: Long-run Purchasing Power Parity (Part 3)	331
9.6	Illustration: Money Demand and Inflation	333
9.7	Concluding Remarks	339
	Exercises	339
10	Models Based on Panel Data	341
10.1	Advantages of Panel Data	342
10.1.1	Efficiency of Parameter Estimators	343
10.1.2	Identification of Parameters	344
10.2	The Static Linear Model	345
10.2.1	The Fixed Effects Model	345
10.2.2	The Random Effects Model	347
10.2.3	Fixed Effects or Random Effects?	351
10.2.4	Goodness-of-fit	352
10.2.5	Alternative Instrumental Variables Estimators	353
10.2.6	Robust Inference	355
10.2.7	Testing for Heteroskedasticity and Autocorrelation	357
10.3	Illustration: Explaining Individual Wages	358
10.4	Dynamic Linear Models	360
10.4.1	An Autoregressive Panel Data Model	360
10.4.2	Dynamic Models with Exogenous Variables	365
10.5	Illustration: Wage Elasticities of Labour Demand	366

10.6	Nonstationarity, Unit Roots and Cointegration	368
10.6.1	Panel Data Unit Root Tests	369
10.6.2	Panel Data Cointegration Tests	372
10.7	Models with Limited Dependent Variables	373
10.7.1	Binary Choice Models	373
10.7.2	The Fixed Effects Logit Model	375
10.7.3	The Random Effects Probit Model	376
10.7.4	Tobit Models	377
10.7.5	Dynamics and the Problem of Initial Conditions	378
10.7.6	Semi-parametric Alternatives	380
10.8	Incomplete Panels and Selection Bias	380
10.8.1	Estimation with Randomly Missing Data	381
10.8.2	Selection Bias and Some Simple Tests	383
10.8.3	Estimation with Nonrandomly Missing Data	385
	Exercises	385
A	Vectors and Matrices	389
A.1	Terminology	389
A.2	Matrix Manipulations	390
A.3	Properties of Matrices and Vectors	391
A.4	Inverse Matrices	392
A.5	Idempotent Matrices	393
A.6	Eigenvalues and Eigenvectors	394
A.7	Differentiation	394
A.8	Some Least Squares Manipulations	395
B	Statistical and Distribution Theory	397
B.1	Discrete Random Variables	397
B.2	Continuous Random Variables	398
B.3	Expectations and Moments	399
B.4	Multivariate Distributions	400
B.5	Conditional Distributions	401
B.6	The Normal Distribution	403
B.7	Related Distributions	405
	Bibliography	409
	Index	421
