

Fifth Edition

Biostatistical Analysis

Jerrold H. Zar

For these special editions, the editorial team at Pearson has collaborated with educators across the world to address a wide range of subjects and requirements, equipping students with the best possible learning tools.

This international edition preserves the cutting-edge approach and pedagogy of the original, but may also feature alterations, customization and adaptation from the United States version.

Biostatistical Analysis 5th...ternational Economy Edition)
New

f t y /PearsonIN

1. Data: Types and Presentation	1
2. Populations and Samples	17
3. Measures of Central Tendency	23
4. Measures of Variability and Dispersion	35
5. Probabilities	53
6. The Normal Distribution	71
7. One-Sample Hypotheses	103
8. Two-Sample Hypotheses	137
9. Paired-Sample Hypotheses	189
10. Multisample Hypotheses and the Analysis of Variance	201
11. Multiple Comparisons	239
12. Two-Factor Analysis of Variance	263
13. Data Transformations	301

14. Multiway Factorial Analysis of Variance	313
15. Nested (Hierarchical) Analysis of Variance	327
16. Multivariate Analysis of Variance	337
17. Simple Linear Regression	351
18. Comparing Simple Linear Regression Equations	387
19. Simple Linear Correlation	405
20. Multiple Regression and Correlation	447
21. Polynomial Regression	487
22. Testing for Goodness of Fit	497
23. Contingency Tables	523
24. Dichotomous Variables	553
25. Testing for Randomness	623
26. Circular Distributions: Descriptive Statistics	645
27. Circular Distributions: Hypothesis Testing	665
Literature Cited	713
Index	751
