PREFACE: TRANSLATION IN AN INDUSTRIAL SETTING

xvii

CHA	PTER ONE: THE LANGUAGE INDUSTRY AND ITS RAW MATERIAL	
1	The language industry and translation	1
1.1	The industrialisation of communication	1
1.2	The scope of 'language industry'	2
	1 Support industry	
	2 Industry for processing language	3
	3 Industry for the production of languages	3 3 3
	4 Tools and Products	4
1.3	The evolution of the language industry	4
	1 The present situation	7
	2 The role of linguistic research	8
1.4	The structure of the language industry	10
	1 Science and applications	10
	2 Range of written and spoken languages	12
	3 Reception and production	12
10	4 Applications and products	12
1.5	Conditions for the design and application of industrial tools	18
	1 Conditions for the development of the machine	
	translation industry	19
2	Theoretical aspects of language	21
2.1	The nature and uses of language	21
2.2	The intention of speech acts	24
	1 The pragmatic dimension of speech acts	25
2.3	The concept of sublanguages	26
	1 Criteria for establishing sublanguages	29
2.4	Evolution and types of language varieties	30
2.5	Natural and artificial languages	32
	1 Characteristics of natural language	33
	2 Characteristics of artificial languages	34

CHAPTER TWO: COMMUNICATION THEORY FOR TRANSLATION

3	Ele	ements of a communication theory	51
3.1		e environment of communication	51
3.2	Pre	econditions of communication	52
	1	Communicative situations	54
	2	The situation of the written speech act	56
	3	Components of the speech act	57
		1 The stimulus	59
		2 Transport factors	59
		3 Spatial factors	61
		4 Personal factors	62
3.3	Ch	oices in communication	64
	1	Choice of content of the message	64
		1 Topic	66
		2 Aspect	66
	2	Choice of purpose (intention & expectation)	67
		1 Social purpose	69
		2 Informative purpose	69
		3 Directive purpose	70
		4 Discursive purpose	7(
		5 Evaluative purpose	70
	3	Choice of affectivity	71
	4	Choice of language	71
	5	Choice of text type	73
	6	Choice of techniques of communication	73
		1 Choice of non-linguistic vs.	
		mixed linguistic/non-linguistic communication	73
		2 Choice of external form	74
		3 Choice of technical means	75

CHA	PTER THREE: THEORETICAL ASPECTS OF TRANSLATION
5	The nature of translation
5.1	The scope of theories of translation
	1 Two aspects of translation
	1 Process
	2 Products
	2 Dimensions of a theory
	1 Communicative/author dimension
	2 Document or product dimension
	3 Reader/agent/recipient dimension
	4 Motivation/translator dimension
	5 Situational dimension
	3 Machine translation as a new activity and product
5.2	The meanings of translation
	1 Existing definitions of translation
	2 Other meanings of translation
5.3	The concept of translatability
	1 The legitimacy of translation
	2. Cultural arguments
	3 Philosophical arguments
	4 Measures of translatability
5.4	The basis of a theory of translation
	1 Process model of translation
	2 Translation situations
5.5	The concept of equivalence
5.6	Evaluation of translation
104	1 Criteria for evaluation
6	Specifications: Factors influencing translation
6.1	Conditions for modelling the translation process
	1 Basic approaches to translation techniques
6.2	Existing models of the translation process
NO.	I DELEVITOR C

CON	TENTS
-----	-------

6.3	Major types of translation activities	100
	1 Literary translation	160
	2 Bible translation	160
	3 Industrial translation	162
6.4	Analysis of the translation task	164
	1 Alternative views of the tal	
6.5	Specification phase	166
	1 Identification of source language 1	168
	1 Recognition of text type and topic	169
	2 Recognition of intention 2 Interpretation of specifications	169
		172
	1 The site of a standard standar	172
	2 Time and cost factors	173
	3 The condition of the translator	173
	4 Writer and reader factors	175
	5 User expectation	176
	6 Source and product (textual) factors	177
6.6	Functional types of translation	177
	1 Autonomous documents	179
	2 Interdependent documents	179
	1 Parallel documents	180
	2 Full equal documents	180 180
	5 Derived documents	180
	1 Selective documents (Excerpts)	180
	2 Reduced documents (Abstracts)	181
	3 Translations with the same function	181
	4 Translations with a different function	182
	Target language text type	182
	Translation text type	182
	4 Functional types of translation by intention	183
	5 Other functional types of translation	184
		104
CHAI	TER FOUR: A MODEL OF THE TRANSLATION PROCESS	
7	Preparation for translation	
7.1	Chaine C.	185
7.2	Choice of target language text type Choice of translation strategy	186
	1 Motivation of diverse translation strategies	188
	1 Full reduced and salasting to a last	188
	1 Full, reduced and selective translation	191

xi

CHA	PTER FIVE: THE AUTOMATED DIMENSION OF TRANSLATION	
9	Human and machine translation	243
9.1	Modes of comparison	244
9.2	Comparison of the translation processes	246
	1 Translation as problem solving	246
	2 The expert system view	249
	1 The type and nature of knowledge bases	250
	3 The nature of the modules in the MT process	250
	1 Comprehension vs. analysis	253
	2 Matching vs. transfer	253
	3 Writing vs. generation/synthesis	253
	4 Current limitations of MT	254
9.3	Comparison of human and machine translation products	256
	1 Human vs. machine-produced texts	256
	1 The nature of machine-generated (MT) language	258
0.4	2 Flexibility vs. rigidity in text types	260
9.4	Uses of MT	261
9.5	Comparative evaluation of MT-produced texts	262
800x	1 Methods of MT evaluation	264
10	The pragmatic circumstances of automation in translation	267
10.1	Methods of MT	267
	1 Linguistic approaches	267
10.0	2 The semantic approach	270
10.2	Users of MT systems	271
	1 The translator as producer	271
	2 The writer as translation producer	271
	3 Readers of translations	271
10.2	4 The information supplier	272
10.3	Brief description of MT systems	272
10.4	Functional types of machine translation	274
	1 MT as human translation aid	275
	 2 Translation by reference to existing models 3 MT as text-type specific independent systems 	279
	and as tone type specific independent systems	280
	1 Reader-oriented MT 2 Writer-oriented MT	281
		283
	 3 Writer-oriented editing of pre-translated text 4 MT of machine-readable restricted language texts 	285
	5 MT of machine-readable artificial language texts	285
	6 Outlook	287
		288

LANGUAGE ENGINEERING AND TRANSLATION

10.5	Other applications of MT technology	288
10.6	Other ways of classifying MT systems	289
	1 Typology of MT systems by text types	289
	2 Typology of MT systems by degree of automation	290
10.7	Criteria for the use of MT	291
	1 Cost factors	291
	2 Document selection for MT processing	291
СНА	PTER SIX: INDUSTRIALISATION OF TRANSLATION	
11	Translation in an information technology environment	293
11.1	Industrial aspects of translation	293
	1 The cost and value of translation	294
	2 Growth in demand	297
	3 The market for MT	300
11.2	r - g of the development of Mr	303
	1 MT system designers and producers	303
	2 Translators as users of IT and MT	304
	3 Survey of the evolution of MT	305
11.2	4 Practical achievements of MT	308
11.3	Future prospects for the language industry	309
