

# HANDBOOK

## STRUCTURAL ASSESSMENT OF INDUSTRIAL HERITAGE BUILDINGS

		Page
	<b>FOREWORD.....</b>	<b>3</b>
	<b>CONTENTS.....</b>	<b>5</b>
<b>I</b>	<b>INTRODUCTION.....</b>	<b>9</b>
1.	Industrial heritage.....	10
2.	Criteria for listing industrial heritage.....	10
3.	Importance of protection.....	12
3.1	<i>Industrial heritage buildings</i> .....	12
3.2	<i>Industrial heritage bridges</i> .....	12
4.	Initiatives concerning the industrial heritage.....	13
4.1	<i>Initiatives on an international level</i> .....	13
4.2	<i>Initiatives in the Czech Republic</i> .....	14
	References.....	16
<b>II</b>	<b>BASIS OF ASSESSMENT.....</b>	<b>17</b>
1.	Introduction.....	18
2.	Principles.....	18
3.	Investigation.....	21
4.	Basic variables.....	22
5.	Structural analysis.....	23
6.	Verification.....	23
7.	Assessment in case of damage.....	25
8.	Report.....	25
	References.....	27
<b>III</b>	<b>ACTIONS.....</b>	<b>29</b>
1.	Introduction.....	30
2.	Actions and effect of actions.....	30
2.1	<i>Definition of actions</i> .....	30
2.2	<i>Effect of actions</i> .....	30
3.	Classification of the actions.....	31
3.1	<i>General</i> .....	31
3.2	<i>Variation in time</i> .....	31
3.3	<i>Origin</i> .....	31
3.4	<i>Variation in space</i> .....	32
3.5	<i>Nature or structural response</i> .....	32
3.6	<i>Bounded and unbounded actions</i> .....	32
4.	Reference period and distribution of extremes.....	32
4.1	<i>Climatic actions</i> .....	32
4.2	<i>Imposed loads</i> .....	33
5.	Characteristic values.....	35
5.1	<i>General</i> .....	35
5.2	<i>Permanent actions</i> .....	35
5.3	<i>Variable actions</i> .....	37
5.4	<i>Imposed loads</i> .....	37
5.5	<i>Snow loads</i> .....	38

5.6	<i>Wind actions</i>	38
5.7	<i>Thermal actions</i>	41
6.	Representative values of actions .....	41
6.1	<i>General</i>	41
6.2	<i>Combination value of a variable action</i>	42
6.3	<i>Frequent value of a variable action</i>	42
6.4	<i>Quasi-permanent value of a variable action</i>	42
7.	Representation of the dynamic actions .....	42
8.	Representation of fatigue actions .....	44
9.	Probabilistic models of actions .....	44
9.1	<i>Permanent actions</i>	44
9.2	<i>Imposed loads</i>	45
9.3	<i>Snow loads</i>	47
9.4	<i>Wind actions</i>	47
9.5	<i>Time-dependency of the climatic actions</i>	48
9.6	<i>Model uncertainties of load effects</i>	48
	References .....	50
<b>IV</b>	<b>MATERIALS AND GEOMETRY .....</b>	<b>53</b>
1.	Introduction .....	54
1.1	<i>Background materials</i>	54
1.2	<i>General principles</i>	54
2.	Characteristic values of material properties .....	54
2.1	<i>General</i>	54
2.2	<i>Determination of the characteristic values</i>	55
3.	Estimation of the characteristic and design material properties .....	56
3.1	<i>Estimation from a theoretical model</i>	56
3.2	<i>Estimation from limited experimental data</i>	59
4.	Probabilistic models of material properties .....	63
4.1	<i>Strengths</i>	63
4.2	<i>Model uncertainties of resistance</i>	64
5.	Geometrical data .....	65
5.1	<i>General</i>	65
5.2	<i>Probabilistic models of geometrical data</i>	66
	References .....	68
<b>V</b>	<b>DETERIORATION .....</b>	<b>71</b>
1.	Introduction .....	72
2.	Overview of weathering effects on building materials .....	73
2.1	<i>Environmental effects</i>	73
2.2	<i>Pollution effects</i>	76
3.	Overview of damage functions .....	78
3.1	<i>Stone recession</i>	79
3.2	<i>Concrete</i>	80
3.3	<i>Steel</i>	82
	References .....	84
<b>VI</b>	<b>RELIABILITY ANALYSIS .....</b>	<b>89</b>
1.	General principles .....	90
2.	Uncertainties .....	90

3.	Reliability .....	91
3.1	General .....	91
3.2	Definition of reliability .....	91
3.3	Probability of failure .....	92
3.4	Reliability index .....	93
4.	Reliability verification .....	93
4.1	Deterministic methods .....	93
4.2	Probabilistic methods .....	94
4.3	Probabilistic updating .....	101
	References .....	103
<b>VII</b>	<b>DECISION ON CONSTRUCTION INTERVENTIONS.....</b>	<b>105</b>
1.	Design of construction interventions .....	106
2.	Target reliability levels .....	106
3.	Principles of the total cost minimisation .....	107
4.	Simplified estimation of failure cost .....	108
	References .....	110
<b>VIII</b>	<b>CONCLUDING REMARKS.....</b>	<b>113</b>
<b>ANNEX A - CASE STUDIES.....</b>		<b>117</b>
1.	Textile mill .....	118
1.1	Probabilistic reliability analysis .....	118
1.2	Cost optimisation .....	119
2.	Steel roof .....	120
2.1	Deterministic verification .....	120
2.2	Probabilistic reliability analysis .....	121
2.3	Parametric study .....	122
3.	Steel beam .....	123
4.	Assessment of concrete strength .....	124
5.	Masonry strength .....	125
5.1	Motivation .....	125
5.2	Evaluation of tests .....	125
5.3	Masonry strength in accordance with present standards .....	129
5.4	Probabilistic analysis .....	130
5.5	Concluding remarks .....	132
	References .....	133
<b>ANNEX B - BASIC STATISTICAL CONCEPTS AND TECHNIQUES .....</b>		<b>135</b>
1.	Introduction .....	136
1.1	Background materials .....	136
1.2	General principles .....	136
2.	Population and samples .....	136
2.1	General .....	136
2.2	Sample characteristics .....	136
2.3	Distribution function .....	137
2.4	Population parameters .....	138
3.	Selected models of random variables .....	140
3.1	Normal distribution .....	140
3.2	Lognormal distribution .....	141

3.3	<i>Gamma distribution</i>	144
3.4	<i>Beta distribution</i>	146
3.5	<i>Gumbel and other distributions of extreme values</i>	148
3.6	<i>Function of random variables</i>	152
References	.....	153
Appendix 1 - Probabilistic models of basic variables		
Appendix 2 - Statistical parameters of functions of random variables
