

# LIST OF CONTENTS

|  |     |
|--|-----|
| Introduction .....                               | 5   |
| 1 Experimental structure .....                   | 7   |
| 2 Loading .....                                  | 13  |
| 2.1 Mechanical load .....                        | 13  |
| 2.2 Fire load .....                              | 15  |
| 3 Gas temperatures .....                         | 17  |
| 4 Temperatures of structures .....               | 25  |
| 4.1 Structural elements .....                    | 25  |
| 4.2 Connections .....                            | 33  |
| 4.3 External column .....                        | 38  |
| 4.4 Composite slab .....                         | 41  |
| 4.5 Wall temperatures .....                      | 43  |
| 4.6 Plaster wall temperatures .....              | 50  |
| 5 Deformations .....                             | 53  |
| 5.1 Deflectometers .....                         | 53  |
| 5.2 Trigonometric measurement .....              | 58  |
| 5.3 Laser scanning .....                         | 79  |
| 6 Relative stresses .....                        | 99  |
| 7 Weather conditions, flux density of heat ..... | 103 |
| 8 Summary .....                                  | 107 |
| References .....                                 | 113 |
| Annexes  |     |
| A Location of load and measurements .....        | 115 |
| B Tables of measured values .....                | 129 |
